## Model Participating LEA Memorandum of Understanding

| This Memorandum of Understanding ("MOU") is            | entered into by and between the State of North |
|--------------------------------------------------------|------------------------------------------------|
| Carolina and                                           | ("Participating LEA"). The purpose of this     |
| agreement is to establish a framework of collaborat    | tion, as well as articulate specific roles and |
| responsibilities in support of the State in its implen | nentation of an approved Race to the Top grant |
| project.                                               |                                                |

#### I. SCOPE OF WORK

Exhibit I, the Preliminary Scope of Work, indicates which portions of the State's proposed reform plans ("State Plan") the Participating LEA is agreeing to implement. (Note that, in order to participate, the LEA must agree to implement all or significant portions of the State Plan.)

## II. PROJECT ADMINISTRATION

### A. PARTICIPATING LEA RESPONSIBILITIES

In assisting the State in implementing the tasks and activities described in the State's Race to the Top application, the Participating LEA subgrantee will:

- 1) Implement the LEA plan as identified in Exhibits I and II of this agreement;
- 2) Actively participate in all relevant convenings, communities of practice, or other practice-sharing events that are organized or sponsored by the State or by the U.S. Department of Education ("ED");
- 3) Post to any website specified by the State or ED, in a timely manner, all non-proprietary products and lessons learned developed using funds associated with the Race to the Top grant;
- 4) Participate, as requested, in any evaluations of this grant conducted by the State or ED;
- 5) Be responsive to State or ED requests for information including on the status of the project, project implementation, outcomes, and any problems anticipated or encountered;
- 6) Participate in meetings and telephone conferences with the State to discuss (a) progress of the project, (b) potential dissemination of resulting non-proprietary products and lessons learned, (c) plans for subsequent years of the Race to the Top grant period, and (d) other matters related to the Race to the Top grant and associated plans.

#### **B. STATE RESPONSIBILITIES**

In assisting Participating LEAs in implementing their tasks and activities described in the State's Race to the Top application, the State grantee will:

- 1) Work collaboratively with, and support the Participating LEA in carrying out the LEA Plan as identified in Exhibits I and II of this agreement;
- 2) Timely distribute the LEA's portion of Race to the Top grant funds during the course of the project period and in accordance with the LEA Plan identified in Exhibit II;
- 3) Provide feedback on the LEA's status updates, annual reports, any interim reports, and project plans and products; and
- 4) Identify sources of technical assistance for the project.

### C. JOINT RESPONSIBILITIES

- 1) The State and the Participating LEA will each appoint a key contact person for the Race to the Top grant.
- 2) These key contacts from the State and the Participating LEA will maintain frequent communication to facilitate cooperation under this MOU.

- 3) State and Participating LEA grant personnel will work together to determine appropriate timelines for project updates and status reports throughout the whole grant period.
- 4) State and Participating LEA grant personnel will negotiate in good faith to continue to achieve the overall goals of the State's Race to the Top grant, even when the State Plan requires modifications that affect the Participating LEA, or when the LEA Plan requires modifications.

#### D. STATE RECOURSE FOR LEA NON-PERFORMANCE

If the State determines that the LEA is not meeting its goals, timelines, budget, or annual targets or is not fulfilling other applicable requirements, the State grantee will take appropriate enforcement action, which could include a collaborative process between the State and the LEA, or any of the enforcement measures that are detailed in 34 CFR section 80.43 including putting the LEA on reimbursement payment status, temporarily withholding funds, or disallowing costs.

#### III. ASSURANCES

The Participating LEA hereby certifies and represents that it:

- 1) Has all requisite power and authority to execute this MOU;
- 2) Is familiar with the State's Race to the Top grant application and is supportive of and committed to working on all or significant portions of the State Plan;
- 3) Agrees to be a Participating LEA and will implement those portions of the State Plan indicated in Exhibit I, if the State application is funded,
- 4) Will provide a Final Scope of Work to be attached to this MOU as Exhibit II only if the State's application is funded; will do so in a timely fashion but no later than 90 days after a grant is awarded; and will describe in Exhibit II the LEA's specific goals, activities, timelines, budgets, key personnel, and annual targets for key performance measures ("LEA Plan") in a manner that is consistent with the Preliminary Scope of Work (Exhibit I) and with the State Plan; and
- 5) Will comply with all of the terms of the Grant, the State's subgrant, and all applicable Federal and State laws and regulations, including laws and regulations applicable to the Program, and the applicable provisions of EDGAR (34 CFR Parts 75, 77, 79, 80, 82, 84, 85, 86, 97, 98 and 99).

#### IV. MODIFICATIONS

This Memorandum of Understanding may be amended only by written agreement signed by each of the parties involved, and in consultation with ED.

#### V. DURATION/TERMINATION

This Memorandum of Understanding shall be effective, beginning with the date of the last signature hereon and, if a grant is received, ending upon the expiration of the grant project period, or upon mutual agreement of the parties, whichever occurs first.

#### VI. SIGNATURES

| <b>LEA Superintendent</b> (or equivalent authorized signatory) - required: |  |
|----------------------------------------------------------------------------|--|
| Signature/Date                                                             |  |
| Print Name/Title                                                           |  |
| President of Local School Board (or equivalent, if applicable):            |  |

| Signature/Date                                                                                                         |
|------------------------------------------------------------------------------------------------------------------------|
| Print Name/Title                                                                                                       |
| Local Teachers' Union Leader (if applicable):                                                                          |
| Signature/Date                                                                                                         |
| Print Name/Title                                                                                                       |
| Authorized State Official - required: By its signature below, the State hereby accepts the LEA as a Participating LEA. |
| Signature/Date                                                                                                         |

## NC Race to the Top Management Team

Patricia Ashley, Ed.D., is Director of District and School Transformation for NCDPI. Before assuming this position, she was Assistant Superintendent for Instruction for the Owensboro Public Schools, Owensboro, KY, a district identified by Standard and Poor's as an "out-performing" district as a result of student achievement far exceeding predictive variables. She previously served as a teacher in Durham schools, counselor in Wake County, and school psychologist and middle school principal as well as director of social studies and director of student services for the Charlotte-Mecklenburg Schools. She was principal of State College Area High School in State College, PA, and principal of Masonville/Deer Park Elementary in Davies County, KY, both recognized as national Blue Ribbon Schools by the US Department of Education Deer Park Elementary, a Title 1 school in Owensboro, KY, although initially low-performing, became the highest achieving school in KY based on statewide assessment for multiple years and was featured on the Today Show for innovation in education. She received her Bachelor's degree from Duke University in history, a Master's degree and doctorate in counseling from NC State University, and did post-doctoral work in education leadership. She has served as adjunct professor of psychology at Winthrop College and of educational leadership at Western Kentucky University.

June St. Clair Atkinson, Ed.D., was elected as the NC State Superintendent of Public Instruction in November 2004 and re-elected in 2008. Dr. Atkinson is the first woman in NC elected to this position. She heads the NC Department of Public Instruction, an agency in which she served for nearly 28 years as a chief consultant and director in the areas of business education, career and technical education, and instructional services. As a former business education teacher, Dr. Atkinson has been involved in instruction and curriculum development throughout her career. She is past president of the National Business Education Association, Southern Regional Education Board's High Schools that Work, and the National Association of State Directors of Career and Technical Education Consortium. Dr. Atkinson is a member of Delta Kappa Gamma and Phi Delta Kappa and was inducted into East Carolina University's College of Education Educator Hall of Fame in 2008. She received a Bachelor's degree in Business Education from Radford University in 1969, a Master's degree in Vocational and Technical Education from Virginia Tech in 1974, and a Doctorate degree in Educational Leadership and Policy from NC State University in 1996.

Rebecca Garland, Ed.D., is the Chief Academic Officer for the NCDPI. Before assuming this position, she served as the executive director for the NC State Board of Education. In her 30-plus years in education, she has served as a teacher with Harnett County Public Schools, a consultant for the NCDPI in content and gifted education, a director of Middle Schools/Arts/and Gifted Education for Alamance-Burlington Schools, and an associate superintendent for Curriculum and Instruction for Orange County Schools. She holds a Bachelor's degree in History from UNC-Greensboro, a Master's degree in Education from Campbell University, and a Doctorate in Education Leadership from NC State University.

**William Harrison, Ed.D.,** was appointed to the State Board of Education by Governor Beverly Perdue in March 2009. A native of Pennsylvania, Dr. Harrison has served North Carolina public schools throughout his career. In addition to more than 11 years as

Superintendent in Cumberland County, he also has served as Superintendent in Orange County and in Hoke County. He has also served as an Assistant Superintendent in Brunswick County Schools and as a principal and teacher. Dr. Harrison is an adjunct assistant professor at North Carolina State University. His experience includes serving on numerous state commissions, most recently as Co-Chair of the Education Lottery Oversight Committee and as Vice-Chair of the Military Child Education Coalition. Dr. Harrison holds a bachelor's degree in Intermediate Education from Methodist College - Fayetteville, a master's degree in Educational Administration and an Education Specialist degree in Education Administration from East Carolina University, and an Educational doctorate in Education Administration from Vanderbilt University.

Lynne Johnson, Ed.D., has served North Carolina for over 20 years as a teacher, assistant principal, principal, Executive Director for Curriculum and Professional Development and Chief Personnel Officer, earning undergraduate and graduate degrees from UNC-Chapel Hill and a doctoral degree from UNC-Greensboro. Dr. Johnson has worked with educators in the Guilford, Wake, Chapel Hill-Carrboro, Durham, Chatham and Northampton County school systems. Developing and directing Leadership Programs for Aspiring Principals and New Principals, she served as a Program Director for the Principals' Executive Program at the UNC Center for School Leadership Development. Currently, Dr. Johnson is the Director for Educator Recruitment and Development Division at NCDPI.

Adam Levinson, Director, Policy & Strategic Planning, is a member of the State Superintendent's Cabinet and leads, on behalf of the Superintendent, agency efforts to continuously improve organizational effectiveness and efficiency. This work includes efforts to establish, monitor, and manage agency strategic priorities and promote allocation of agency human and financial resources consistent with those priorities. Mr. Levinson counsels the Superintendent and State Board of Education chairman regarding a broad array of policy, strategic, and operational decisions. He created a new division of the Superintendent's Office and currently manages seven direct reports, several of whom are responsible for development of policies and procedures for agency data management. Mr. Levinson has also led and/or managed a number of large, cross-agency projects, including redesign of core business processes and agency reorganization. He is the Project Director for the IES SLDS grant-funded Common Education Data Analysis & Reporting System (CEDARS). He represents NCDPI in collaborations with various external stakeholders, including the legislature, Governor's office, NC Education Cabinet, other State agencies, local education agencies, vendors, and private non-profit entities. He is a member of the Council of Chief State Schools Officers Education Information Management Advisory Council (CCSSO EIMAC). On the NC P20+ project (NC's proposed ARRA P20 SLDS project), Mr. Levinson's anticipated responsibilities will include management of the overall project and management of NCDPI's sectorspecific sub-project.

**Angela Hinson Quick, Ed.S.,** is the Deputy Chief Academic Officer for the NCDPI. In this position, she has been charged with implementing the Framework for Change, which includes reforming North Carolina's accountability model, standards and assessments, and DPI's ACRE (Accountability and Curriculum Reform Effort) Project. Prior to joining the agency, Ms. Quick served as a high school biology teacher, a director/principal at two

math/science magnet high schools and a high school principal. She has experience in school districts in North and South Carolina and in Georgia. Ms. Quick holds a B.S. from Appalachian State University, an M.S. from the University of South Carolina, and an Ed.S. from Cambridge College in Boston. Ms. Quick is also a North Carolina Teaching Fellow.

## **Examples of North Carolina Professional Development Programs**

## All Kinds of Minds

All Kinds of Minds develops and delivers professional development programs for educators that integrate the latest research-based principles into a framework for better understanding and managing learning variation among students. Over the past ten years, All Kinds of Minds has trained more than 4,300 K-12 educators in 500 schools and 64 LEAs throughout NC, primarily through its five-day *Schools Attuned* course.

## Center for Teaching Quality

The Center for Teaching Quality seeks to improve student learning and advance the teaching profession by cultivating teacher leadership. The Center has designed a unique professional learning initiative that taps the expertise of National Board Certified Teachers. During the 2008-09 school year, more than 500 teachers across the state and nation received the opportunity for sustained professional development and support through their virtual learning communities.

## Hill Center

The Hill Center is well-practiced in the delivery of best practices professional development for teachers, as well as large, systemic professional development project implementation to improve student achievement. Since establishment of its professional development programs, Hill has trained thousands of educators from 80 NC counties.

## Kenan Fellows Program

Established in 2000, the Kenan Fellows Program at NC State University promotes teacher leadership through a prestigious two-year fellowship. Teachers selected as fellows engage in two-year partnerships with distinguished scientists to update teacher content knowledge, gain an understanding of the significance of current research and scientific practice for students, and develop curriculum materials.

## LEARN NC

LEARN NC, a program of the UNC-Chapel Hill School of Education, has provided high-quality, cohort-based, online professional development courses to more than 4,000 NC educators. It has trained more than 900 NC educators to lead online professional development workshops and over 100 NC educators to develop courses.

## North Carolina Center for the Advancement of Teaching (NCCAT)

The NCCAT was established in 1985 to retain high-quality teachers by providing a continuum of research-based professional development programs for beginning teachers, National Board candidates, teacher leaders, and teachers focused on core content areas. NCCAT provides programming to over 4,000 teachers yearly.

North Carolina Mathematics and Science Education Network (NC-MSEN)

Established more than 20 years ago, the NC-MSEN leverages the faculty and other resources on its 11 UNC campuses to ensure that high-quality, standards- and research-based professional development opportunities are available for NC's science and mathematics teachers.

Section A: Appendix 4

## North Carolina New Schools Project

The NC New Schools Project provides a comprehensive system of support services, including coaching, teacher professional development, principal professional development, and ongoing counsel to more than 100 redesigned and early-college high schools across the state.

## North Carolina Teacher Academy

The NC Teacher Academy was established in 1994 by the NC General Assembly to design and deliver staff development in the areas of school improvement, core content, instructional pedagogy, and the use of technology. The Teacher Academy has trained over 45,000 teachers in summer academies, as well as 32,000 participants in local and school-level staff development programs.

## Science House

The Science House, a learning outreach program of NC State University, annually reaches over 5,000 teachers and over 36,000 students from six offices spread across the state. Their mission is to work in partnership with K-12 teachers and students to promote the use and impact of handson inquiry based learning in science and math.

**D.5:** Providing Effective Support to Teachers and Principals Evaluation Matrix

E: Turning Around the Lowest-Achieving Schools (TALAS) Evaluation Matrix

NC Race To The Top Application

<sup>&</sup>lt;sup>1</sup> The evaluation matrices in this appendix are provided as <u>examples</u> of the types of questions and data sources we will include in RttT evaluation efforts.

## **B.** Standards and Assessment

## **B.3.** Supporting the Transition to Enhanced Standards and High-Quality Assessments Evaluation Matrix

| <b>Evaluation Questions</b>                                                                                                                                                                                                                                                                                                | Data Sources Timeline                                                                                                                                                          |          |  |  |  |  |  |  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|--|--|--|--|--|--|
| Implementation/Process                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                |          |  |  |  |  |  |  |
| What types of tools and outreach activities are developed and used to build and reinforce stakeholders' belief that the new standards will improve student outcomes?                                                                                                                                                       | <ul> <li>Artifact review</li> <li>Participant<br/>records/surveys</li> <li>Interviews (state staff,<br/>others)</li> </ul>                                                     | Annually |  |  |  |  |  |  |
| To what extent do teachers in various grade levels/subject areas receive effective, high-quality  1) tools (e.g., Crosswalk document, learning progressions chart, graphic organizers, classroom examples) and  2) professional development to support them in developing a deep, specific understanding of the standards? | Online questionnaires<br>with focus groups for<br>follow up                                                                                                                    | Annually |  |  |  |  |  |  |
| To what extent do district superintendents, principals, curriculum support personnel, and teachers receive high-quality tools and training in using summative and other kinds of assessment information in planning?                                                                                                       | Online questionnaires<br>with focus groups for<br>follow up                                                                                                                    | Annually |  |  |  |  |  |  |
| Outcomes                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                |          |  |  |  |  |  |  |
| To what extent do teachers teach to and assess students' performance on the new Common Core Standards?                                                                                                                                                                                                                     | <ul> <li>Online questionnaires<br/>(district staff,<br/>principals, teachers)</li> <li>Interviews (key state<br/>leaders)</li> <li>Selected lesson plan<br/>reviews</li> </ul> | Annually |  |  |  |  |  |  |
| What unintended outcomes, if any, are reported relative to the state activities in this area?                                                                                                                                                                                                                              | Interviews (random sample of districts)                                                                                                                                        | Annually |  |  |  |  |  |  |
| Cost-Benefit/Sustainability                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                |          |  |  |  |  |  |  |
| What is the evidence that districts in the state have developed the capacity to support their schools, including their lowest performing schools, in implementing the state standards?                                                                                                                                     | <ul> <li>Site visits/interviews         (random sample of         districts)</li> <li>Online questionnaires</li> </ul>                                                         | Year 4   |  |  |  |  |  |  |
| What are the costs of developing the tools and delivering the training and what are the benefits?                                                                                                                                                                                                                          | <ul> <li>Project and state<br/>budget allocations</li> <li>Evaluation data over<br/>time</li> </ul>                                                                            | Year 4   |  |  |  |  |  |  |

# C. Data Systems to Support Instruction C.3: Using Data to Improve Instruction Evaluation Matrix

| <b>Evaluation Questions</b>                                                                                                                                                                                                               | Data Sources                                                                                                                        | Timeline                                                                 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------|
| Implementation/Process                                                                                                                                                                                                                    |                                                                                                                                     |                                                                          |
| What is the evidence that the applications in the networked database (to include formative and diagnostic items and formats, curriculum monitoring support, and "dashboard" interfaces) are used as intended by schools across the state? | • Networked database system users' feedback (principals, teachers, parents)                                                         | To be collected<br>both in pilot and<br>full<br>implementation<br>stages |
| What do users perceive as the relative strengths and weaknesses of the tools (e.g., ease of use) and professional development in supporting student progress toward standards?                                                            |                                                                                                                                     |                                                                          |
| Outcomes                                                                                                                                                                                                                                  |                                                                                                                                     |                                                                          |
| To what extent do the networked database applications and professional development result in intended improvements in teachers' decisionmaking about their students' instructional needs?                                                 | • Sample of schools tracked over time using variety of methods (interviews with principals/teachers, lesson plan analysis, surveys) | Annually                                                                 |
| What unintended outcomes, if any, are associated with this project and how are they addressed, if identified?                                                                                                                             | Interviews (random<br>sample of districts and<br>schools)                                                                           | Annually                                                                 |
| Cost-Benefit/Sustainability                                                                                                                                                                                                               |                                                                                                                                     |                                                                          |
| What is the evidence that districts in the state have developed the capacity to support their schools, including their lowest performing schools, in using data to improve instruction?                                                   | <ul> <li>Interviews (random<br/>sample of districts and<br/>schools)</li> </ul>                                                     | Years 4                                                                  |
| Are there sufficient financial and human resources to continue support in this area?                                                                                                                                                      | <ul><li>Budget allocations</li><li>Interviews (state staff)</li></ul>                                                               |                                                                          |
| What are the costs of developing the networked database and professional development tools and what are the benefits?                                                                                                                     | <ul> <li>Project and state<br/>budget allocations</li> <li>Evaluation data over<br/>time</li> </ul>                                 | Year 4                                                                   |

# D. Great Teachers and Leaders D.2: Improving Teacher and Principal Effectiveness Based on Performance Evaluation Matrix

| Evaluation Quartiens                                                                                                                                                            | Data Carrage                                                                                                            | Timeline         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|------------------|
| Evaluation Questions                                                                                                                                                            | Data Sources                                                                                                            | Timeline         |
| Implementation/Process  How are the Teacher Evaluation Process (TEP) and Principal Evaluation Process (PEP) used across districts in the state?                                 | <ul> <li>TEP and PEP results</li> <li>Interviews (random sample of teachers, principals, and district staff)</li> </ul> | Annually         |
| How differentiated are the scores (e.g., clustered at the top)?                                                                                                                 | TEP and PEP results                                                                                                     | Annually         |
| How are the TEP and PEP scores related to student achievement and other teacher and principal quality indicators?                                                               | <ul> <li>CEDARS data (student and teacher data)</li> <li>TEP and PEP results</li> </ul>                                 | Annually         |
| How do teachers, principals, and district administrators perceive the usefulness of the evaluation processes?                                                                   | • Interviews (random sample of teachers, principals, and district staff)                                                | Annually         |
| How are results used to make assignments, work with less effective teachers and principals, etc.?                                                                               | • Interviews (random sample of teachers, principals, and district staff)                                                | Annually         |
| Outcomes                                                                                                                                                                        |                                                                                                                         |                  |
| Is there evidence of improved retention rates for effective teachers and principals and increased leaving rates for less effective teachers and principals over the four years? | <ul><li>CEDARS data<br/>(teacher data only)</li><li>TEP and PEP results</li></ul>                                       | Trends over time |
| What unintended outcomes are reported relative to the TEP and PEP evaluation system?                                                                                            | • Interviews (random sample of teachers, principals, and district staff)                                                | Annually         |
| Cost-Benefit/Sustainability                                                                                                                                                     |                                                                                                                         |                  |
| For the TEP and PEP, what is the evidence that the ongoing training and support needed to continue will be available?                                                           | <ul> <li>Interviews (random sample of district staff)</li> <li>State budget allocations</li> </ul>                      | Years 3 and 4    |

# D. Great Teachers and Leaders D.3: Ensuring Equitable Distribution of Effective Teachers and Principals Evaluation Matrix

| <b>Evaluation Questions</b>                                                                                                                                                                           | Data Sources                                                                                                                                  | Timeline         |

## NC Education Cloud Feasibility Report

## 1. Problem Definition and rationale

North Carolina districts are generally ill-equipped to manage production server infrastructure. Server infrastructure is most often housed in facilities that lack sufficient space, power, and cooling. Further, as district servers are typically located in school buildings that are frequented by thousands of people on a daily basis, security exposure is high. Backup systems for power, cooling, storage, and the like are essentially non-existent. Finally, districts have little luck recruiting or retaining qualified information technology professionals trained in server administration.

Recent advances in virtualization and cloud computing have led to competitive service provider offerings of infrastructure as a service (IaaS). Amazon, AT&T, IBM, Microsoft and a number of others have public cloud solutions that provide for both persistent (24x7x365) and on-demand hosted infrastructure services. A comprehensive statewide migration to IaaS would provide equity of access to highly available services. By aggregating demand from across the K-12 enterprise and taking advantage of usage-based cloud offerings the state can realize dramatic cost savings in infrastructure support.

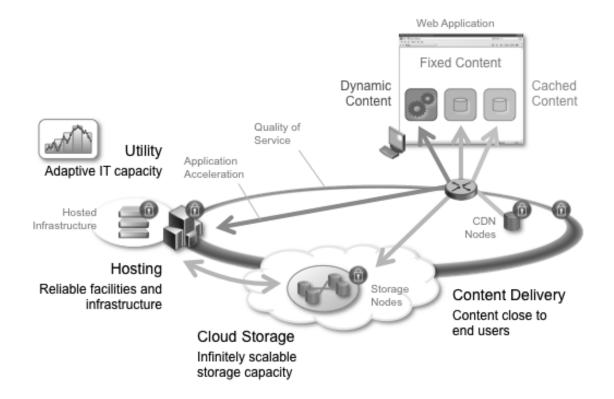

While this set of circumstances is not unique to North Carolina, as a state we are in a unique position to deploy a statewide education cloud solution. In order to successfully deploy infrastructure as a service, each school must enjoy reliable, high-bandwidth, low-latency network connectivity. Fortunately, the \$22M annual recurring investment by the state of NC in the School Connectivity Initiative provides exactly that.

## 2. Introduction and Objective

We propose the creation of the NC Education Cloud (NCEdCloud) to provide a highly reliable, highly available, server infrastructure supporting the K-12 education enterprise statewide. Specifically, we recommend a migration from LEA-hosted server infrastructure to cloud-hosted infrastructure as a service. The primary objective of the NCEdCloud is to provide a world-class IT infrastructure as a foundational component of the NC education enterprise. Moreover, the NCEdCloud will provide for:

- Equity of access to compute and storage resources;
- Efficient scaling according to aggregate NC K-12 usage requirements;
- Consistently high availability, reliability and performance;
- A common infrastructure platform to support emerging data systems;
- Sustainable and predictable operational cost.

Section A: Appendix 6

It is difficult to reconcile a sustainable RttT proposal that does not invest in a contemporary IT infrastructure. Robust technology infrastructure will be required to support data-driven decision-making, for the development of and access to online instructional resources, and to transition the focus of district technical resources from infrastructure to users and instruction. Furthermore, prudent one-time investments in technology infrastructure service platforms buy down long-term IT costs, providing sustainable funding for new instructional and leadership programs that speak directly to RttT guidelines.

## 3. Goals and Target Outcomes

In creating the NCEdCloud we aim to improve service reliability, increase efficiency, and decrease long-term IT costs, while re-aligning local technical resources away from supporting and managing infrastructure. As this recommendation is related to the deployment and support of technology infrastructure, we make no claims related to educational outcomes. We do however enumerate project outcomes here.

| Goal                    | Details                                                                                     | Targets                                                         |  |  |  |
|-------------------------|---------------------------------------------------------------------------------------------|-----------------------------------------------------------------|--|--|--|
| Increase IT reliability | All servers hosted in data centers with reliable and resilient power, cooling, and network. | 99.9% server uptime                                             |  |  |  |
|                         | Data backed up and distributed across at least 2 data centers                               | All Critical data recoverable according to backup/recovery SLA. |  |  |  |

|                                                               | All server infrastructure secured physically and logically             | Monthly security audits of all compute and storage resources. |
|---------------------------------------------------------------|------------------------------------------------------------------------|---------------------------------------------------------------|
| Increase IT efficiency                                        | Leverage server virtualization to deploy logical servers               | 80% utilization of infrastructure resources                   |
|                                                               | Provide single server instances to support common services across LEAs |                                                               |
|                                                               | Automatically scale server and storage resources to meet demand.       |                                                               |
| Decrease cost                                                 | Purchase infrastructure as a service                                   | Cut aggregate server infrastructure costs in <u>half</u>      |
|                                                               | Pay based on usage for all non-persistent services                     |                                                               |
|                                                               | Shift power, cooling, backup and the like to the cloud                 |                                                               |
| Increase number of LEA technical staff supporting instruction | Transition server hosting and management to cloud providers            | Free up on average <u>one</u> technical FTE per LEA           |
|                                                               | Transition infrastructure planning and provider management to MCNC     |                                                               |

The target completion for the measurable goals outlined here is 36 months from the initiation of the project. More granular interim milestones will be defined during the project planning process.

## 4. Key Elements, Roles and Partners

The NCEdCloud initiative is at its core an outsourcing program. The NCEdCloud program transitions LEA server and storage infrastructure to commercial cloud providers and establishes an NCEdCloud administrator to oversee the commercial providers and to manage the process of moving services into and out of the cloud. The key elements of the program are:

- Planning
- Cloud Deployment
- Pilot Migrations
- Statewide Migration
- Measurement and Monitoring
- Cloud Administration

The NC School Connectivity Initiative built the foundation for the NCEdCloud program both in terms of providing network infrastructure to all LEAs and in terms of establishing a rigorous project planning and deployment methodology. In the paragraphs that follow we summarize each of the program elements.

## Planning

As with all IT initiatives the deployment of the NCEdCloud will require careful planning. The planning team will comprise a group of infrastructure experts led by the Manager of Connectivity Services at the NC Department of Public Instruction and supported by the MCNC Client Network Engineering Group. The planning team will be tasked with developing an implementation and operating plan for the NCEdCloud. The planning process will include an onsite assessment of infrastructure and infrastructure support resources at each of the 115 NC LEAs. Project planning will begin immediately upon funding of the proposal and will require 6-9 months to complete. The estimated cost of the planning is \$1.65M.

## Cloud Deployment

Upon completion of the planning process, the planning team will present the community-vetted implementation and operating plan to the NC State Board of Education for review and approval. Upon approval of the plan DPI will establish deployment support contracts with MCNC and other state partners as specified in the plan. MCNC is the logical NCEdCloud administrator given that the not-for-profit has served as the de facto education service provider in NC for over two decades. MCNC operates the NC Research and Education Network (NCREN) that connects all NC LEAs in a high-speed statewide education backbone that includes universities and tier one network service providers. The initial execution elements will be related to building a relationship with one or more commercial cloud providers. The cloud deployment phase will likely require a competitive procurement process and as such the development of a request for proposal. The data collected during the LEA infrastructure assessment will serve as the basis for the scope of the cloud RFP in terms of types and numbers of server instances. MCNC will work with the selected cloud provider(s) to roll out combination of reserved (persistent) and ondemand server instances and storage resources to meet the aggregate needs of the NC K-12 education enterprise. As part of the rollout process MCNC will manage the development of any middleware required to integrate the cloud with LEA directory, authorization, and authentication systems<sup>2</sup>. We estimate that the cloud deployment phase will require 6 months and on the order of \$7.5M. Costs include deployment administration by MCNC, middleware development, and one-time costs for initial server instantiation.

## **Pilot Migrations**

In parallel with cloud deployment and based on the implementation plan DPI will orchestrate a group of carefully selected pilot migrations of LEA and DPI infrastructure to the NCEdCloud.

Section A: Appendix 6

<sup>&</sup>lt;sup>1</sup> How do we address the 100 Charter Schools?

<sup>&</sup>lt;sup>2</sup> MCNC has done some initial work on federated identity management that will prove useful here.

The pilots will include representative hardware platform types, persistent and on-demand resource allocations, and services that extend across LEA boundaries. The primary goal of the pilots is to validate planning assumptions and to fine-tune migration and steady-state support processes. We estimate that pilot migrations will require 3 months and \$1M. Costs include DPI pilot administration, MCNC cloud administration, and one-time cloud provider migration fees.

## **Statewide Migration**

With lessons learned from the pilot migrations, DPI will manage a 30-36 month statewide migration of LEA server and storage infrastructure to the NCEdCloud. MCNC, as the NCEdCloud administrator, will facilitate directory integration and network provisioning to support the unique requirements of each infrastructure and service migration. In some cases shared applications will be migrated to the cloud and users will be transitioned to the cloud service together. In other cases individual resources will be turned up, tested, and transitioned on an LEA-by-LEA basis. During the migration project it is also likely that new data systems supporting innovation in instruction and leadership will be designed from the beginning as cloud services. Existing LEA infrastructure arrangements, licensing agreements, and federal e-rate guidelines, may impact the migration timeline and schedule. We estimate that the 30-36 month statewide migration will cost \$6M. Direct costs include DPI project management, MCNC cloud administration, and cloud provider one-time migration fees.

## Measurement and Monitoring

A significant benefit of procuring infrastructure-as-a-service is that the provider will be held to account through a service level agreement (SLA) that specifies commitments related to service availability, performance, and support responsiveness. The NC Education Cloud will be instrumented for measurement and monitoring in order to manage to the SLA. Data collected through this instrumentation will also be used to scale resource allocations for both new and existing services. Finally, the NCEdCloud will also collect data related to user access. User access data can inform assessment systems developed in support of core RttT proposals. MCNC will coordinate instrumentation of the NCEdCloud with the cloud service provider during cloud deployment and service migration, as appropriate. Instrumentation costs are included in deployment and migration project budgets.

## Cloud Administration

DPI will manage a contract with MCNC as the cloud administrator. DPI and MCNC will review the details of the NCEdCloud service with the NC K-12 community at least annually to optimize offerings, support opportunities for federal e-Rate support, and to add or remove cloud providers. In order to provide for sustainability of the NCEdCloud moving forward DPI will expand the existing Client Network Engineering support contract with MCNC by \$500,000 per year to cover LEA engineering support and will expand the existing NC Research and Education Network contract with MCNC by \$1.5M annually to cover cloud operations. MCNC may expand the NCEdCloud offering to the broader K-20 public education community in NC. While it is beyond the scope of this proposal it is worth noting that such expansion would benefit the K-12 community and MCNC is well positioned to facilitate such an expansion given their role as a network services provider to K-20.

Section A: Appendix 6

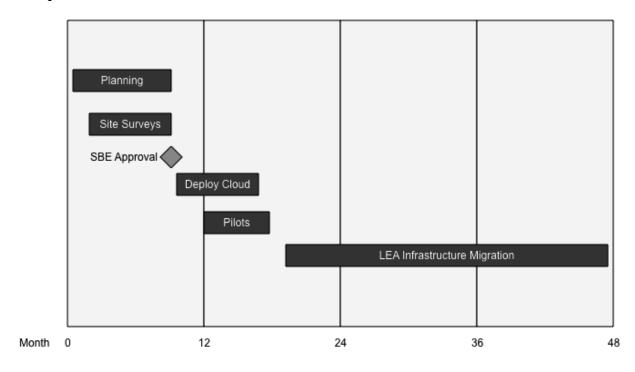

## 5. Implementation Setting

We offer the NCEdCloud as a statewide implementation deployed as a partnership between the Department of Public Instruction, MCNC, and the Local Education Agencies. By its very nature the benefits of a cloud grow with the size of the cloud and as such we will seek opportunities to expand the scope of the NCEdCloud to K-20. We anticipate developing partnerships with industry cloud providers including AT&T, IBM, Amazon, Google, and Microsoft.

## 6. Implementation Plan

See Section 4 above.

## 7. Implementation Timeline

## 8. Funding and Sustainability

We request \$16,500,000 in support of the NC Education Cloud deployment initiative. \$12.8M of the \$16.5M requested (78%) is direct expense encumbered against commercial cloud service provider charges. Ten percent of the funding supports program planning – including site surveys for all public school districts. Beginning in year 2 state of NC appropriated funds support an expansion of MCNC Client Network Engineering support services. Beginning in year 3 LEA's begin to fund NCEdCloud operations with an aggregate \$1.5M annually. Allocation of NCEdCloud costs will be usage-based (not per ADM). LEA fees will be paid to MCNC in lieu of supporting infrastructure locally and will be a fraction (we are targeting half) of the legacy infrastructure support costs. Cost savings realized through the NCEdCloud program can be allocated to the support of new programs specified in this proposal.

#### DRAFT NCEdCloud Pro Forma, 4-Year View

|                                                                                                                  | Year 1         |                |    | Yea                  | ar 2 |             |                 | Yea                               | ır 3 |             | Year 4       |                                   |    |             |

## 9. Research and Evaluation

The NC Education Cloud will be instrumented for measurement and monitoring of reliability, performance, and usage characteristics. Data collected is used to manage service levels, to size resources for new services, and to provide usage data as an input to emerging information systems.

<sup>&</sup>lt;sup>1</sup>Accommodations were not permitted for this assessment.

Note: Standard Errors (SE) are shown in parentheses.

Note: Black includes African American, Hispanic includes Latino, Pacific Islander includes Native Hawaiian, and American Indian includes Alaska Native. Race categories exclude Hispanic origin unless specified. The NAEP Mathematics scale ranges from 0 to 500. Some apparent differences between estimates may not be statistically significant.

Note: Standard Errors (SE) are shown in parentheses.

Note: Black includes African American, Hispanic includes Latino, Pacific Islander includes Native Hawaiian, and American Indian includes Alaska Native. Race categories exclude Hispanic origin unless specified. The NAEP Mathematics scale ranges from 0 to 500. Some apparent differences between estimates may not be statistically significant.

## The Council of Chief State School Officers and The National Governors Association Center for Best Practices

## Common Core Standards Memorandum of Agreement

Purpose. This document commits states to a state-led process that will draw on evidence and lead to development and adoption of a common core of state standards (common core) in English language arts and mathematics for grades K-12. These standards will be aligned with college and work expectations, include rigorous content and skills, and be internationally benchmarked. The intent is that these standards will be aligned to state assessment and classroom practice. The second phase of this initiative will be the development of common assessments aligned to the core standards developed through this process.

Background. Our state education leaders are committed to ensuring all students graduate from high school ready for college, work, and success in the global economy and society. State standards provide a key foundation to drive this reform. Today, however, state standards differ significantly in terms of the incremental content and skills expected of students.

Over the last several years, many individual states have made great strides in developing high-quality standards and assessments. These efforts provide a strong foundation for further action. For example, a majority of states (35) have joined the American Diploma Project (ADP) and have worked individually to align their state standards with college and work expectations. Of the 15 states that have completed this work, studies show significant similarities in core standards across the states. States also have made progress through initiatives to upgrade standards and assessments, for example, the New England Common Assessment Program.

Benefits to States. The time is right for a state-led, nation-wide effort to establish a common core of standards that raises the bar for all students. This initiative presents a significant opportunity to accelerate and drive education reform toward the goal of ensuring that all children graduate from high school roady for college, work, and competing in the global economy and society. With the adoption of this common core, participating states will be able to:

- Articulate to parents, teachers, and the general public expectations for students;
- Align textbooks, digital media, and curricula to the internationally benchmarked standards;
- Ensure professional development to educators is based on identified need and best practices;
- Develop and implement an assessment system to measure student performance against the
- Evaluate policy changes needed to help students and educators meet the common core standards and "end-of-high-school" expectations.

An important tenet of this work will be to increase the rigor and relevance of state standards across all participating states; therefore, no state will see a decrease in the level of student expectations that exist in their current state standards

#### Process and Structure

□ Common Core State-Based Leadership. The Council of Chief State School Officers (CCSSO) and the National Governors Association Center for Best Practices (NGA Center) shall assume responsibility for coordinating the process that will lead to state adoption of a common core of standards (see attached timeline). These organizations represent governors and state commissioners of education who are charged with defining K-12 expectations at the state level.

As such, these organizations will facilitate a state-led process to develop common core standards in English language arts and mathematics that are:

- Fewer, clearer, and higher, to best drive effective policy and practice;
- Aligned with college and work expectations, so that all students are prepared for success upon graduating from high school;
- Inclusive of rigorous content and application of knowledge through high-order skills, so that all students are prepared for the 21st century;
- Internationally benchmarked, so that all students are prepared for succeeding in our global economy and society; and
- Research and evidence-based.
- National Validation Committee. CCSSO and the NGA Center will create an expert validation group that will serve a several purposes, including validating end-of-course expectations, providing leadership for the development of K-12 standards, and certifying state adoption of the common core standards. The group will be comprised of national and international experts on standards. Participating states will have the opportunity to nominate individuals to the group. The national validation committee shall provide an independent review of the common core standards. The national validation committee will review the common core as it is developed and offer comments, suggestions, and validation of the process and products developed by the standards development group. The group will use evidence as the driving factor in validating the common core standards.
- Develop End-of-High-School Expectations. CCSSO and the NGA Center will convene Achieve, ACT and the College Board in an open, inclusive, and efficient process to develop a set of end-of-high-school expectations in English language arts and mathematics based on evidence. We will ask all participating states to review and provide input on these expectations. This work will be completed by July 2009.
- □ Develop K-12 Standards in English Language Arts and Math. CCSSO and the NGA Center will convene Achieve, ACT, and the College Board in an open, inclusive, and efficient process to develop K-12 standards that are grounded in empirical research and draw on best practices in standards development. We will ask participating states to provide input into the drafting of the common core and work as partners in the common core standards development process. This work will be completed by December 2009.
- Adoption. The goal of this effort is to develop a true common core of state standards that are internationally benchmarked. Each state adopting the common core standards either directly or by fully aligning its state standards may do so in accordance with current state timelines for standards adoption not to exceed three (3) years.
- This effort is voluntary for states, and it is fully intended that states adopting the common core standards may choose to include additional state standards beyond the common core standards. States that choose to align their standards to the common core standards agree to ensure that the common core represents at least 85 percent of the state's standards in English language arts and

Further, the goal is to establish an ongoing development process that can support continuous improvement of this first version of the common core standards based on research and evidencebased learning and can support the development of assessments that are aligned to the common core standards across the states, for accountability and other appropriate purposes.

- National Policy Forum. CCSSO and the NGA Center will convene a National Policy Forum (Forum) comprised of signatory national organizations (e.g., the Alliance for Excellent Education, Business Roundtable, National School Boards Association, Council of Great City Schools, Hunt Institute, National Association of State Boards of Education, National Education Association, and others) to share ideas, gather input, and inform the common core standards initiative. The forum is intended as a place for refining our shared understanding of the scope and elements of a common core; sharing and coordinating the various forms of implementation of a common core; providing a means to develop common messaging between and among participating organizations; and building public will and support.
- Federal Role. The parties support a state-led effort and not a federal effort to develop a common core of state standards; there is, however, an appropriate federal role in supporting this state-led effort. In particular, the federal government can provide key financial support for this effort in developing a common core of state standards and in moving toward common assessments, such as through the Race to the Top Fund authorized in the American Recovery and Reinvestment Act of 2009. Further, the federal government can incentivize this effort through a range of tiered incentives, such as providing states with greater flexibility in the use of existing federal funds, supporting a revised state accountability structure, and offering financial support for states to effectively implement the standards. Additionally, the federal government can provide additional professional development, other related common core standards supports, and a research agenda that can help continually improve the common core standards over time. Finally, the federal government can revise and align existing federal education laws with the lessons learned from states' international benchmarking efforts and from federal research.

Agreement. The undersigned state leaders agree to the process and structure as described above and attest accordingly by our signature(s) below.

|         | Governors      | 0             | Signature | es .   | <del></del>          |   |

## **Key Reading Achievements 4-5**

Grades 4 through 5 are framed by students learning toread like a reporter:

**A.Attending to the specific details and moments within the text.** Students learn to explain how specific words, paragraphs, and larger passages contribute to the meaning of the text. Students at this stage of reading form the habit of supporting their understanding of the text with specific language drawn from the text. Students also should be able to distinguish information drawn from the text from their own beliefs and assumptions. By focusing on the text, students are able to follow both what it says explicitly and to make additional inferences needed to fully understand what they are reading.

**B.** Grasping key relationships as well as the gist of what is said or told. Students should use their comprehension of the specific details of what is described as a firm foundation for making broader evaluations of characters, ideas, and themes. For example, they can determine character traits by looking at how a character acts in different situations. They can combine information provided in several different places in the text to gain an overall view.

**C.** Achieving familiarity with core types of text, including different ways of presenting information and ideas. Students at this level should be reading a wide range of texts in fiction and nonfiction. They learn how to navigate distinct text types such as stories, poems, and screenplays and dramas. When reading informational texts, students demonstrate that they can outline and retain what they have learned. They interpret graphs, charts and maps to enhance their understanding of these materials. Throughout their reading, students should be learning new words and new concepts and gaining a rich general content knowledge that will serve them in the years to come.

#### Core Skills 4-5

#### Students can and do:

#### Read the text closely

- 1. Retell what the text says explicitly.
- 2. Make inferences that the text invites or requires and explain how those inferences fill out the information explicitly stated.
- 3. Support or challenge assertions about what the text means by finding and citing specific language in the text, both in conversations with other readers and in writing.
- 4. Explain or rephrase the meanings of words and phrases as they are used within the text, including connotative and figurative meanings.

#### Grasp the key ideas, characters, and events

- 5. Generate a concise summary of the text that captures the key points.
- 6. Articulate the overarching themes or theses that best express what the key points and details have in common.
- 7. Focus on a specific event in the text, and explain when, where, how, and why it unfolds relative to other events or information described in the text.
- 8. Analyze the traits, motives, and thoughts of characters in fiction and nonfiction based on how they are described, what they say and do, and how they interact.

#### Observe craft and structure

- 9. Identify words and phrases that suggest feelings or appeal to the senses and discuss how they help the reader to picture, feel, imagine, or understand what the author is trying to convey.
- 10. Explore the ways various kinds of texts are shaped differently and present information and stories in different ways.
- 11. Compare and contrast different texts about the same events or topics.

#### Evaluate the evidence

- 12. Outline the information or evidence used to support an explanation or an argument.
- 13. Detect inconsistencies or uncertainties within or across sources and use reasoning or additional information to resolve them.

#### <u>Integrate information from diverse sources</u>

- 14. Interpret data, diagrams, maps, and other visual elements and explain how this information clarifies and contributes to the text.
- 15. Use text features, such as the table of contents, index, headers, page numbers, and key terms to navigate the text and to find information in search.
- 16. Note when the text depends on new vocabulary or other background information and consult relevant sources to enhance understanding.

#### Build and apply knowledge

- 17. Compare what is presented in a text with relevant prior knowledge and beliefs, making explicit what is new or surprising.
- 18. Apply knowledge and concepts gained through reading to build a more coherent understanding of a subject, to inform reading of additional texts, and to solve problems.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 25 of 55

**Section B: Appendix 10** 

## Core Skills Applied to Core Text Types

## **Core Text Type: Narrative Fiction**

#### Grades 4-5

- A. Attending to the events, characters, and setting in particular moments in time. As students learn to pay attention to the text, they learn to focus on specific moments in time as they discuss setting, character, and the events that make up the plot (R-7). Students are able to describe the setting, locating it in time and place, and observe how it changes as the story unfolds (R-7). They observe how characters are portrayed, as well as how what characters say and do contributes to their understanding of them(R-2, R-8). Students make basic inferences to understand the situation that unfolds in the text; for example, students follow pronoun references such as 'he' or 'she' and recognize how authors refer back to individuals they have already described (R-1, R-2). Students can point to specifics in the text to support their understanding of particular moments in the story (R-3).
- **B.** Grasping the who, what, when, where and why of stories. Like a reporter, students follow and describe the who, what, when, where, and why of the action in the stories they read (R-7, R-8). They combine their close observations of the text to achieve broader understandings. They are able to summarize and recount faithfully the significant events of the text in chronological order (R-5, R-7). Students learn to distinguish the traits of key characters as well as recognize similarities (R-8). Students also are able to describe the causes that link events to one another, including how characters respond to the central challenge (R-7, R-8). As the theme is often linked to lessons the characters learn through their experiences, it is crucial that students observe how characters change over the course of the text (R-6, R-8). Students are able to infer a lesson or theme when it is not stated explicitly (R-2, R-6).
- C. Gaining familiarity with the key elements of stories. Students learn to expect that stories describe the progress of characters through events and challenges that have a beginning, middle, and end (R-10). They learn that stories often have a lesson or moral, whether it is explicitly stated or and merely implicit (R-6). Students navigate key text features such as the title and chapters, and explain how a title frames the main ideas or a chapter advances the story (R-10, R-15). When students read several stories about the same characters or similar events, they are be able to describe what they know and have come to expect as well as what information they discover in the new story they read (R-10, R-11, R-17).

#### **Overview of Grades 6-8**

- A. Drawing on a full range of text evidence to observe how the narrative unfolds.
- B. Make Inferences to understand characters, themes, setting and the order of events.
- C. Comparing perspectives within and across texts.

#### Overview of Grades 9 to Completion of the College- and Career-Ready Core

- A. Observing choices made by authors, such as where the story begins and how events unfold over time.
- B. Evaluating complex motives for characters and multiple explanations for events in the text.
- C. Comparing how different authors construct stories to describe their distinct style and focus.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 26 of 55

## **Core Text Type:Poetry**

#### Grades 4-5

- A. Attending to syllables and noting rhymes and other repetitions that supply rhythm and pattern. Students are able to read poems out loud counting the syllables and recognizing rhymes. They are able to focus their attention on repetitive elements of poetry, such as rhymes or repeated sounds and beats that are at the heart of many poems (R-10). As in drama, reading poems out loud simultaneously tests comprehension as well as speaking and listening skills. Students should explore similarities to other rhythmic activities, such as music as well as learn to savor the sounds or patterns of words (R-9, R-17).
- B. *Grasping the overall subject and development of the poem.* Reading poetry often requires students to visualize the description or situation the poem is describing (R-9). Despite differences in the format of poems, students demonstrate their capacity to summarize and paraphrase key points and to articulate the main ideas or themes (R-5, R-6). They are able to follow the events that unfold in the poem (R-7). Students identify where and when they are uncertain about the meaning of the poem and can reason and draw on the rest of the poem to figure it out (R-12). Students practice both persistence and patience when they at first do not understand words or phrases or the structure of a line.
- C. Achieving familiarity with reading poetry by attending to line breaks and other text features. Students learn to recognize poems as a type of text (R-10). They see how line breaks organize the poem and reveal its contents (R-7). Students begin to internalize the concept of imagery at the core of figurative language and articulate how specific words affect their senses or express emotions (R-9). They observe how similar words can have different connotations (R-4). By comparing poems and other kinds of writing on similar subjects, they can see more clearly how poems often express ideas through powerful images and sensory details (R-10, R-11).

#### **Overview of Grades 6-8**

- A. Attending carefully to the specific observations and interpretations the poet makes.
- B. Grasping the focus of the poem and the action achieved by what happens in the poem.
- C. Analyzing the comparisons and images poets make.

#### Overview of grades 9 to Completion of the College- and Career-Ready Core

- **A.** Sharpening observation by exploring the author's choices of words and images.
- **B.** Evaluating multiple meaning and interpretations when analyzing poems.
- **C.** Making comparisons that illuminate what is distinctive or fresh in a poem.

### **Core Text Type: Drama**

#### Grades 4-5

- A. Attending to the details by acting out specific moments or events in the script or play. Drama requires students to make the words on the page come alive through visualizing the action by reading it out loud and listening to the words (R-9). By translating what they see on the page into the action on the stage, students can demonstrate their understanding of the text by acting it out and showing their ability to take direction from the text (R-10, R-18). Rather than slip into a monotone, students demonstrate their comprehension by changing their voices as different characters are speaking when reading drama and narrative fiction (R-18).
- B. *Grasping fundamentals of the situation from the text: who is speaking and what is happening.* Students' ability to follow the core questions of who, what, where, when, and why remain essential, but the context changes as students become familiar with the structure of dramatic texts (R-7, R-10). Grasping the situation in the play requires making inferences from the script and interpreting context based on textual details (R-2). By reading with emotion and faithfulness to the text further students demonstrate their understanding of characters' thoughts and feelings as well as the overall situation the text describes (R-8). They are able to adjust their dramatic reading of texts to reflect different aspects of the situation, such as suspense, horror, and surprise (R-9).
- C. Achieving familiarity with reading a script, which has its own text structure and cues. When reading drama, students need to navigate a script, which has its own text structure, cues, and features (R-10, R-15). Students become accustomed to how a script presents what characters say and do (R-8). Drama also offers an early opportunity for students to link what they learn through visual media to their reading (R-14). When watching a video of a production, students are able to follow the action by reading along with the play. They note what about the film surprised them based on their prior knowledge of the text and how the director interpreted stage directions and the like (R-17, R-18). They also compare how actors or other readers recite a passage or speech to their own reading out loud (R-11).

#### Overview of Grades 6-8

- A. Drawing on a range of evidence to understand tone, motivation, and theme.
- B. Making inferences to understand the progress of events and interactions between characters.
- C. Comparing reading the script to visualizing the characters and the action in performance.

#### Overview of Grades 9 - Completion of College- and Career-Ready Core

- A. Attending to the tools the playwright uses such as soliloguy.
- B. Evaluating the wide range of issues left open to the actors' and director's interpretation.
- C. Comparing the perspective of the audience to that of the different characters.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 28 of 55

## **Core Text Type: Literary Nonfiction**

#### Grades 4-5

- A. Attending to the details of the information and gaining specific knowledge. Students focus on to the details of what is described or explained and demonstrate their comprehension of those particulars (R-1). Students themselves describe what they learn when encountering something new and how this compares to their prior knowledge, although students are careful not to assume what is in a text is the same as what they have previously learned about a subject (R-16, R-17). They remain alert to new ideas and information presented in the text, noting when new words occur or when they need to consult other sources to understand what is in the text (R-16, R-17). Students apply what they learn from reading literary non-fiction to reading fiction, such as reading about a place and then reading a story set with the same setting (R-11, R-17). Students link the knowledge they gain through reading to what they read next (R-18).
- B. *Grasping the central and supporting ideas of a text.* Studentsdemonstrate their capacity to learn from what they read and to share what they have learned. As in narrative fiction, students cite specific language in the text to demonstrate they understand and can describe the who, what, where and when, why, and how regarding what has happened or what is described, such as chronology or point of view (R-1, R-3, R-7). They are able to outline the major points in an explanation or argument, distinguish which points are most important, and summarize them (R-5, R-6). Students are able to describe the significant details that the author focuses on as well as identify the main ideas that best capture what the key points and details have in common (R-6). They are able to follow an argument or explanation by paying attention to transitional language and logical connectors (R-12).
- C. Achieving familiarity with gathering information from maps, graphs, and other sources. Students read maps and graphs and integrate the information they gain from them with what they are reading (R-14). They consult graphic features within texts (e.g., titles, captions) and also draw upon maps and graphs from other sources and compare them with what they read. (R-14, R-15) Students also compare and contrast accounts of similar subjects by different authors and describe how they are similar or different (R-11). They combine what they learn from different sources about similar topics and identify where a text is inconsistent or uncertain or when they need to consult additional sources to understand more (R-11, R-13).

#### **Overview of Grades 6-8**

- A. Attending to the details and specific concepts to build knowledge.
- B. Making inferences to outline and evaluate the evidence, reasoning, and the argument.
- C. Comparing what is learned from diverse sources of information, including media sources.

#### Overview of Grades 9 to Completion of the College- and Career-Ready Core

- A. Attending to an author's style and rhetoric in the presentation of information and argument.
- B. Evaluating rigorously the sufficiency and relevance of evidence and reasoning.
- C. Making comparisons that illuminate the distinctiveness of an author's argument and style.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 29 of 55

## **Standards for Writing**

## **Key Writing Achievements 4-5**

- **A. Fully developing observations of a specific text, experience, or lab.** Students show a particular perspective on a text, experience, or lab by sustaining attention on one moment at a time and accumulating details that help the reader see exactly what the writer sees. Unlike in earlier grades, during which students may simply indicate randomly what they notice, students in grades 4–5 choose details that relate to a particular focus. Students also show growth in their ability to develop fully more than one paragraph, adding those details that establish a distinct focus for each paragraph; the paragraphs in turn contribute to establishing a focus for the entire piece.
- **B. Building a perspective with support while making clear distinctions for the reader.** Whether relating details from the physical world or from text, students carefully describe the evidence so as to make it concrete for the reader. They quote accurately. When presenting evidence, students in grades 4–5 will heavily call upon their skills in grammar, usage, and mechanics. They use sentence punctuation to separate ideas; quotation marks to separate one author's or one character's voice from another; and paragraphs to separate one fully described moment from another.
- **C. Communicating purpose and perspective explicitly to the reader.** Students understand that their readers have concerns, interests, and knowledge that are sometimes very different from their own, and they work to bridge the gap between reader and writer with structural elements. In particular, they purposefully lay out their priorities in a simple "lead" at the beginning of a piece that captures the reader's attention and turns it to the main subject. Students also use transitions between sentences and paragraphs to show simple sequencing or relationships of cause and effect.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 30 of 55

#### Core Skills 4-5

#### Students can and do:

#### Create coherent text: Topic, focus, and organization

- 1. Introduce a topic or a situation, and attempt to capture the reader's interest.
- 2. Develop a focus with purposefully chosen observations.
- 3. Use an organizational structure and transitions to focus reader attention in a particular way in each paragraph and in the piece of writing as a whole.
- 4. Explicitly tell the reader the relationship among ideas or events.
- 5. Provide an effective concluding sentence or section.

#### <u>Develop text: Evidence, details, examples, and illustrations</u>

- 6. Provide concrete support for explanations and opinions.
- 7. Use appropriate details related to a particular focus.
- 8. Exclude extraneous details and clear inconsistencies.

#### Make effective choices about language

- 9. Use language to make clear distinctions for a reader.
- 10. Choose words and phrases to express ideas precisely, with a particular focus on strong verbs.
- 11. Expand, combine, and reduce sentences for meaning, reader interest, and style.
- 12. Demonstrate command of the conventions of standard written English, including grammar, usage, and mechanics, paying particular attention to those conventions that help clarify the distinctions between ideas.
  - Basic paragraphing and paragraph indentations
  - Sentence boundaries (fragments, run-ons and rambling sentences, and comma splices)
  - Words in a series
  - Possessive nouns and pronouns
  - Quotation marks for direct speech and for quotations from a text
  - See the Language Table 4-5 for more details.

#### Integrate information from diverse sources

- 13. Gather the information needed to support an opinion, provide an explanation, or address a research question.
- 14. Represent and cite accurately the data, conclusions, and opinions of others, effectively incorporating them into one's own work while avoiding plagiarism.

#### Use tools and resources: Revision and technology

- 15. Compare what is presented in a text with relevant prior knowledge an Assess the quality of one's own writing, and, when necessary, strengthen it through revision.
- 16. Use technology as a tool to produce, edit, and distribute writing.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 31 of 55

## **Core Skills Applied to Core Text Types:**

## **Core Text Type: Narrative**

- Orient the reader, setting the time, identifying the place, introducing the characters and/or the narrator, or engage the reader by beginning in the middle of the action sequence and backfilling information.
- Create causally linked narratives made up of events that contain an initiating event that establishes a problem or conflict and a sequence of events that leads to a final event or outcome.
- Use a variety of temporal words, phrases, and clauses, including adverbial leads, to control
  narrative sequence, locate events in time, shift from one time frame to another, and show the
  relationships among events.
- Include sensory details and concrete language to develop plot and character.
- Exclude extraneous details and inconsistencies.
- Develop complex characters, showing their internal motivation.
- Use a range of appropriate strategies, such as dialogue, tension, or suspense.
- Provide closure through a surprise ending, a telling sentence, a reflection, or use a circle story format.

## **Core Text Type: Informative/Explanatory**

- Establish a context and an authoritative stance, and/or use other ways to develop reader interest (e.g., "Did you know that dinosaurs had thousands of teeth?").
- Purposefully select and organize information to support a controlling idea or perspective on the subject.
- Use a variety of organizational strategies (paragraphs, headings, figures, tables, diagrams, and phrases and clauses) to signal groupings.
- Use substitute words and pronouns to avoid repetition and to link ideas.
- Use adequate facts, concrete details, quotations, or other information and relevant examples to convey ideas, insights, or opinions.
- Employ specialized vocabulary and a formal, objective style when appropriate.
- Exclude extraneous and inappropriate information.
- Use a wide repertoire of strategies for informational writing, and demonstrate flexibility in their use
- Provide a conclusion.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 32 of 55

## **Core Text Type: Argumentative**

- Write an introduction that introduces a claim about an issue or topic.
- Create an organizing structure for sequencing claims, reasons, and evidence.
- Use words, phrases, and clauses to link and organize claims and well-developed evidence. Use sources to provide specific details and evidence to support claims.
- Refer to the text(s) when writing about literature.
- Adopt a relatively formal style.
- Provide a concluding statement or section that offers reflections, restatement, or recommendations.

## Standards for Speaking and Listening

## **Key Speaking and Listening Achievements 4-5**

**A.Achieving familiarity with ways to present information and ideas.** At this level students learn to speak clearly and accurately in a wide variety of situations: whole class discussion, small group work, and one on one conversations. Students are able to participate in inquiry based discussions, make relevant observations, and share information and narratives in a manner appropriate to the subject they are discussing.

**B.Attending to the specific details of what is being said.**Students learnhow to attend carefully to what others are saying so they can grasp themain points of conversations and use what they hear to build on one another's ideas. Attention is paid to details that support the point of the conversation and extend and deepen the discussion.

Page 59

Section B: Appendix 10

#### Core Skills 4-5

#### Students can and do:

#### Express ideas and information to others

- 1. Express ideas and support them with accurate and sufficient facts and concrete details.
- 2. Use language in precise and creative ways to read out loud as well as share one's own stories.
- 3. Demonstrate gradual command of standard English and understanding which situations require that it be spoken.

#### Gain a secure understanding of ideas under discussion

- 4. Re-tell or paraphrase information by accurately identifying key points made by a speaker.
- 5. Pose questions or make comments to test understanding of concepts or follow up on ideas presented.
- 6. Extract information from graphic representations (e.g., charts, maps, diagrams, illustrations, tables, timelines) presented in conjunction with oral communications

# Core Skills Applied to Various Communications Core Communication Type: Recitation and Reading Aloud

#### Grades 4-5

A. Reciting or performing readings with appropriate emotion and faithfulness to the text. By listening to how others speak and practicing themselves, students learn to play with words and experience the pleasure of language and its sounds (S&L2). They can use the words of others to explore and convey situations, characters, and emotions (S&L2). By recognizing and visualizing the images within the poems or dramatic dialogues they are reading or reciting, they begin to understand how writers and speakers use language in imaginative and creative ways; in turn they start to use words and phrases of their own making to convey unique meaning (S&L2). In their recitation, students respond to patterns in the language they hear spoken, such as alliteration, rhyme, and word play.

#### Overview of Grades 6-8

A. Reciting or performing readings varying intonation and phrasing to emphasize key ideas and communicate meaning.

#### Overview of Grades 9 to Completion of the College- and Career-Ready Core

A. Reflecting on syntax and diction for cues regarding emphasis and rhythm when reciting or performing readings.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 36 of 55

## **Core Communication Type: Classroom Discourse**

#### Grades 4-5

- A. Retelling stories or experiences (real or imagined) in sequence. Storytelling is at the core of the school experience for many students at this age, and becoming storytellers themselves is the next logical step in their steady progression towards mastering the art of narrative speaking. Students are able to articulate who, what, where, when, how and why and other specific facts and concrete details when sharing stories and other information (S&L1, S&L2). At the same time students can identify key ideas in others' presentations and share their thoughts or paraphrase the answers of others (S&L4).
- B. Understanding information and stories and responding appropriately. Through listening carefully to speakers, students extract information or understand stories by paying close attention to graphical or multimedia data where aural, written and visual images concur (S&L6). Students can formulate questions to clarify their understanding or share observations to help others better comprehend the ideas that have been presented (S&L5). They are able to sustain concentration and focus when listening, and recall specific points and concrete details that interest them (S&L4).
- C. Working in small groups and as a class, joining in discussions productively. Students take part in structured academic discussions about what they have read, heard, or written. During those discussions, they learn in which situations they must use their growing command of standard English, and do so accordingly (S&L3). They carefully listen to and can articulate what they learn from what others say. By incorporating other people's ideas in their students indicate that they are processing what is said and can share their ideas in ways that advance and deepen the conversation (S&L4, S&L5).

#### **Overview of Grades 6-8**

- A. Expressing ideas, describe events and experiences
- B. Understanding multiple, layered ideas and respond appropriately.
- C. Applying knowledge and concepts gained through discussion and other research to develop ideas, solve problems, and advance the academic purpose of a team.

#### Overview of Grades 9 to Completion of the College- and Career-Ready Core

- A. Speaking with confidence in a wide variety of contexts, including narrating, explaining, and arguing.
- B. Following the line of argument within complex material.
- C. Developing the ability to hold different interpretations and to evaluate their validity in the light of evolving points of view in group discussions and work.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 37 of 55

# **Appendix: Language Table 4-5**

| Conventions of writing  | Students in grades 4-5 must master the following:                     |
|-------------------------|-----------------------------------------------------------------------|
|                         | Basic paragraphing                                                    |
|                         | Using paragraph indentations                                          |
|                         | Using paragraphs in dialogue                                          |
| Terms                   | Students in grades 4-5 must master the following:                     |
|                         | Paragraph, adjective, adverb, conjunction, preposition, interjection  |
| Grammar and usage       | Students in grades 4-5 must master the following:                     |
| S                       | Placing adjectives and adverbs                                        |
|                         | Using independent clauses and coordinating conjunctions               |
|                         | Forming possessive nouns and pronouns                                 |
|                         | Forming irregular verbs                                               |
|                         | Forming and using simple tenses                                       |
|                         | Forming comparative and superlative adjectives and adverbs            |
|                         | Students in grades 4-5 must further develop the following:            |
|                         | Using items in a series                                               |
|                         | Students in grades 4-5 must be introduced to the following:           |
|                         | Avoiding fragments, run-ons and rambling sentences, and comma splices |
|                         | Maintaining consistency in verb tense                                 |
|                         | Choosing between adjectives and adverbs                               |
|                         | Ensuring agreement between subject and verb and between pronoun       |
|                         | and antecedent                                                        |
|                         | Distinguishing between frequently confused words                      |
|                         | Using idiomatic language                                              |
| Mechanics               | Students in grades 4-5 must master the following:                     |
|                         | Capitalizing the first word in quotations as appropriate              |
|                         | Capitalizing other important words (e.g., section headings)           |
|                         | Using apostrophes for possession                                      |
|                         | Using underlining, quotation marks, or italics for titles             |
|                         | Using quotation marks for direct speech                               |
|                         | Students in grades 4-5 must be introduced to the following:           |
|                         | Spelling commonly misspelled words correctly                          |
|                         | Using a comma after an introductory word, phrase, or clause           |
|                         | Using commas in a series of phrases or clauses                        |
| Precision and concision | Students in grades 4-5 must be introduced to the following:           |
|                         | Using specialized, topic-specific language                            |
| Style                   | Students in grades 4-5 must further develop the following:            |
|                         | Punctuating for meaning and effect                                    |
|                         | Choosing words for effect                                             |
|                         | Students in grades 4-5 must be introduced to the following:           |
|                         | Using figurative language                                             |
|                         | Expanding, combining, and reducing sentences for meaning, reader      |
|                         | interest, and style                                                   |

## Grades 6-8

# **Standards for Reading**

## **Complexity of Text Expected at Each Grade Level**

The growing complexity of text necessary for college and career readiness

College Level Texts

#### **Note on Text Complexity:**

The Text Complexity chart provides a graphical overview of the complexity of text that students in each grade from 4 through completion of the core must be able to handle independently to be on course for college and career readiness. (A final band on the chart applies to those students who complete the core prior to finishing high school.) While this chart offers a conceptual picture of the progression of text complexity, additional work needs to be done to define text complexity in practical terms. Given the increasingly recognized relationship between being able to read complex texts and being college and career ready, our tools for assessing text complexity must improve further if all students are to meet the challenge of being ready for postsecondary education and workforce training. To that end, participants in the K-12 ELA backmapping project are working to evaluate current readability measures and determine what more needs to be done to improve upon them. Two aspects of that work are trying to assess and enhance the precision of existing tools and making text complexity a manageable concept for students, teachers, parents, and curriculum developers.

Common Core Standards, Working Draft Page 40 of 55

<sup>\*</sup>See Appendix x for other texts illustrative of 6-8 reading complexity.

<sup>\*\*</sup>Starred texts represent seminal historical texts that all students are expected to read.

## **Key Reading Achievements 6-8**

Grades 6 through 8 are framed by students learning *toread like a detective*:

- **A. Drawing on the full range of text evidence and specific details.** As texts selected for study become longer and more complex, students must develop habits of persistence and stamina to continue reading until they grasp the particulars of the text and an overarching understanding of the material. Students learn to draw on more extensive and more detailed evidence from the text when reading, often combining several different moments in the text to support their understanding. When providing textual evidence to back up their claims, they are required to students probe deeply into the intricacies of the text to demonstrate comprehension.
- **B. Deepening the depth and complexity of the inferences made based on close observation of the text.** Students build on concrete observations drawn from the text to make broader inferences concerning its themes, the author's attitude toward his subject, or the implications of an argument or explanation. They are able to draw conclusions from particulars to understand larger concepts such as the motivations of characters and the import of the sequence of actions and events. Students learn to evaluate how the evidence provided either does or does not support the argument or explanation, and they learn that their generalizations must be based on close observation of the text.
- **C. Making wider and more precise comparisons within and across texts.** When providing evidence to support their conclusions, students learn to draw on not just isolated sections of the text but a wide range of relevant and specific details that span the entire text. They focus on tracing how arguments, themes, and characters develop over the course of a text, noting how their understanding deepens and changes as the text unfolds. Having paid close attention to the text they are reading, students are able to make comparisons to other texts to articulate what they have learned from the texts they have read and what patterns they have observed across texts. They are able to identify commonalities as well as differences when discussing two or more texts.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 41 of 55

#### Core Skills 6-8

#### Students can and do:

#### Read the text closely

- 1. Determine what the text says explicitly and what can be inferred logically from evidence within the text.
- 2. Support or challenge assertions about what the text means by citing text evidence explicitly and accurately, both in conversations with other readers and in writing.
- 3. Interpret the meanings of words and phrases as they are used in the text, including connotative and figurative meanings.

#### Grasp the key ideas, characters, and events

- 4. Discern the most important ideas, events, or information and summarize them accurately and concisely.
- 5. Articulate the overarching themes or theses that best express what the key points and details have in common.
- 6. Analyze when, where, and why specific events unfold in the text, and explain how they relate to one another.
- 7. Analyze how the traits, motives, and thoughts of characters emerge in fiction and nonfiction based on how they are described, what they say and do, and how they interact.

#### Observe craft and structure

- 8. Analyze how specific word choices shape the meaning and tone of the text.
- 9. Analyze how specific details, passages, and larger portions of the text contribute to the meaning of the text.
- 10. Explainhow the text is organized to convey a narrative, make an argument, or provide an explanation.
- 11. Analyze how two or more texts with different styles or points of view address similar themes or topics.

#### Evaluate the evidence

- 12. Follow the reasoning that supports an argument or explanation, including assessing whether the evidence provided is relevant and sufficient.
- 13. Recognize where the text leaves issues uncertain or ambiguous and describe the possible interpretations.
- 14. Evaluate the origin, consistency, credibility, and accuracy of print and online sources.

#### <u>Integrate information from diverse sources</u>

- 15. Interpret data, diagrams, maps, and other visual elements and explain how this information clarifies and contributes to the text.
- 16. Note when the text depends on new vocabulary or other background information and consult relevant sources to enhance understanding.

#### Build and apply knowledge

- 17. Compare what is presented in a text with relevant prior knowledge and beliefs, making explicit what is new or surprising.
- 18. Apply knowledge and concepts gained through reading to build a more coherent understanding of a subject, to inform reading of additional texts, and to solve problems.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 42 of 55

# **Core Skills Applied to Core Text Types**

# **Core Text Type: Narrative Fiction**

### **Overview of Grades 4-5**

- A. Attending to the events, characters, and setting in particular moments in time.
- B. Grasping the who, what, when, where, why and how of stories.
- C. Gaining familiarity with the key elements of stories.

### Grades 6-8

- A. Drawing on a full range of text evidence to observe how the narrative unfolds. Students at this level pay a heightened level of attention to the specifics of the stories they read. Students do not skip over details or lapse into general description, but describe exactly what occurs or is described (R-1). When visualizing the precise time and place of events, they learn to pay attention to specific sensory details as well as to other relevant particulars (e.g., dialects or word choices of characters) (R-1, R-8, R-9). Students grasp the plot by constructing a mental chronology of events regardless of what order the author chooses to arrange them (R-6, R-10). In order to build a precise, accurate picture of events and characters, students integrate the evidence they have found and make observations based on a more complete accumulation of details (R-6, R-7).
- B. Making inferences to understand characters, themes, settings, and the order of events. To gain insight into characters, students rely on explicit descriptions provided by the author but also on conclusions they can draw logically from what characters say and do as well as how they interact (R-1, R-7). Students are able to discern the mood evoked by the setting, and they recognize that time and place can be established immediately and directly or revealed gradually and indirectly (R-1, R-8). Students demonstrate that they understand characters from implicit evidence such as how other characters react to them or respond differently to similar situations (R-1, R-7). Likewise, students are able to draw reasonable inferences about such matters as the theme of the text, which is often not stated explicitly but emerges from as the interaction between character and plot (R-1, R-5).
- C. Comparing perspectives within and across texts. Students demonstrate they understand the point of view from which a story is told and how the perspective of the narrator influences what is revealed to the reader (R-10). They can compare the divergent perspectives of different characters on the same events. Students are able to identify when an author changes the point of view, and can point to evidence like imagery and word choice to describe the tone (R-8). They also compare different texts with similar topics or themes to explore differences in how events, characters, and ideas are portrayed (R-11).

### Overview of Grades 9 to Completion of the College- and Career-Ready Core

- A. Observing choices made by authors, such as where the story begins and how events unfold over time.
- B. Evaluating complex motives for characters and multiple explanations for events in the text.
- C. Comparing how different authors construct stories to describe their distinct style and focus.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 43 of 55

# Core Text Type: Poetry

# Overview of grades 4-5

- A. Attending to syllables and noting rhymes and other repetitions that supply rhythm and pattern.
- B. Grasping the overall subject and development of the poem.
- C. Achieving familiarity with reading poetry, attending to line breaks and other text features.

#### Grades 6-8

- A. Attending carefully to the specific observations and interpretations the poet makes

  Students follow the details of what the poet notices and observes (R-1). They describe what kind of details the poet chooses to emphasize and what those details have in common (R-5). Students likewise note when the poet provides an explanation or interpretation of events or things (R-10, R-12, R-13). Students examine how the poem builds a tone and stance towards what is being described, such as critical or celebratory (R-8, R-9, R-10).
- B. *Grasping the focus of the poem and the action achieved by what happens in the poem*. Students identify and explore what the poet is thinking and trying to achieve in the poem (R-2, R-4). They build on their sense of the details to articulate the purpose and overarching ideas expressed by the poem (R-2, R-5). Students explore the purpose particular poems can serve, such as providing a warning, a celebration, an argument, or a confession (R-11). Students also trace what has changed over the course of the poem, by discussing how the poem unfolds a narrative or idea (R6). They describe how the lines and stanzas of the poem advance the action and development (R-9, R-10).
- C. Analyzing the comparisons and images of poems. Poems are dense with verbal images, and it is important that students are able to understand and describe them (R-8). Students observe how poets use metaphor and similes as well as other kinds of figurative language, and are able to articulate precisely what is being compared and how the comparison is drawn (R-3). Students extend their understanding of the use of figurative language and comparisons beyond poetry to other types of fiction, as well as texts from science and history (R-3).

# Overview of grades 9 to Completion of the College- and Career-Ready Core

- A. Sharpening observation by exploring the author's choices of words and images.
- B. Evaluating multiple meanings and interpretations when analyzing poems.
- C. Making comparisons that illuminate what is distinctive or fresh in a poem.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 44 of 55

# **Core Text Type: Drama**

#### Overview of Grades 4-5

- A. Attending to the details by acting out specific moments or events in a script or play.
- B. Grasping fundamentals of the situation from the text: who is speaking and what is happening.
- C. Achieving familiarity with reading a script, which has its own structure and cues.

# Grades 6-8

- A. Drawing on a range of evidence to understand tone, motivation, and theme. Dialogue is at the heart of drama, and students must be able to analyze the ways characters reveal themselves by how they speak—what they say and how they choose to say it (R-7). Like poetry, drama requires students to pay close attention to words—in this case, words intended to be spoken out loud (R-3, R-8). Recognizing tone becomes critical as it establishes whether a character is menacing, inquisitive, or delighted (R-7, R-8). In drama, words become actions, and students must be able to understand how conversation propels the action or catalyzes a decision (R-6, R-10).
- **B.** Making inferences to understand the progress of events and interactions between characters. Because characters are revealed by what they say and how they interact with one another, drama requires students to deepen their capacity to make inferences (R-1). Students need to infer how the conversation and action unfold as well as how each statement relates to the plot and builds on what comes before (R-1, R-6). By analyzing the dialogue of the characters, students understand the progress of the action (R-1, R-9, R-10). From their specific observations of successive scenes that unfold, students infer the overarching theme that best captures what the scenes have in common (R-5).
- *C.* Comparing reading the script to visualizing the characters and the action in performance. Students use what they read in dramatic works to envision the characters and the unfolding of the plot (R-6, R-7, R-10). At this level, students are able to cite explicitly the evidence that supports their summary of the important events of the drama (R-4). They are able to point to stage directions that establish where the action of the play occurs (R-9, R-10). They can link their account of how the play unfolds to specific evidence in the text and note where the text leaves matters subject to interpretation (R-6, R-10, R-13). When students see multiple versions of plays acted out on stage or on the screen—preferably in more than one version—they can demonstrate their attentiveness to the choices made by directors and actors, such as the intent conveyed by the movement of actors (R-11, R-13).

### Overview of grades 9 to Completion of the College- and Career-Ready Core

- A. Attending to the tools the playwright uses, such as soliloguy.
- B. Evaluating the wide range of issues left open to the actors' and director's interpretation.
- C. Comparing the perspective of the audience to that of the different characters.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 45 of 55

# **Core Text Type: Literary Nonfiction**

### Overview of Grades 4-5

- A. Attending to the details of the information and gaining specific knowledge.
- B. Grasping the central and supporting ideas of a text.
- C. Achieving familiarity with gathering information from maps, graphs, and other sources.

#### Grades 6-8:

- A. Attending to the details and specific concepts to build knowledge. Students pay attention to the specific claim being made in an explanation or the precise information provided in an account (R-12). They attend to the details of what the author relates and describe what they have learned from reading carefully (R-9). Students are able to identify main ideas that suggest the author's overarching purpose as well as attend to nuances such as voice and tone (R-5, R-8). When faced with challenging questions, students pay attention to precisely what is being asked to ensure their response is relevant and focused (R-2). They distinguish between matters that are merely related to the question and those that are essential to answering the question (R-2, R-4). Students enlist relevant prior knowledge to enhance their understanding of what they read, noting when what they thought they knew is revised or contradicted by information in the text (R-13, R-17).
- B. *Making inferences to outline and evaluate the evidence, reasoning, and argument.*Arguments are at the core of several different genres of literary nonfiction, such as essays, speeches, and journalism. Students can distinguish between fact, opinion, and reasoned judgments presented in those arguments (R-12). They are able to evaluate the claimsan author is making and how each is supported or not by the evidence, including whether the evidence is incomplete or inconclusive (R-1, R-12). Students also can identify how an author might use fallacies or exaggerate or emphasize certain things in order to persuade (R-13). Students focus on how the author organizes the account, explanation, or argument including describing how the specific details of the piece are related to the broader concepts (R-4, R-9, R-10).
- C. Comparing what is learned from diverse sources of information, including media sources. Students extend their ability to synthesize data from diverse formats, including maps, charts, and diagrams as well as electronic media in different forms (R-15). They gather and analyze information from multiple sources, determining when one source confirms, contradicts, or differs from another (R-14). Students readily enlist graphical and organizing features of the text (e.g., headings, captions, and footnotes) to acquire key information efficiently (R-10, R-15). They compare the evidence gained from a range of data sources to evaluate what they know and address questions they might have, including critically assessing what they learn from reading charts and graphs as well as electronic media such as video (R-15, R-17, R-18).

### Overview of Grades 9 to Completion of the College- and Career-Ready Core

- A. Attending to an author's style and rhetoric in the presentation of information and argument.
- B. Evaluating rigorously the sufficiency and relevance of evidence and reasoning.
- C. Making comparisons that illuminate the distinctiveness of an author's argument and style.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 46 of 55

# **Standards for Writing**

# **Key Writing Achievements 6-8**

**A. Sustaining attention on challenging subjects and topics.** Students in grades 6-8 are able to convey ideas and information of consistently greater sophistication and complexity than in grades 4-5. They can maintain focus on a topic or subject, developing a multipage text unified by a clear controlling idea or cohesive point of view. They choose and revise details and other elements in the writing with an eye toward overall purpose and focus. Their use of varied sentence structures and carefully chosen verb tenses reflects and supports the increasingly subtle notions they express in writing.

**B. Drawing on a wide range of evidence in informational and argumentative writing.** The number and breadth of sources students use is consistently higher in grades 6-8 than in grades 4-5. With some guidance, students find and use relevant sources, both print and nonprint, and recognize and exclude those sources that are clearly noncredible or unreliable. They accurately and carefully incorporate facts, data, details, graphics, examples, and quotations that support or illustrate their points. They distinguish between presenting the evidence from offering their own thoughts and opinions. When writing about literature or other texts, they consistently and accurately incorporate textual evidence.

**C.Engaging the reader in deliberate, ongoing ways.** While students in grades 4-5 have a basic awareness of audience and how to reach it, students in grades 6-8 can take more active steps to connect to the reader throughout a piece of writing. To meet reader expectations, students are increasingly able to conform to the norms and conventions of various disciplines, forms, and genres. They seek to draw in the reader early in the text, and they lead the reader through the writing with well-developed paragraphs linked by transitions suitable to conveying ever more complicated relationships among ideas. Students can anticipate common reader needs, likely misconceptions, and general objections to arguments.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 47 of 55

# Core Skills 6-8

### Students can and do:

# Create coherent text: Topic, focus, and organization

- 19. Engage the reader's interest, and provide an introduction that identifies the topic, makes a claim, or establishes a situation.
- 20. Sustain focus on a specific topic or argument through a cohesive point of view or perspective.
- 21. Create an organizing structure that is appropriate for the type of writing, that meets the needs of the reader, and that arranges details, reasons, examples, and/or anecdotes effectively.
- 22. Signal relationships among ideas, events, and other elements of the text.
- 23. Provide an effective concluding sentence or section.

# Develop text: Evidence, details, examples, and illustrations

- 24. Use facts, concrete details, quotations, anecdotes, or other information to communicate ideas and insights, develop plot and character, or support arguments.
- 25. Exclude irrelevant details, events, and information.

# Make effective choices about language

- 26. Choose words and phrases to express ideas precisely and concisely.
- 27. Use varied sentence structures and patterns for meaning, reader interest, and style.
- 28. Develop and maintain a style, mood, and tone appropriate to the task, purpose, and audience.
- 29. Demonstrate command of the conventions of standard written English, including grammar, usage, and mechanics, paying particular attention to those conventions that help relate ideas within and between sentences.
  - **C.** Sentence boundaries (fragments, run-ons and rambling sentences, and comma splices)
  - **D.** Items in a series
  - **E.** Verb tense consistency
  - F. Placement of phrases and clauses
  - **G.** Dependent clauses and subordinating conjunctions
  - **H.** Progressive and perfect verb tenses
  - **I.** Commas or parentheses to set off nonrestrictive elements

See the Language Table 6-8 for more details.

# <u>Integrate information from diverse sources</u>

- 30. Gather the information needed to build an argument, provide an explanation, or address a research question.
- 31. Represent and cite accurately the data, conclusions, and opinions of others, effectively incorporating them into one's own work while avoiding plagiarism.
- 32. Provide basic bibliographic information for sources using a consistent format.

# Use tools and resources: Revision and technology

- 33. Assess the quality of one's own writing, and, when necessary, strengthen it through revision.
- 34. Use technology as a tool to produce, edit, and distribute writing.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 48 of 55

# **Core Skills Applied to Core Text Types**

# Core Text Type: Narrative

- Draw the reader in by establishing a context and creating a point of view.
- Establish the situation, the plot, the setting, and the conflict, and create an organizing structure.
- Create a sequence of causally, explicitly linked events that excludes extraneous events and inconsistencies.
- Include sensory details and concrete language to develop plot and character.
- Exclude extraneous details and inconsistencies.
- Develop complex characters, showing their internal motivation.
- Use a range of appropriate strategies, such as dialogue, tension or suspense, naming (e.g., the Saint Bernard instead of the big dog) and specific narrative action (e.g., movements, gestures, and expressions).
- Use a variety of strategies to provide closure and a realistic outcome of the narrative's events.

# **Core Text Type: Informative/Explanatory**

- Establish a context and an authoritative stance using a variety of ways to develop reader interest.
- Purposefully create an organizing structure to convey a controlling idea or perspective on the subject.
- Use a variety of organizational strategies (paragraphs, headings, figures, tables, diagrams, and phrases and clauses) to signal groupings.
- Use substitute words and pronouns to avoid repetition and to link ideas.
- Use facts, concrete details, quotations, or other information to communicate ideas, insights, or opinions.
- Employ discipline-specific vocabulary and a formal, objective style when appropriate.
- Exclude extraneous and inappropriate information.
- Use a range of appropriate strategies to develop the topic, such as providing facts and details, describing or analyzing the subject, narrating a relevant anecdote, or naming specific places, people, or things.
- Explain benefits or limitations.
- Provide a conclusion.

Standards for English Language Arts Grades K-8 November 13, 2009

Common Core Standards, Working Draft Page 49 of 55

# **Core Text Type: Argumentative**

- Write an introduction that introduces a claim about an issue or topic of general concern, and use a variety of writer strategies to capture the reader's interest.
- Create an organizing structure that is appropriate to the needs, values, and interests of a specified audience, and arrange details, reasons, examples, and anecdotes effectively and persuasively.
- Develop a controlling idea and make clear and knowledgeable claims.
- Support arguments with detailed evidence, citing sources of information as appropriate.
- Quote and paraphrase the text(s) accurately when writing about literature.
- Anticipate reader concerns and counterarguments.
- Use words, phrases, and clauses to signal alternative perspectives (e.g., *on the other hand, however, but, nevertheless, although*).
- Adopt a formal style and tone.
- Include appropriate information in arguments, and exclude information and arguments that are irrelevant.
- Provide a concluding statement or section that offers reflections, a restatement, or recommendations.

Common Core Standards, Working Draft Page 50 of 55

### Grade 4

# **Developing Coherent Understanding**

Fourth grade students learn that the fraction representation of a number is not unique. For example, the symbols 2, 10/5, and 8/4 all refer to the same value or point on a number line. This complication was not present for whole numbers, which have unique representations in base 10. Given a fraction, various fractions equivalent to it can be generated by multiplying or dividing numerator and denominator by the same nonzero whole number.

Students first learn to add and subtract fractions with the same denominator, starting with the case where the sum is less than 1. They understand and can explain (using fraction strips or number lines) that when they add or subtract fractions with the same denominator, they are working with like parts, and the sum or difference is the fraction that tells how many of those parts are in the result. For example, 3 fifths plus 1 fifth is 3+1 fifths and 5 sevenths minus 2 sevenths is 5 – 2 sevenths. In fact, the same reasoning underlies addition and subtraction in the decimal system, where ones are added to ones, tens are added to tens, tenths are added to tenths, and so on. In both cases, students add or subtract like units.

To add and subtract fractions with unlike denominators, students first find equivalent fractions with the same denominator. They see that when fractions have different denominators, such as  $^2/_3$  and  $^3/_4$ , they are not expressed in terms of like parts ( $^2/_3$  is in terms of thirds and  $^3/_4$  is in terms of fourths, but thirds and fourths are not the same size). By reasoning about fraction strips or number lines, students understand that when they give fractions common denominators, they express both fractions in terms of like parts, i.e., in terms of the same unit fractions. Students then understand that once they have changed the fractions to equivalent ones that have the same denominator, they have reduced the problem of determining the sum or difference to the previous case.

Decimals are introduced in grade 4 as a representation of fractions with standard denominators 10, 100, 1000. Decimals extend and complete the base 10 system of place value; each base 10 unit is ten times larger than its neighbor to the right, and each base 10 unit is 1/10 as large as its neighbor to the left. Computation with decimals is delayed until grade 5 to allow time for students to build conceptual connections between fractions and decimals.

Students in grade 4 are also building whole number fluency with multiplication and division facts and computation. Together with a good understanding of fractions, fluency with multiplication and division gives students a secure footing for later grades, when students will learn the sophisticated uses of multiplication and division that we call proportional reasoning.

In geometry, students learn the concept of area. As with any other quantity, areas are measured by comparing them to other areas—in this case, the areas of unit squares. Thus, the area of a figure is measured by the number of unit squares needed to cover it with no gaps or overlaps. Students use this concept to compute areas for rectangles, and for shapes decomposable into rectangles. Students are also building their geometric vocabulary by studying lines, line segments, and angles. Naming these elements enables students to analyze shapes more systematically in terms of their constituent parts.

**Section B: Appendix 11** 

### Understanding & Applying OperationsNe

- A Quantities in context can be added and subtracted only when they refer to the same underlying unit. For example, ½ of a box of cookies and ½ of a cookie do not add up to 1 cookie.
- 1 Solve multiplicative comparison problems with whole numbers (problems involving the notion of "times as much").
- 2 Solve multistep and nonroutinestory problems requiring both addition/subtraction and multiplication/division of whole numbers.
- 3 Solve story problems that involve adding and subtracting fractional quantities.
- 4 Solve story problems that involve comparing and ordering decimal quantities.

### Base 10 Computation Nb

- A decimal number stands for a sum of fractions whose denominators are powers of 10. For example, 0.349 stands for  $\frac{3}{10} + \frac{4}{100} + \frac{9}{1000}$ .
- B Decimal digits in each place are worth ten times as much as digits in the place to the right; comparison of decimal numbers is decided by the leftmost digit, with subsequent digits breaking ties.
- 1 Demonstrate number sense of place value for numbers from 0.001 to 1,000,000.
- 2 Fluently add and subtract multidigit numbers in vertical format using the standard right-to-left algorithms.
- 3 Quickly recall multiplication facts to  $10 \times 10$  and the related division facts.
- 4 Fluently multiply two, three and four digit numbers by single digit whole numbers; fluently multiply two-digit numbers by two-digit whole numbers.
- 5 Divide two and three digit numbers by single digit numbers with remainder; divide four-digit numbers by a multiple of 10 with remainder. 13

### Fractions Nf

- A Two fractions are equal (or "equivalent") when they occupy the same point on a number line—or, what is the same, when they represent the same portion of a whole.
- B Multiplying or dividing the numerator and denominator of a given fraction by the same nonzero whole number yields a fraction that is equivalent to the given one:  $(n\times a)/(n\times b) = a/b$  and  $(a\div n)/(b\div n) = a/b$ .
- c A mixed number stands for the sum of its whole number portion and its fractional portion.
- 1 Rename fractions to equivalent forms and identify equivalent fractions. 14
- 2 Compare and order fractions; place fractions on a number line.
- 3 Add and subtract fractions with like or unlike denominators. 15
- 4 Use decimals to describe quantities ("The bike path is 1.75 miles long"), parts of wholes, and parts of a collection.
- 5 Compare and order decimals; place decimals on a number line.
- 6 Know the decimal equivalents for halves and fourths.

Students should be able to express the result of division as a number sentence; for example,  $720 \div 7 = 102 \text{ r}$  6 can also be stated as  $720 = 7 \times 102 + 6$ .

This includes the following types of equivalence:  $\frac{2}{3} = \frac{4}{6}$ ,  $3 \% = \frac{7}{2}$ ,  $\frac{21}{6} = 3 \%$ .

 $<sup>^{15}</sup>$  Addition and subtraction of mixed numbers is optional at this grade.

### Quantity & Measurement Nd

- A The area of a closed plane figure is a measure of how much space it encloses. 16
- B A square with side length 1 unit is said to enclose "one square unit" of area. The area of a closed plane figure can be measured (expressed numerically) by the number of square units that fit inside it with no gaps or overlaps.
- C Tiling a rectangle with unit squares shows that a rectangle a units long by b units wide encloses an area of  $a \times b$  square units.
- D Area is additive: If a figure is decomposed into several pieces, then the area of the whole figure can be found by adding the areas of the pieces (expressed in common units).
- E An angle is measured by the number of one-degree angles that fit inside it with no gaps or overlaps.
- 1 Measure and compute whole-square-unit areas of real-world and geometric figures decomposable into rectangles.
- 2 Measure angles in whole-number degrees using a protractor; sketch angles of specified measure.

Geometry: Progression to be determined

A [...]

1 [...]

NC Race To The Top Application

<sup>&</sup>lt;sup>16</sup> Intuitively, the area is a measure of how long it would take to "color in" the figure evenly with a crayon; by contrast, intuitively perimeter is a measure of how long it would take to trace around the figure.

### Grade 5

# **Developing Coherent Understanding**

Previously, students have understood fractions as repeated sums of unit fractions. In Grade 5, students learn that fractions can also be interpreted as the *product* of a whole number and a unit fraction:  $a/b = a \times 1/b$ . More generally, students in grade 5 learn that the fraction a/b indicates a division:  $a/b = a \div b$ . In short, fractions are quotients. This realization represents a major milestone in this grade. Understanding fractions as quotients is a crucial element of both proportional reasoning in grade 6 and the algebraic manipulation of fractions in later grades.

Students learn to add and subtract decimals, using exactly the same base 10 reasoning they used for multidigit whole numbers. By working with decimals, fractions and whole numbers in problem solving situations, students begin to learn that it is the relationships between quantities that matter in solving a problem, not how the quantities are represented numerically. This is a step of maturity along the path to algebra, where the relationships between quantities are in the foreground (as equations), and form of the numbers is entirely obscured (by the use of variables).

Even as students are gaining experience with fractions and decimals, they are nearing the end of their primary trajectory in whole number computation by using the standard division algorithm. As with the other base 10 algorithms students learn to use, this one rests on place value and the rules of arithmetic (notably the distributive rule). A complication special to the division algorithm is the need to estimate along the way.

Volume is a milestone in the progression of geometric measurement that began in early grades with length measurement. As with other quantities encountered along the measurement progression, volumes are measured by comparing them to like quantities—in this case, the volumes of unit cubes. Thus, the volume of a solid is measured by the number of unit cubes needed to fill it with no gaps or overlaps. Students use this concept to compute volumes for rectangular prisms.

Coordinates and the coordinate plane are first introduced in this grade. Later, the coordinate plane will become a shared setting for algebra and geometry. The coordinate plane will also support students' study of functions and statistics by illustrating the way in which two related quantities vary together.

# Understanding & Applying OperationsNe

- A Quantities in a problem might be described with whole numbers, fractions or decimals; the operations used to solve the problem depend on the relationships between the quantities, not the form of the number.
- Solve single step, multistep, and nonroutine story problems requiring addition/subtraction of whole numbers, fractions (including mixed numbers), and decimals.<sup>17</sup>
- 2 Solve multistep and nonroutinestory problems requiring both addition/subtraction and multiplication/division of whole numbers.

-

 $<sup>^{17}</sup>$  Problems should not mix fractions with decimals except in simple cases, such as  $2.5 - \frac{1}{4}$ ,  $\frac{3}{10} + 0.4$ , etc.

3 Estimate answers to computations and compute mentally to assess reasonableness of results.

### Base 10 Computation Nb

- A The standard algorithm for division is based on breaking the dividend apart by place value and using the Distributive Rule to find the quotient in pieces by place value.
- B In adding or subtracting decimal numbers, one operates separately with the units of each size, except when regrouping is needed; the scheme for regrouping is the same at each place, because each unit is composed of ten of the smaller unit.
- 1 Fluently multiply multidigit numbers using the standard algorithm.
- 2 Divide two and three digit numbers by two digit numbers, with remainder, using the standard algorithm.
- 3 Demonstrate number sense of place value for numbers from millionths to millions.
- 4 Quickly find 0.1 more than a number and 0.1 less than a number, 0.01 more than a number and less than a number, and 0.001 more than a number and less than a number.
- 5 Add and subtract decimals using standard algorithms and understanding of place value.

#### Fractions Nf

- A Fractions are quotients:  $a \div b = a \times 1/b = a/b$ .
- 1 Add and subtract mixed numbers.
- 2 Solve story problems that involve multiplying fractional quantities by whole numbers and multiplying whole number quantities by fractions. 18
- 3 Solve division/sharing story problems that have fractional answers.

# Geometric Measurement Gc

- A The volume of a solid figure is a measure of how much space it contains. A cube with side length 1 unit is said to contain "one cubic unit" of volume. The volume of a solid figure can be measured (expressed numerically) by the number of cubic units that fit inside it with no gaps or overlaps.
- B Packing a rectangular prism with unit cubes shows that a rectangular prism  $\ell$  units long by w units wide by h units tall contains a volume  $V = \ell \times w \times h$  cubic units. <sup>19</sup> The base of the prism has area  $A = \ell \times w$  square units, so the volume of the prism can also be expressed as  $V = A \times h$  cubic units.
- C Volume is additive: If a solid figure is decomposed into several pieces, then the volume of the whole figure can be found by adding the volumes of the pieces (expressed in common units).
- 1 Measure and compute whole-square-unit volumes for rectangular prisms and for real world objects well described by rectangular prisms.

### Coordinate Geometry Gd

\_

The unit fraction  $^{1}/_{b}$  might represent some quantity of interest, with the whole number a acting to 'scale up' the quantity. ("The cargo train carried 7 trucks, each truck weighing 1/4 of a ton. How many tons of trucks did the cargo train haul altogether?") Alternatively, the whole number a might represents some quantity of interest, with the unit fraction  $^{1}/_{b}$  acting to 'scale down' the quantity. ("There are 12 walls in Vivian's apartment. She painted 1/3 of them. How many walls did Vivian paint?")

<sup>&</sup>lt;sup>19</sup> The dimensions of the prism should be whole numbers in the chosen unit. The same unit should be used for all three dimensions.

- A A pair of perpendicular number lines (or "axes") defines a coordinate system. A given point in the plane has a separate position along each of the two axes; the two positions of the point are called its coordinates.
- 1 Graph points in the coordinate plane, and read off the coordinates of graphed points.<sup>20</sup>
- 2 Determine the lengths of horizontal and vertical segments in the plane, given the coordinates of their endpoints.

NC Race To The Top Application

Exercises should include graphing sets of points that fall along lines and curves, and constructing scatterplots for bivariate data. The units of measure should not always be the same for both coordinate axes. Coordinates may be whole numbers, fractions or decimals.

# FRAMEWORK FOR CHANGE:

# The Next Generation of Assessments and Accountability

# Background

North Carolina is known as a leader in innovations in public education. The state pioneered the use of schoolbased accountability and school assistance in the late 1980s and early 1990s. North Carolina was the first state to administer a teacher working conditions survey for every educator and the first state to partner with the federal Partnership for 21st Century Skills to create a Center for 21st Century Skills focused on revising standards, assessments, and professional development. One out of every four early colleges in the United States now resides in North Carolina, and the state is poised to add over 30 more in the next two years under the state's Learn and Earn initiative. North Carolina has become a leading state in virtual education with both online high school courses and free online college courses for credit offered to any North Carolina high school student.

Today, public education stands at the threshold of major innovations in teaching and learning. As the pace of technological and economic change accelerates, the system of public schooling is being called upon to quicken its response to these changes and ensure our students are well-equipped to find success in 21st century work and life.

Few would challenge that our systems of standards, assessments, and accountability are the most important drivers for accelerating that change and creating fertile ground for major innovations in how we do business in our schools and classrooms. After over a decade of experience with a system of standards and accountability, North Carolina is positioned to once again lead the nation in this arena.

Our system of assessments and accountability has served North Carolina well for over a decade. Achievement in reading and math on state and national tests has risen since school-based accountability began in the state in the mid-1990s. In fact, North Carolina has made more gains in mathematics since the inception of the National Assessment of Educational Progress (NAEP) than any other state.

Today, it is time to build on the solid foundation that has been laid and construct the next generation of assessments and accountability. This next generation of assessments and accountability must build on what we have learned from more than a decade of experience. Teaching and learning today must be aligned with the 21st century skills that students need for success in their educational, work, and life pursuits. The State Board of Education has a deep commitment to school accountability, to high standards, and to success for all students.

# The State Board of Education's 21st Century Mission and Goals & the Blue Ribbon Commission on Testing and Accountability

In September 2006, the State Board of Education adopted a mission that every public school student will graduate from high school, globally competitive for work and postsecondary education, and prepared for life in the 21st century. To support that mission, the Board articulated five goals and a series of strategies'. Included in those strategies were a number that reflected a vision for a next generation system of standards, assessments, and accountability such as:

- Every student excels in rigorous and relevant core curriculum that reflects what students need to know and demonstrate in a global 21st century environment.
- Every student's achievement is measured with an assessment system that informs instruction and evaluates knowledge, skills, performance, and dispositions needed in the 21st century.

- Every teacher and administrator will use a 21st century assessment system to inform instruction and measure 21st century knowledge, skills, performance, and dispositions.
- Every education professional will use data to inform decisions.

In May 2007, the State Board of Education convened a Blue Ribbon Commission on Testing and Accountability to begin the process of assisting the Board in charting a course for realizing these and other goals. The State Board charged the Commission with conducting a comprehensive review of the current assessment and accountability system and offering recommendations for modifications to the current testing program as well as identifying next steps for meaningful change. The State Board asked that the Commission's work be "visionary and in-depth, searching for credible and practical solutions that will serve us well in public education."

The 26-member Commission, chaired by Dr. Sam Houston, was comprised of representatives of education, business and government. Teachers, principals, central office administrators, superintendents, legislators, representatives of higher education, and business/community leaders met regularly over a seven-month period and heard from a large number of stakeholders, including teachers, administrators, parents, and national experts on assessment and accountability.

In January 2008, the Commission presented a report to the State Board that recommended improvements in the current system of testing and accountability and steps toward a next generation of standards, assessments, and accountability for North Carolina's public schools.

The Commission's findings and recommendations have helped to isolate the major next steps needed to transform our approach to standards, assessments, and accountability in North Carolina. The Commission's recommendations for dramatic changes in testing and accountability called for:

- deepening the curriculum and defining more specifically the essential content standards in the core subjects and reflecting 21st century skills in both content standards and aligned assessments;
- moving to a system that includes formative assessments (not just summative assessments or end-of-grade and course tests) which will equip

- teachers and administrators with data and feedback needed to align instruction to individual student's needs;
- revising the K-8 accountability model and transforming the high school accountability model to focus on graduation rates and student readiness for college and work, not just on performance in core subject areas; and
- providing much greater transparency for educators, parents and the public about expectations, assessments, and results.

The State Board of Education believes that critical improvements can be made immediately to the current system that will lead to greater effectiveness, understanding, and transparency for students, educators and the public at large. In addition, the Board is committed to building a next generation of standards, assessments, and accountability to support student learning and quality teaching that reflect the 21st century assessment and accountability systems outlined in the Partnership for 21st Century Skills Milestones for Improving Learning and Education<sup>2</sup> and serve as a model for other states and the nation. This next generation must be characterized by: I) assessments that are learnercentered, diagnostic, performance-based, and that provide evidence of student performance in core subjects and 21st century skills; 2) accountability measures that focus on both student achievement and learning outcomes; and 3) transparency that provides parents, teachers, and other stakeholders with meaningful information about the expectations, assessments, and performance of students.

# Action Steps for Immediate Improvement & Development of the Next Generation of Standards, Assessments, and Accountability

What follows are actions that the State Board of Education is directing the Department of Public Instruction (DPI) to implement. These actions fall into two categories: I) immediate improvements to our current system, and 2) steps to build the next generation of standards, assessments, and accountability.

Progress in implementing the action steps adopted by the Board will be monitored monthly through the Board's Globally Competitive Students (GCS) Committee.

### IMMEDIATE IMPROVEMENTS

The State Board of Education directs DPI to take the following actions to modify and improve assessments and accountability:

- I. Release one form of each test on an annual basis. DPI will release one form of the test for each grade level and subject tested to the school districts and the public to provide transparency on the state's assessment program.

  Effective: 2008-09 school year.
- 2. Enact a moratorium on the content standards revision/test development cycle.

  DPI will suspend the revision cycle of content standards and development of new tests based on the revised standards. As reflected in the next section of this report, DPI is to undertake a comprehensive revision of content standards.

  Effective: immediately.
- 3. Make results from new tests comparable to prior tests. When a test is rescaled to meet higher standards, scale scores and proficiency in both the old standard and the new standard are to be provided for a one-year transition period.

  Effective: 2007-08 school year.
- 4. Move to a five-year graduation rate for Adequate Yearly Progress (AYP) purposes.

  North Carolina will continue to report four-year cohort graduation rates as agreed to in the compact with the National Governors Association. However, if approval is granted by the US Department of Education (USED), for AYP purposes, the high school cohort graduation rate is to be redefined so that it includes students who graduate in five years or less.

  Effective: 2007-08 school year.
- 5. Count retest scores in performance composites. Any student who scores at Achievement Level III on a retest of an end of-grade test (EOG) or end-of-course (EOC) test for grades or courses included in the Student Accountability Standards is to be counted as proficient for the school's ABCs performance composite and Adequate Yearly Progress (AYP) purposes.

  Effective: 2008-09 school year.

- 6. Eliminate the redundancy in EOC (End of Course) and EOG (End of Grade) testing by allowing EOC scores to count as EOG scores in middle grades. Middle school students who score proficient on an EOC test are to be counted proficient on the comparable EOG test without having to take the EOG test (e.g., middle school students taking Algebra I and scoring proficient on the Algebra I EOC are to be counted as proficient on the math EOG).

  Effective: 2008-09 school year.
- 7. Change the current approach to writing assessment. To elevate the importance of writing throughout the curriculum, the current 4th, 7th, and IOth grade writing assessments are to be replaced with a K-12 writing assessment system that includes authentic and on demand writing assignments, appropriate to each grade level and backmapped from the graduation project. The DPI is to provide rubrics, aligned with the writing rubric used for the graduation project, for LEAs to use in assessing these K-I2 writing assignments. Writing samples will be housed and scored locally, and DPI staff will conduct random audits to ensure compliance with on-going writing assessments. The DPI is to provide training and professional development to educators to ensure fidelity to the writing assessment process at each grade level. Effective: Transition in the 2008-09 school year; Full implementation in the 2009-10 school year.
- 8. Replace the current English I EOC with a high school English assessment given in grade 10. The test will be used for ABCs and No Child Left Behind AYP accountability purposes and reflect the communication skills that high school students should have. The assessment is to include performance-based and authentic, real-world tasks. Effective: 2010-11 school year.
- 9. Revamp the current Computer Skills Test to ensure it measures 21st century Information Communication Technology (ICT) literacy.

  The current computer skills test is to be reviewed and revised to ensure it measures 21st century ICT literacy, including understanding of systems of technology. The testing window for students to take the test is to be expanded to allow administration

anytime between the sixth and eighth grades, depending on student readiness. Scores are to be banked for accountability purposes.

Effective: 2008-09 school year.

- 10. Eliminate the misalignment of assessment for the integrated math courses. The DPI is to develop appropriate EOC assessments for integrated math courses. The assessments are to include performance-based and authentic, real-world tasks. Effective: Development is to begin in the 2008-09 school year. The assessments are to be available for use by the 2010-2011 school year.
- II. Shorten the timeframe for reporting results after new tests are administered. The DPI is to explore options for setting "cut" scores in the most timely manner possible and report to the Board on options.

Effective: Report due by October 2008.

# Developing the Next Generation of Standards, Assessments, & Accountability

The State Board of Education directs the DPI to begin immediately the development of a detailed implementation plan for the action steps detailed in this section. The plan is to include timelines, resources needed, and strategies for involving appropriate stakeholders, including the business community, in the development process. In developing the next generation of standards, assessments, and accountability, the DPI is directed to:

- include the participation of teachers, content specialists, and technical experts in the development of the actual assessments;
- provide for the development of briefs/guides for each assessment and release of sample questions before new assessments are administered; and
- provide for the release of at least one form of each assessment on an annual basis.

The comprehensive implementation plan is to be presented to the State Board by October 2008.

 Overhaul the PreK-12 Standard Course of Study (SCOS) to focus on essential standards in order to narrow and deepen the state's curriculum. The DPI is directed to conduct a

- comprehensive review of the PreK-12 content standards. This should include:
- articulation of the skills, understandings, and learning experiences critical at each grade level;
- inclusion of the skills, understandings, and learning experiences necessary to satisfactorily complete the graduation project;
- infusion of writing, 21st century content, thinking and learning skills, and life skills<sup>3</sup> throughout the content standards; and
- reflection of rigor, relevance, and relationships between and among subject areas.

Upon adoption of the essential standards by the Board, the Department is to develop appropriate curriculum support materials and professional development, utilizing appropriate technological tools for delivery.

- 2. Develop a next generation assessment system which includes formative, benchmark and summative assessments based on the new standards. The DPI is directed to develop new and aligned assessments based on the essential standards. This includes appropriate extensions for students with disabilities. The new assessment system must:
  - · be aligned with the graduation project;
  - include performance-based, authentic, real-world tasks; and
  - provide diagnostic information to teachers on individual students.
- 3. Allow LEAs to develop and pilot 21st century assessment models. The DPI is to present a plan for approving assessment pilots that allow LEAs to develop alternative approaches to assessment that are consistent with the Board's 21st century mission and goals.
- 4. Create a comprehensive, customized professional development system to provide teachers and administrators with the skills and understandings needed to use data to inform instructional practice and make formative assessments a daily practice in the classroom. The system is to include professional development on the essential standards, diagnostic and formative assessment, and technical assistance

on using data to inform instruction. The plan for the professional development system is to include an assessment of resources currently available.

- 5. Update the analysis of the technology infrastructure needed to support a 21st century curriculum and assessment system and to move additional testing to appropriate technology formats. This analysis will allow the transition from a paper-based assessment system to one that takes greater advantage of technology.
- 6. Examine the K-8 accountability model with a 21st century focus. This examination should include consideration of whether the model appropriately reflects 21st century skills and understandings and how the model affects school designations and recognition. While additional components may be considered, the focus must remain on student achievement and academic growth.
- 7. Develop a new high school accountability model that includes the high school graduation rate, participation in the high school Future-Ready Core, student performance in core subjects, and other measures of readiness for post-secondary education and skilled work. To more meaningfully and transparently reflect progress toward graduating students who are future-ready and prepared for life in the 2Ist century, the DPI is directed to develop a new accountability model for high schools. An advisory committee with appropriate technical expertise should guide the development of the model. The focus of the new model must remain on student achievement and academic growth.

# The State Board of Education's Commitment to High Standards for Students and Schools

As North Carolina moves to the next generation of assessments and accountability, the State Board of Education's commitment to high standards for students is **unwavering**. The Board recognizes that today's students live in an ever-changing, global economy. Without a doubt, students will enter a workforce and a world that is different than the one

that exists today. It is clear to the State Board of Education that the state's expectations for student learning must increase accordingly.

The Board understands that North Carolina's system of assessments and accountability must support the kind of teaching and learning that prepare students for the future. As the Board and the DPI implement the action steps described in this document, it may also consider and identify additional steps to be implemented in moving to the next generation of assessments and accountability. For example, it may consider ways to provide students, parents, and other stakeholders with more meaningful information about how North Carolina's students perform in comparison to other students globally. In all deliberations, the Board will be guided by its mission. It will seek input from and the involvement of stakeholders, including the business community, which is a critical partner as we develop the next generation of assessments and accountability.

# **International Benchmarking and the Common Core**

The Common Core State Standards (CCSS) are designed to be **college- and career-ready** and **internationally benchmarked**. To that end, the development process included the review and consideration of many sources, including research studies, existing standards from the U.S and abroad, and the professional judgment of teachers, content area experts, and college faculty. This paper will briefly describe how international benchmarking was used to develop the CCSS.

### What documents were used to ensure that the CCSS were internationally benchmarked?

To ensure that the standards prepare students to be globally competitive, the development team used a number of sources, including: the frameworks for PISA and TIMSS; the International Baccalaureate syllabi; the American Institutes for Research report, Informing Grades 1-6 Mathematics Standards Development: What Can Be Learned From High-Performing Hong Kong, Korea, and Singapore and; the A+ Composite found in A Coherent Curriculum: The Case for Mathematics by Bill Schmidt, Richard Houang, and Leland Cogan.

In addition, the development team looked to the standards of a number of individual countries and provinces to inform the content, structure and language of the CCSS. In *mathematics*, twelve set of standards were selected to help guide the writing of the standards: Belgium, Canada [Alberta], China, Chinese Taipei, England, Finland, Hong Kong, India, Ireland, Japan, Korea, and Singapore. In *English language arts*, the writing team looked closely at ten sets of standards from Australia (New South Wales and Victoria), Canada (Alberta, British Columbia, and Ontario), England, Finland, Hong Kong, Ireland, and Singapore. In additional countries and victoria, Ireland, Irelan

### How were the international benchmarks used to inform the development of the CCSS?

The goal of the international benchmarking in the common core state standards development process was to ensure that the CCSS are as rigorous as comparable standards in the high-performing and other countries. However, the use of international benchmarks as evidence is no easy feat; it is not simply a matter of identifying the "best" source and copying it, or of aggregating all viable sources to find some set of shared expectations. Rather, international benchmarks were used to guide critical decisions in the following areas:

- Whether particular content should be included: One of the principal ways international standards were used in this development process was as a guide when making tough decisions about whether content should be included or excluded.
- When content should be introduced and how that content should progress: The progression of topics in the international mathematics standards helped the development team make decisions about when to introduce topics in the CCSS as well as when to stop focusing on them.
- Ensuring focus and coherence: Standards from other countries tend to be very focused, including only what is absolutely necessary.

NC Race To The Top Application

- Organizing and formatting the standards: Certain organizational aspects or characteristics of
  international standards that promoted clarity and ease of reading and use served as a model for
  the CCSS.
- Determining emphasis on particular topics in standards: Where emphasis on particular topics was found repeatedly in international standard, this was instructive in determining their importance for inclusion in the CCSS.

\* \* \* \* \*

When the final version of the K-12 Common Core State Standards is released, it will be accompanied by a discussion of the evidence that was used in their development. In the meantime, the evidence from the September 2009 draft of the College and Career Ready Standards is available: The URL for the ELA document is <a href="http://www.corestandards.org/Files/ELAEvidence.pdf">http://www.corestandards.org/Files/ELAEvidence.pdf</a>, and the URL for the mathematics document is <a href="http://www.corestandards.org/Files/MathEvidence.pdf">http://www.corestandards.org/Files/MathEvidence.pdf</a>.

<sup>i</sup> Eight of these were high-performers on either TIMSS, PISA or both: Belgium, Canada [Alberta], Chinese Taipei, Finland, Hong Kong, Japan, Korea, and Singapore. England and Ireland, which have uneven performances on international assessments, were included because of their cultural links to the United States. China and India were included because of their growing global competitiveness.

**NC** Race To The Top Application

Differences in language have a greater impact on the teaching and learning of language arts than of mathematics, so the teams looked primarily at English-speaking countries. All were high-performers on PISA except Singapore, which did not participate, and England, which as in mathematics was selected partly for its cultural links to the United States.

# Evidence for (B)(1)(ii):

# Description of the legal process within North Carolina for standards adoption.

In North Carolina, the State Board of Education is granted the power to adopt standards by NC General Statute 115C-12 (9c) below. This process will be used (as demonstrated in the time line in section (B)(1)(ii)).

# § 115C-12. Powers and duties of the Board generally.

Miscellaneous Powers and Duties. – All the powers and duties exercised by the State Board of Education shall be in conformity with the Constitution and subject to such laws as may be enacted from time to time by the General Assembly. Among such duties are:

Power to develop content standards and exit standards. – The Board shall (9c)develop a comprehensive plan to revise content standards and the standard course of study in the core academic areas of reading, writing, mathematics, science, history, geography, and civics. The Board shall involve and survey a representative sample of parents, teachers, and the public to help determine academic content standard priorities and usefulness of the content standards. A full review of available and relevant academic content standards that are rigorous, specific, sequenced, clear, focused, and measurable, whenever possible, shall be a part of the process of the development of content standards. The revised content standards developed in the core academic areas shall (i) reflect high expectations for students and an in-depth mastery of the content; (ii) be clearly grounded in the content of each academic area; (iii) be defined gradeby-grade and course-by-course; (iv) be understandable to parents and teachers; (v) be developed in full recognition of the time available to teach the core academic areas at each grade level; and (vi) be measurable, whenever possible, in a reliable, valid, and efficient manner for accountability purposes. High school course content standards shall include the knowledge and skills necessary to pursue further postsecondary education or to attain employment in the 21st century economy. The high school course content standards also shall be aligned with the minimum undergraduate course requirements for admission to the constituent institutions of The University of North Carolina. The Board may develop exit standards that will be required for high school graduation. The Board also shall develop and implement an ongoing process to align State programs and support materials with the revised academic content standards for each core academic area on a regular basis. Alignment shall include revising textbook criteria, support materials, State tests, teacher and school administrator preparation, and ongoing professional development programs to be compatible with content standards. The Board shall develop and make available to teachers and parents support materials, including teacher and parent guides, for academic content standards. The State Board of Education shall work in collaboration with the Board of Governors of The University of North Carolina to ensure that teacher and school administrator degree programs, ongoing professional development, and other university activity in the State's public schools align with the State Board's priorities.

**Section B: Appendix 14** 

# North Carolina State Board of Education January 6, 2010

As a part of approving the Race to the Top application:

The North Carolina State Board of Education agrees to commit North Carolina to using student achievement growth data as a significant part of teacher and principal evaluation, after undergoing a process engaging all stakeholders to determine a valid, fair, and reliable way to do so.

The North Carolina State Board of Education approves of the Regional Leadership Academies for principal certification.

The North Carolina State Board of Education endorses North Carolina working in collaboration with other states on formative, benchmark, diagnostic, and summative assessments based upon the Common Core standards.

# PARTICIPATING STATE TASK ORDER PURSUANT TO OHIO DAS CONTRACT No CSP902107 EFFECTIVE DATES: 03/23/2007 TO 06/30/2011

THIS TASK ORDER (the "Order") is entered into by and among the following parties:

- A. The Educational Measurement group of Pearson, a business of NCS Pearson, Inc., having an address of 2510 North Dodge Street, Iowa City, Iowa 52245-9555 ("Pearson"), ("Contractor"); and
- B. The North Carolina State Board of Education (Agency), having an address of: Purchasing and Contracts, NC Department of Public Instruction, 6314 Mail Service Center, Raleigh, NC 27699-6308, Attention: Chuck Clements.

### WITNESSETH:

WHEREAS, Pearson has created or caused to be created the American Diploma Project (ADP) Algebra II End-of-Course Exam pursuant to Ohio Department of Administrative Services Request for Proposal (RFP) No. CSP902107, and Contract No. CSP902107.

WHEREAS, The Agency is a member of the Multi-State Consortium which desires to make purchase of the contracted services and abide by all the terms and conditions contained in Ohio DAS Contract No. CSP902107, and

WHEREAS, Pearson agrees to provide services to the Agency and abide by all the terms and conditions contained in Contract No. CSP90217.

NOW, THEREFORE, in consideration of the mutual premises and covenants herein contained, Pearson and the Agency hereby agree as follows:

- Entire Agreement: The contract between Pearson and the Agency shall consist of the following A. documents:
  - 1. Ohio DAS Contract CSP902107 including all contract documents referenced on page two, paragraph one, (a-e), including the Agency specific special provisions contained in Attachment One, Part Two-J of the Ohio RFP CSP902107, and any subsequent signed amendments to the Contract;
  - 2. This Task Order; and
  - 3. The Agency's Purchase Order to be placed through the North Carolina E-Procurement Service.
  - 4. In the event of conflicts, the order of precedence shall be Ohio DAS Contract CSP902107 as described above, this Task Order and the Purchase Order.

#### 8. Payment:

- 1. The Agency shall submit an initial order to Pearson which details the quantity of tests ordered, and any additional optional and enhanced features/services requested on, or before a designated initial due date for each year that the Agency makes purchases under this agreement. In 2008, the initial due date for orders shall be February 7, 2008. For future administrations, the due date for initial orders is twelve weeks before the beginning of the ADP Algebra II test administration window. Pearson shall submit an initial invoice to the Agency within 30 days of receipt of the initial Agency order.
- 2. In the event the Agency requires additional tests or optional and enhanced features/services after the initial order due date has passed, due to circumstances not anticipated at the time it placed the initial order, the Agency may submit additional orders for tests or optional and enhanced features/services at least five days prior to the administration of the test. Pearson shall submit a final invoice to the Agency within 30 days after the last day of test administration for any and all additional orders placed after the initial order due date.

12:53

- The Agency shall submit payment to Pearson within 30 days of invoice receipt, pursuant to paragraph 38 of Ohio DAS Contract No. CSP902107.
- 4. Pricing for all tests ordered shall be based on the total quantity ordered by the consortium as of the close of business on the initial order due date, and pursuant to the terms included in Ohio DAS Contract No. CSP902107 on page 13 of 15, a copy of which is attached hereto.
- 5. Pricing for optional and enhanced features/services shall be pursuant to the terms in Ohio DAS Contract No. CSP902107 on page 14 of 15, a copy of which is attached hereto.
- Ĉ. Contact Information: Pearson and the Agency hereby designate the following individuals as the contract or procurement contacts:

# ALGEBRA II END-OF-COURSE EXAM MULTISTATE PROCUREMENT PARTICIPATION AGREEMENT NEW PARTICIPATING STATE ADDENDUM

This New Participating State Addendum ("Addendum") to the Algebra II End-of-Course Exam Multistate Procurement Participation Agreement, including the Attachment One: Project Requirements and Special Provisions; Part Two- J: Special Provisions - State of North Carolina, ("Agreement") is made and effective as of this \_\_\_\_ day of \_\_ \_\_\_\_, 20 \_ (the "Effective Date") by and between the States that have previously become Parties to the Agreement (by having executed the Agreement or a like Addendum), acting through and at the direction of the Coordination and Direction Team ("CDT"), and the North Carolina State Board of Education ("North Carolina").

Pursuant to Section 7.7 of the Agreement, the CDT has approved the addition of North Carolina as a participating State under the Agreement.

North Carolina, in consideration of its being allowed to become a party to the Agreement, agrees to be bound by and comply with all terms and conditions of the Agreement, a copy of which is attached.

North Carolina also agrees to accept and abide by the previous actions and decisions of the Parties and the CDT, including without limitation procurement and contractor selection activities and decisions, except insofar as the Parties and/or CDT may hereafter determine to change them.

IN WITNESS WHEREOF, the Parties have executed this Addendum, intending it to have the effect of a sealed instrument, as of the day, month and year first above written.

# AMERICAN DIPLOMA PROJECT'S ALGEBRA II END-OF-COURSE EXAM—Invitation to Participate

### Background

At the January 2008 State Board of Education meeting, the Board approved North Carolina's participation in an Algebra II assessment developed for a thirteen-state consortium. All of these states also are members of Achieve's American Diploma Project (ADP) network.

The project's test vendor Pearson Educational Measurement (PEM) has field tested the items with members of the consortium. The first operational administration of the Algebra II exam is scheduled for May. This is an invitation for North Carolina districts to participate. This is an exciting initiative for our state, both in terms of creating a credible college readiness instrument suitable for the 21st century environment and as a partnership working with other states to address common goals. Also, it will provide comparative data with the other 13 participating states. (NC's participation is limited to the first 1000 students).

# Administrative Details

- Districts may volunteer to administer the Achieve Algebra II Exam to one or more Algebra II classes. Each student in the Algebra II class will be required to participate.
- Districts must administer both the North Carolina Algebra II EOC and the Achieve Algebra II EOC under secure conditions. Please note that students must take both the Achieve and the state EOC.
- The Achieve exam's testing window is May 1 until June 13. Selected sites will be provided more detailed information on specific testing dates for Achieve's exam after selection. The NC Algebra II EOC must be administered during the EOC testing window. The EOC testing window is the last week of a semester course and the last two weeks of a yearlong course. Please be reminded that LEAs have the flexibility to extend this EOC testing window up to 7 school days.
- There is no direct charge to districts for the Achieve Algebra II Exam. The State of North Carolina will incur the cost and provide the exam to the LEA at no cost.

# INNOVATION AND SCHOOL TRANSFORMATION

Logan Page 2 January 17, 2008

12:53

- The Achieve exam is designed to take approximately 90-120 minutes, comprised of two 45-60 minute sessions, one of which will allow calculator use. However, some students may require and should be allowed—additional time to complete the test.
- There are 60 questions on the Achieve exam including 50 multiple choice, seven short-answer, and three extended-response items. About one-third of the student's score will be based on the shortanswer and extended-response items. More information on the exam may be found at http://achieve.org/node/842.

### **Ouestions**

If you have questions about the Achieve Algebra II end-of-course exam, please contact Sarah McManus or Everly Broadway.

Sarah McManus Smemanus@dpi.state.nc.us 919-807-3776

Everly Broadway Ebroadway@dpi.state.uc.us 919-807-3838

# Registration Deadline

Please email Sarah McManus (smcmanus@dpi.state.nc.us) by February 25, 2008 to indicate your school or district's interest in participating. (All students in an Algebra II class must participate.)

Include the following information in your request to participate:

Name of school Principal Algebra II teacher(s) Number of students Phone number

CC: High School Principals Lou Fabrizio Wandra Polk Sarah McManus Everly Broadway JB Buxton June Atkinson Rebecca Garland

# ASSESSMENT CONSORTIUM MEMORANDUM OF AGREEMENT

This Memorandum of Agreement ("MOA") is entered into by and between the following States: Arkansas, Colorado, Florida, Illinois, Indiana, Louisiana, Massachusetts, Minnesota, North Carolina, Ohio, Pennsylvania, and Virginia (collectively the "Participating States" or "Assessment Consortium").

- 1. Purpose. The purpose of this MOA is to form a coalition of states with a shared vision for common assessments that are internationally-benchmarked; build toward college and career readiness by the time of high school graduation; measure a common core of standards for K-12 pursuant to the National Governors Association Center for Best Practices Memorandum of Understanding ("Common Core Standards"); utilize technology for efficiency of delivery and scoring; and are cost effective. An outcome of this shared vision will be a proposal for the federal Race to the Top Assessment Competition in 2010 to develop and implement common, high-quality assessments aligned with the Common Core Standards.
- **2. Lead State.** The Participating States agree that Florida shall be designated as the Lead State, and Florida accepts the designation. The Lead State shall manage the work process under this MOA and competitively bid, when determined by the Assessment Consortium, for all services and commodities required to achieve the objectives of this MOA.. In particular, the Lead State shall:
- a. Direct and oversee meetings of the Assessment Consortium and set the agendas.
- b. Pursuant to the laws of the Lead State, procure any necessary goods and services needed to carry out the intent of this MOA, using the most reasonable form of competitive solicitation and by quotes if no competitive solicitation is required.
- c. Although the Lead State shall manage and administer the primary contracts, each Participating State shall be a party to any multi-state agreement, by direct execution or by addendum,. However, each Participating State shall be responsible for enforcing their portion of the work on any multi-state contract. In addition, the Lead State shall not be responsible for any of the contractual obligations of a Participating State.
- d. Coordinate, assist, and task the Management Entity as may be reasonably necessary.
- e. Serve as liaison with the U.S. Department of Education, and all other third parties on behalf of the Assessment Consortium.
- f. The Lead State may resign by notifying the Participating States at least 30 days in advance by written notice. A majority of the Participating States will then appoint a new Lead State.

- g. The Participating States may remove the Lead State and appoint a new Lead State by vote of a majority of the Participating States. Upon the resignation or removal of the Lead State, all contracts and other rights and obligations of the Lead State shall be assigned to the new Lead State.
- **3. Management Entity.** Services of a Management Entity will be procured and utilized to assist the Consortium in conducting its work. A majority vote of the Assessment Consortium is required to award a contract to the Management Entity.

The Management Entity shall perform the following services:

- a. Assist the Lead State in coordinating and running the Assessment Consortium meetings, including acting as a facilitator at the meetings.
- b. Perform research and draft reports necessary for developing Requests for Proposals for goods and services.
- c. Assist the Lead State in procuring goods and services as agreed upon by Participating States.
- d. Provide advice and grant-writing services to the Assessment Consortium to assist them in developing the proposal for the Race to the Top Assessment Competition.
- e. Perform any other activities and services that are reasonably requested by the Lead State or any Participating State in order to achieve the purposes of this MOA.
- 4. Scope of Work and Responsibilities of the Participating States. Each Participating State in the Assessment Consortium shall adopt the Common Core Standards which were developed to be internationally benchmarked and to build toward college and career readiness by the time of high school graduation. The Assessment Consortium shall, if funded by Race to the Top Assessment Competition funds, develop common, high-quality assessments which are aligned with the Common Core Standards, utilize technology for efficiency of delivery and scoring, result in a common definition of proficiency, and are cost effective. In order to achieve these deliverables, the Assessment Consortium and the individual Participating States shall perform the following activities.
- a. Each Participating State will adopt the Common Core Standards using their state-approved standards-adoption process.
- b. The Assessment Consortium will meet to define the process for procuring the services of a Management Entity by April 30, 2010
- c. The Assessment Consortium will develop and submit a proposal for funding through the Race to the Top Assessment Competition by June 2010 or the due date established by the U.S. Department of Education.

- d. The Assessment Consortium will meet, with the assistance of a Management Entity, to review the status of each Participating State's Common Core Standards adoption by August 2, 2010.
- e. The Assessment Consortium will develop a plan by December 10, 2010, for sharing of test items and tasks aligned with the Common Core Standards for use in Participating States' LEAs for formative and interim assessment purposes.
- **5. Meetings and Quorum.** Meetings may be called by the Lead State or a majority of the Participating States. Meetings may either be in person or by conference call. Written notice of the meeting shall be sent to all Participating States at least 48 hours in advance, by email, facsimile, or certified mail.
- a. A Quorum for any meeting shall consist of designated representatives from at least two-thirds of the Participating States. An individual state may appear by phone and be counted as part of the Quorum. Each Participating State shall have one vote.
- b. All actions or decisions of the Assessment Consortium shall, unless otherwise designated elsewhere in this MOA, require a majority vote to pass.
- c. Actions and decisions of the Assessment Consortium may also be taken by written directive executed by a majority of the Participating States without a formal meeting.
- d. Notwithstanding the above, any amendment to this MOA shall require a unanimous vote of the Participating States.
- **6. Exam Results.** Each Participating State shall own their respective assessment results and any other documentation which are developed as a result of any particular state assessment. All Participating States shall jointly own all deliverables produced as a result of this MOA, and shall have the right to utilize all deliverables and documents produced under this MOA for the benefit of their respective state, subject to all state and federal confidentiality laws and regulations.

### 7. Termination and Withdrawal of Parties.

- a. This MOA may be terminated by agreement of all the Participating States.
- b. Any Participating State may withdraw from this MOA upon thirty days written notice to all Participating States. In addition, any Participating State may immediately withdraw from this MOA upon notice of a loss of state funding to support the assessment work. A notice specifying the reasons for immediate termination shall be sent as soon as possible after the termination to the Participating States.

- c. A withdrawn Participating State may only participate in a contract or agreement it executed prior to its withdrawal from the Assessment Consortium and this MOA.
- d. A Participating State may have their rights hereunder terminated in the event it fails to perform or comply with any of its material covenants or obligations contained in this MOA, and such failure is not remedied and cured in all material respects within fifteen (15) days after the date written notice of such failure is delivered to the Participating State by the Lead State. A termination for default under this provision shall effectively terminate all contracts and agreements entered into by the terminated Participating State which have been procured through this MOA. Upon demand by the Lead State, the terminated Participating State shall provide written proof that such agreements have been terminated. However, the determination of default must be made by a majority of the Participating States before the Lead State is authorized to take any action against a defaulting Participating State.
- **8. Confidential Information.** The Participating States warrant they shall not disclose to any third party any personally identifiable information about any student, without the written consent of the Participating State that owns the data. This applies to information which came from any record or report used by the Assessment Consortium or from any education record which is subject to the Family Educational Rights and Privacy Act, 20 U.S.C. Section 1232g. The term "educational record" shall have the meaning prescribed in 20 U.S.C. Section 1232g(a)(4).
- **9. Expenses.** It is the intent of the Participating States to seek funding from various third parties for the development of the common, high quality assessments and other shared deliverables under this MOA, and for the cost of a Management Entity. However, prior to obtaining such funds, the Participating States agree that they shall equally share these expenses. Decisions on whether to incur a shared expense and the amount to incur shall be decided by a majority vote of the Assessment Consortium. Notwithstanding the above, the Participating States also agree that they shall individually pay for any state specific expenses, including travel and the costs related to any state's use of an assessment.

### 10. Miscellaneous Provisions.

- **a. Rules of Interpretation.** The Participating States waive application of the principle of contract construction that ambiguities are to be construed against a contract's drafter, and agree that this MOA is a joint product of all Participating States.
- **b. Assignment.** No Participating State may assign any of its rights or obligations hereunder without the prior written consent of the Assessment Consortium.
- **c. Additional Documentation.** Each Participating State agrees to take such action and to execute and deliver all documents necessary to carry out the terms and conditions of this MOA

- **d.** Invalidity and Severability. In the event that any provision of this Contract shall be held to be invalid, such provision shall be null and void. The validity of the remaining provisions of the MOA shall not in any way be affected thereby.
- **e.** Counterparts. This Contract maybe executed in multiple counterparts, each of which shall be deemed to be an original and all of which shall constitute one contract, notwithstanding that all parties are not signatories to the original or the same counterpart, or that signature pages from different counterparts are combined, and the signature of any party to any counterpart shall be deemed to be a signature too and may be appended to any other counterpart.
- **f. Authority to Execute.** Each Participating State warrants that it has the authority to enter into this MOA, and the party executing hereunder has the full authority to bind that state.

**IN WITNESS WHEREOF**, the Participating States have, through their duly authorized representative, executed this Memorandum of Agreement, which shall be effective, as of the last signature date below.

# MOU for a State Consortium Developing Balanced Assessments of the Common Core Standards

This Non-Binding Memorandum of Understanding ("MOU") is entered into by and between the Balanced Assessment Consortium and North Carolina. The purpose of this agreement is to establish a framework of collaboration for states in supporting assessment of the common core standards. The agreement also articulates tasks in support of a Multi-State Consortium in its implementation of an approved Standards and Assessment Section of a Race to the Top grant. The MOU outlines a set of working principles, the roles of states and local districts within the consortium, and a set of tasks that the Consortium would undertake.

# **Working Principles**

A consortium of states developing a balanced assessment system for evaluating the common core standards would start with working principles derived from an examination of successful state systems in the U.S. and high-achieving systems internationally. For example:

- 1) Assessments are grounded in a thoughtful, standards-based curriculum and are managed as part of a tightly <u>integrated system</u> of standards, curriculum, assessment, instruction, and teacher development.
  - Curriculum guidance is lean, clear, and focused on what students should know and be able to *do* as a result of their learning experiences. Assessment expectations are described in the curriculum frameworks or course syllabi and are exemplified by samples of student work.
  - Curriculum and assessments are organized around a well-defined set of learning progressions within subject areas. These guide teaching decisions, classroom-based assessment, and external assessment.
  - Teachers and other curriculum experts are involved in developing curriculum and assessments which guide professional learning and teaching. Thus, everything that comes to schools is well-aligned and pulling in the same direction.
- 2) Assessments elicit evidence of actual student performance on challenging tasks that prepare students for the demands of college and career in the 21<sup>st</sup> century. Curriculum and assessments seek to teach and evaluate a broad array of skills and competencies that generalize to higher education and work settings. They emphasize deep knowledge of core concepts within and across the disciplines, including problem solving, analysis, synthesis, and critical thinking, and include essays and open-ended tasks and problems, as well as selected response items.
- 3) <u>Teachers are involved</u> in the development of curriculum and the development and scoring of assessments. Scoring processes are moderated to ensure consistency and to enable teachers to deeply understand the standards and to develop stronger curriculum and instruction leading to greater student proficiency. The moderated scoring process is a strong professional learning experience that helps drive the instructional improvements that enable student learning, as teachers become more skilled at their own assessment practices and their development of curriculum to teach the standards. The assessment systems are designed to increase the capacity of teachers to prepare students for the contemporary demands of college and career.

- 4) **Assessments are structured to <u>continuously improve teaching and learning</u>**. Assessment *as, of,* and *for* learning is enabled by several features of assessment systems:
  - The use of school-based, curriculum-embedded assessments provides teachers with models of good curriculum and assessment practice, enhances curriculum equity within and across schools, and allows teachers to see and evaluate student learning in ways that can feed back into instructional and curriculum decisions.
  - Close examination of student work and moderated teacher scoring of both school-based components and externally developed open-ended examinations are sources of ongoing professional development that improve teaching.
  - Developing both school-based and external assessments around learning progressions allows teachers to see where students are on multiple dimensions of learning and to strategically support their progress.
- 5) Assessment and accountability systems are designed to <u>improve the quality of learning</u> and schooling. Assessments aim to encourage and support the learning of ambitious intellectual skills in the way they are designed and used for informing teaching, learning, and schooling. Accountability systems publicly report outcomes and take these into account, along with other indicators of school performance, in a well-designed system focused on continual improvement for schools.

# 6) Assessment and accountability systems <u>use multiple measures</u> to evaluate students and schools.

Multiple measures of learning and performance are used to evaluate skills and knowledge. Students engage in a variety of tasks and tests that are both curriculum-embedded and ondemand, providing many ways to demonstrate and evaluate their learning. These are combined in reporting systems at the school and beyond the school level. School reporting and accountability are also based on multiple measures. Assessment data are combined with other information about schools' resources, capacities, practices, and outcomes to design intensive professional development supports and interventions that improve school performance.

# 7) New technologies enable greater assessment quality and information systems that support accountability.

New technologies enhance and transform the way the assessment process is developed, delivered, and used, providing adaptive tools and access to information resources for students to demonstrate their learning, and providing appropriate feedback by supporting both teacher scoring and computer-based scoring (now possible for both selected response and some forms of constructed-response items). By using technology to reduce costs for delivery of more openended assessment formats, scoring, and reporting, resources can be redirected to improvements in assessment quality.

Technology also organizes data about student learning, enhancing system accountability for instruction and reporting by providing more efficient, accurate, and timely information to teachers, parents, administrators, and policymakers. Technology helps to integrate information at as part of longitudinal data systems, contributing to a rich profile of accomplishment for every student.

# **State and Local Roles within a Consortium**

### **States working within the Consortium would:**

Adopt and augment the Common Core standards as appropriate to their context.

- Create and deploy curriculum frameworks that address the standards—drawing on exemplars and tested curriculum models.
- Build and manage an assessment system that includes both on-demand and curriculumembedded assessments that evaluate the full range of standards and allow evaluation of student progress. The Consortium may develop both joint assessments (commonly implemented by states) as well as other assessment tasks and items linked to the standards (and grounded in curriculum units) that can be incorporated into states' individual assessment plans for formative or summative purposes.
- Develop rubrics that embody the standards, and clear examples of good work, benchmarked to performance standards.
- Create oversight / moderation / audit systems for ensuring the comparability of locally managed and scored assessment components.
- Ensure that teacher and leader education and development infuse knowledge of learning, curriculum, and assessment.
- Implement high-quality professional learning focused on examination of student work, curriculum and assessment development, and moderated scoring.

#### **Districts and schools would:**

- Examine the standards and evaluate current curriculum, assessment, and instructional practice in light of the standards.
- Evaluate state curriculum guidance, and further develop and adapt curriculum to support local student learning, select and augment curriculum materials, and continually evaluate and revise curriculum in light of student learning outcomes.
- Incorporate formative assessments into the curriculum, organized around the standards, curriculum, and learning sequences to inform teaching and student learning.
- Participate in administering and scoring relevant portions of the on-demand and curriculum-embedded components of the assessment system, and examining student work and outcomes.
- Help design and engage in professional development around learning, teaching, curriculum, & assessment.
- Engage in review and moderation processes to examine assessments and student work, within and beyond the school.

#### **Tasks the Consortium Would Undertake**

The consortium of states would build on successful efforts already launched in a number of states, seeking to integrate the best knowledge and exemplars from existing efforts, so as to use resources efficiently, take advantage of well-tested approaches, and avoid reinventing the wheel. It would bring together leading curriculum and assessment experts to advise and support efforts to create a system for evaluating the Common Core, building on the most credible and well-vetted knowledge available in the field. With these supports, the Consortium could:

1. Support the Development of Curriculum Frameworks: When the Common Core standards have been released, vetted, and adopted, consortia of states would work with curriculum and assessment experts to develop (or adapt from previously successful work) curriculum frameworks, syllabi, and other materials mapped to the standards. There has been enormous investment in the United States in high-quality curriculum, for example through NSF and other

organizations at the national level, and in many states and districts. Other English-speaking nations have also developed high quality curriculum materials linked to standards and learning progressions that could be evaluated in this process. This effort would inventory and cull from efforts with a strong evidence base of success to support states in building out curriculum frameworks around which they can organize deeper curriculum development at the local level, state and local assessment development, instructional supports, and professional development.

- **2.** Create a Digital Curriculum and Assessment Library: The results of this effort should ultimately be made available on-line in a digital platform that offers materials for curriculum building and, eventually, model syllabi for specific courses linked to the standards, formative and summative assessment tasks and instruments linked to the curriculum materials, and materials for training teachers and school leaders in both strategies for teaching specific curriculum concepts / units and assessment development and scoring. In addition, as described below, an electronic scoring platform supporting training, calibrating, benchmarking, and reporting would be developed and made available across the states.
- 3. Develop State and Local Assessments: The state consortium would work to create a common reference examination, which includes selected-response, constructed response and performance components aimed at higher-order skills, linked to the Common Core standards for grades 3-8, like the NECAP assessment recently developed by a set of New England states. This assessment would be designed to incorporate more rigorous and analytic multiple-choice and open-ended items than many tests currently include and would include strategically selected curriculum-embedded performance assessments at the classroom level that can be part of the summative evaluation, while also providing formative information.

These curriculum-embedded components would be developed around core concepts or major skills that are particularly salient in evaluating students' progress in English language arts and mathematics. (Eventually, work on science could be included.) Exemplars to evaluate and build upon are already available in many states and in nations like England that have developed a set of "tests and tasks" for use in classrooms that help teachers evaluate students' learning in relation to well-described learning progressions in reading, writing, mathematics, and other subjects.

Curriculum-embedded components would link to the skills evaluated in the "on-demand" test, allowing for more ambitious tasks that take more time and require more student effort than can be allocated in a 2 or 3-hour test on a single day; these components would evaluate skills in ways that expect more student-initiated planning, management of information and ideas, interaction with other materials and people, and production of more extended responses that reveal additional abilities of students (oral presentations, exhibitions, and product development, as well as written responses) that are associated with college and career success.

In the context of summative assessments, curriculum-embedded tasks would be standardized, scored in moderated fashion, and scores would be aggregated up to count as part of the external assessment. Curriculum-embedded assessments would also include marker tasks that are designed to be used formatively to check for essential understandings and to give teachers useful information and feedback as part of ongoing instruction. Thoughtful curriculum guidance would outline the scaffolding and formative assessment needed to prepare students to succeed on the summative assessments.

All components of the system would incorporate **principles of universal design** that seek to remove construct-irrelevant aspects of tasks that could increase barriers for non-native English speakers and students with other specific learning needs. In addition, designers who are skilled at developing linguistically supportive assessments and tests for students with learning disabilities would be engaged from the beginning in considering how to develop the assessments for maximum access, as well as how to design appropriate accommodations and modifications to enable as many students as possible to be validly assessed within the system.

The emphasis on evaluating **student growth over time** and on tying standards to a conception of learning progressions should encourage a growth oriented frame for both the "on-demand" examination and the more extended classroom assessments. The Consortium may consider the viability of incorporating computer-based adaptive testing that creates vertically scaled assessments based on the full range of learning progressions in ELA and math. This would allow students to be evaluated in ways that give greater information about their abilities and their growth over time. This approach would not preclude the evaluation of grade-level standards, which could be part of any students' assessment, nor would it preclude a significant number of constructed response, open-ended items, as the technology for machine-scoring structured open-ended items is now fairly well-developed. Strategic use of partial teacher scoring for these items would also be a desirable element of the system to support teachers' understanding of the standards and assessments, and their planning for instruction.

The emphasis on evaluating student growth should also inform the development of the curriculum-embedded elements of the system, which should be selected or developed to strategically evaluate students' progress along the learning continuum. Centrally developed tasks administered and scored by teachers with moderation (see below), using common rubrics, would be part of the set of reported scores. In states with experience and capacity, it may be possible to begin to incorporate information about student learning that teachers develop from their own classroom evidence, linked to the standards and learning progressions and guided by the curriculum frameworks. This could be an optional aspect of the Consortium's work for states and communities with interest and capacity.

At the **high school level**, the Consortium might explore one or both of two options for assessment:

• Course- or syllabus-based systems like those in England, Australia, Singapore, Hong Kong, Alberta (Canada), as well as the International Baccalaureate. Generally conceptualized as end-of-course-exams in this country, this approach should become a more comprehensive course assessment approach like that pursued in these other countries. Such an approach would include within-course performance assessments that count toward the examination score, as well as high-quality assessment end-of-course components that feature constructed response as well as selected response items. Within-course performance assessments would tap central modes of inquiry in the disciplines, ensuring that students have the opportunity to engage in scientific investigations, literary analyses and other genres of writing, speaking and listening; mathematical modeling and applications; social scientific research. Such an approach might require an ELA and math assessment at a key juncture that evaluates an appropriate benchmark level for high school standards, and then, as in high-achieving nations, allow for pursuit of other courses/ assessments that are selected by students

according to their interests and expertise. These could serve as additional information on the diploma for colleges and employers.

- Standards-driven systems that might include a more comprehensive benchmark assessment in ELA and mathematics complemented by collections of evidence that demonstrate students' abilities to meet certain standards within and across the disciplines. This set of assessments would allow more curriculum flexibility in how to meet the standards. Systems like these are used in some provinces in Canada and Australia, in states like Rhode Island, Wyoming, Nebraska, and New Hampshire, and in systems of schools like the New York Performance Standards Consortium, the Asia Society, and Envision Schools. Sometimes these sets of evidence are organized into structured portfolios, such as the Technology portfolio in New Hampshire and the broader Graduation portfolios in these sets of schools that require specific tasks in each content area, scored with common rubrics and moderation.
- A mixed model could combine elements of both course- and standards-driven models, allowing some demonstrations of proficiency to occur in any one of a range of courses (rather than a single, predetermined course) or even outside the bounds of a course, like the efforts by some states to allow students to pass courses via demonstrations of competence rather than seat time (e.g. NH, OH). Such a system could also include specific components intended to develop and display research and inquiry skills that might also be interdisciplinary, such as the Project Work requirements in England, Singapore, and the International Baccalaureate, and the Senior Project requirements in Pennsylvania and Ohio.
- **4. Develop Moderation and Auditing Systems for Teacher-Scored Work:** The consortium would develop protocols for managing moderation and auditing systems and training scorers so as to enable comparable, consistent scoring of performance assessments. In other nations' and states' systems that include these features routinely, procedures have been developed to ensure both widespread teacher involvement often as part of professional development time and to create common standards and high levels of reliability in evaluating student work. A range of models are possible, and the consortium would serve as a resource to individual states in developing and implementing strong, efficient approaches.
- 5. Develop Technology to Support the Assessment System: Technology should be used to enhance these assessments in a number of ways: by delivering the assessments; in on-line tasks of higher-order abilities, allowing students to search for information or manipulate variables and tracking information about the students' problem-solving processes; in some cases, scoring the results or delivering the responses to trained scorers / teachers to assess from an electronic platform. Such a platform may also support training and calibration of scorers and moderation of scores, as well as efficient aggregation of results in ways that support reporting and research about the responses. This use of technology is already being used in the International Baccalaureate assessment system, which includes both on-demand and classroom-based components.

In order to gain the efficiency and cost benefits of machine scoring and the teaching and learning benefits of teachers' moderated scoring, a mixed system could be developed where computer-based scoring is incorporated on constructed response tasks where useful – though teachers would score some of these tasks for anchoring and learning purposes – while other tasks that require human scoring engage most teachers in scoring to support improvements in instruction.

#### RESPONSIBILITIES OF ALL SEAS PARTICIPATING IN THE CONSORTIUM

- 1) Each participating SEA in the Consortium will appoint a key contact person.
- 2) These key contacts from each State will maintain frequent communication with the parties administering the Balanced Assessment Consortium to facilitate cooperation under this MOU.
- 3) Participating SEA grant personnel will work together to determine appropriate timelines for project updates and status reports throughout the whole grant period.

This Non-binding Memorandum of Understanding shall be effective beginning with the date of the last signature hereon:

Dr. June Atkinson State Superintendent of Public Instruction North Carolina Department of Public Instruction NC Education Building 6301 Mail Service Center Raleigh, NC 27699

Dear Superintendent Atkinson:

Achieve is pleased to confirm North Carolina's participation in an assessment partnership committed to pursuing the development and implementation of summative assessments that are aligned to the common core standards, that can be used within states as part of statewide assessment systems, and that will enable comparability of results across a maximum number of states.

We have received your formal request to join the other states in this partnership and acknowledge your acceptance of the attached Statement of Principles which will guide our collective work.

North Carolina's participation in this partnership is critical to its success. We look forward to continuing our important work together in the coming months.

Sincerely,

Michael Cohen President

#### Comparing Student Performance on Common College- and Career-Ready Standards Statement of Principles

Our state is committed to an education system that prepares all of our students for success in college, careers, and life in the 21<sup>st</sup> century. We believe in setting *high* expectations for our students and schools that are firmly grounded in what it takes to be successful. We believe in setting *common* expectations across states, and are committed to working with like-minded states to adopt common standards and assessment systems anchored in college and career readiness.

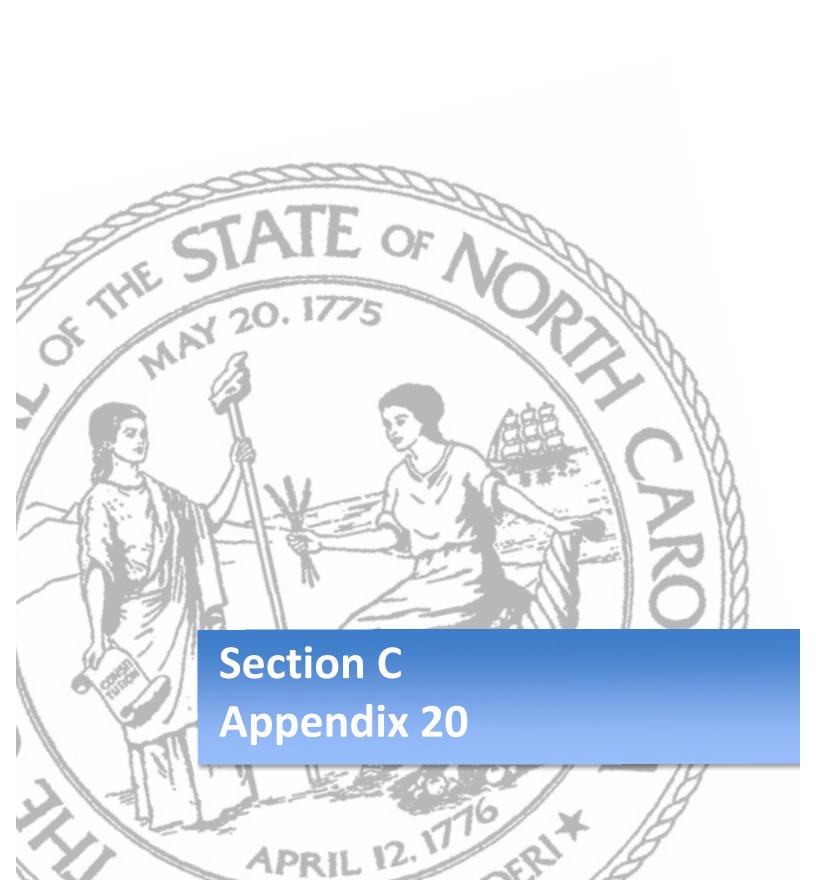

Our state supports common assessments that meet the following principles:

- Aligned to the common core standards
- Anchored in college and career readiness
- Allow for comparison of student results across a maximum number of states
- Enable to the maximum extent possible benchmarking performance against NAEP and international standards
- Cover grades 3 through 8 and high school, including college/career ready measures at the end of high school
- Address three overarching goals: measuring student proficiency, ensuring accountability, and improving teaching and learning
- Enable measurement of student achievement and growth
- Are summative in nature but designed in a manner consistent with more comprehensive assessment systems that also include interim and formative assessments
- Provide valid and reliable measures of student knowledge, understanding of, and ability to apply crucial concepts through the use of a variety of item types and formats
- Leverage technology and economies of scale in order to minimize costs and create assessments that accurately measure student performance
- Provide for timely release of results to better inform practice and support decisionmaking
- Include the assessment of students identified with disabilities and English language learners and to the extent feasible, use universal design principles

We understand that Achieve will work with other national partners to build on the work of the common core standards and convene states to pursue a common assessment strategy that meets these principles. We are prepared to work with Achieve and its partners in as large a consortium of states as possible to explore the development and implementation of summative assessments that are aligned to the common core standards, that can be used within states as part of statewide assessment systems, and that will enable comparability of results across states. We understand that in pursuing this effort, Achieve and its partners will work closely with other consortia that have been formed to explore areas of common ground and determine whether and how efforts could be combined to achieve comparability of results.

### States Participating in the Common Core Balanced Assessment Consortium as of January 13, 2010:

Alabama, Arizona, Arkansas, California, Connecticut, Delaware, Illinois, Indiana, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, Montana, New Hampshire, New Jersey, North Carolina, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, South Dakota, Utah, Washington DC, West Virginia, Wisconsin, and Wyoming

#### I. Project Abstract

North Carolina (NC) must establish a robust P-20 statewide longitudinal data system (SLDS) to enable education leaders at the State and local levels to make outcome-based decisions regarding policies, programs, and practices aimed at increasing student success at every point along the State education-workforce continuum. With an official mandate from Governor Perdue, the NC Education Cabinet, and the NC General Assembly, a committee composed of representatives from the NC Department of Public Instruction (NCDPI), NC Community College System (NCCCS), University of North Carolina General Administration (UNC), NC Independent Colleges and Universities (NCICU), NC Early Childhood Data Group (NCECDG), and Employment Security Commission of NC (NCESC) has been working to craft a collective vision and high level implementation plan for an NC SLDS. This vision is "NC P20+," an SLDS that will include formal, Statewide, collaborative governance, and technology infrastructure that will enhance accessibility, quality, interoperability, and use of "shared" data needed both for sectorspecific and Statewide, cross-sector analysis and reporting. Many elements of NC P20+ are either in place or in the process of being developed, while other components are yet to be designed or implemented. Perhaps the most critical elements that are already in place are the strong existing collaboration among the NC P20+ sectors to use data to promote continuous improvement of education services, and the Statewide P13 Unique Student Identifier (UID).

NC P20+ is designed to address NC's critical need for an SLDS by addressing five core goals around which the project's 16 measurable outcomes are organized. The five goals are as follows:

Goal 1: Institutionalizing Rigorous Governance

Goal 2: Implementing a Statewide P20+ Unique Student Identifier (UID)

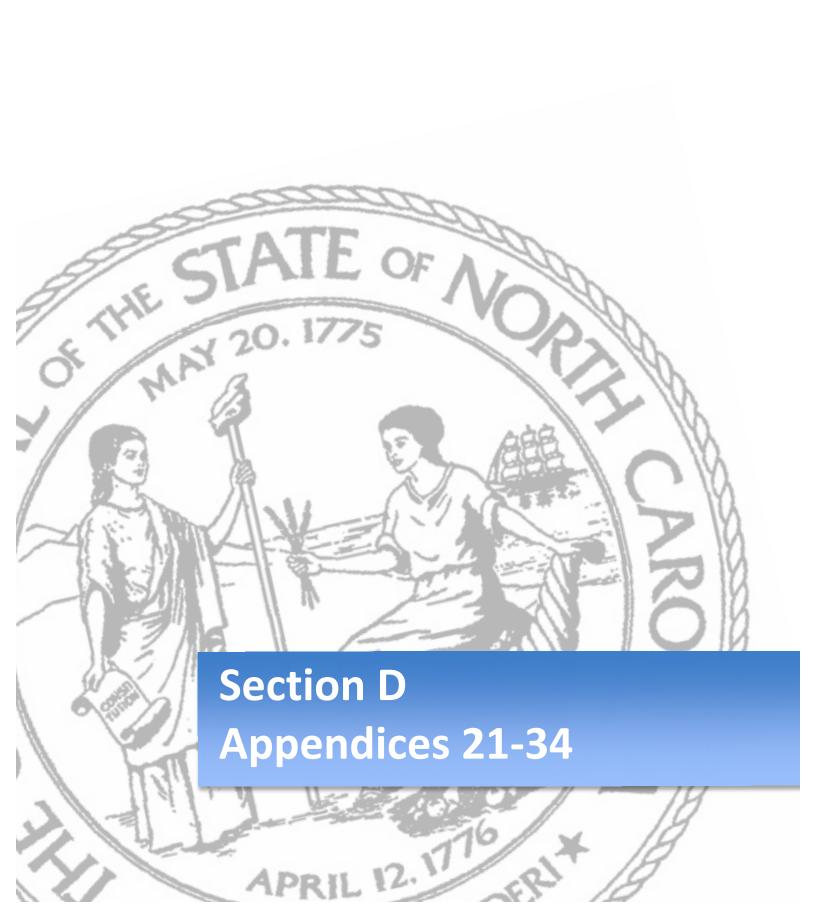

Goal 3: Building a Comprehensive P20+ Data Exchange (NC Data Hub)

Goal 4: Ensuring High Data Quality in Each Sector and in the Exchange

Goal 5: Building Capacity for Stakeholders to Access and Use Data

Led by the NC P20+ Steering Committee, NC will accomplish these goals by employing a proven project management and governance structure based on the one used to implement the ongoing Common Education Data Analysis & Reporting System (CEDARS) project (a P13 SLDS funded through cohort 2 of the Institute of Education Sciences SLDS grant program). NC P20+ will leverage both specific CEDARS technology investments and various lessons learned from implementation.

Establishing NC P20+ is critical to enabling NC leaders at all points along the NC education-workforce continuum access to a broader view of the State's educational needs. As NC strives to find the right formula(s) for ensuring that our State's spectrum of education services can facilitate every student's achievement of college- and/or career-readiness, our leaders must have access to this holistic view. In the current and foreseeable State fiscal climate, however, NC faces extreme challenges in trying to achieve the NC P20+ vision. Without the IES SLDS grant funds requested in this proposal, efforts will be severely limited, and the State will be at risk of not being able to create the robust SLDS capability we need to move our education system forward.

#### **State Statute Granting All Licensure Decisions to State Board (Relevant Sections)**

#### § 115C-296. Board sets certification requirements.

- (a) The State Board of Education shall have entire control of certifying all applicants for teaching positions in all public elementary and high schools of North Carolina; and it shall prescribe the rules and regulations for the renewal and extension of all certificates and shall determine and fix the salary for each grade and type of certificate which it authorizes. . . .
- (b) It is the policy of the State of North Carolina to maintain the highest quality teacher education programs and school administrator programs in order to enhance the competence of professional personnel certified in North Carolina. To the end that teacher preparation programs are upgraded to reflect a more rigorous course of study, the State Board of Education, as lead agency in coordination and cooperation with the University Board of Governors, the Board of Community Colleges and such other public and private agencies as are necessary, shall continue to refine the several certification requirements, standards for approval of institutions of teacher education, standards for institution-based innovative and experimental programs, standards for implementing consortium-based teacher education, and standards for improved efficiencies in the administration of the approved programs. . . .
- (c) It is the policy of the State of North Carolina to encourage lateral entry into the profession of teaching by skilled individuals from the private sector. To this end, before the 1985-86 school year begins, the State Board of Education shall develop criteria and procedures to accomplish the employment of such individuals as classroom teachers. Beginning with the 2006-2007 school year, the criteria and procedures shall include preservice training in (i) the identification and education of children with disabilities and (ii) positive management of student behavior, effective communication for defusing and deescalating disruptive or dangerous behavior, and safe and appropriate use of seclusion and restraint. Skilled individuals who choose to enter the profession of teaching laterally may be granted a provisional teaching certificate for no more than three years and shall be required to obtain certification before contracting for a fourth year of service with any local administrative unit in this State.
- (c1) The State Board of Community Colleges may provide a program of study for lateral entry teachers to complete the coursework necessary to earn a teaching certificate. To this end, the State Board of Education, in consultation with the State Board of Community Colleges, shall establish a competency-based program of study for lateral entry teachers to be implemented within the Community College System no later than May 1, 2006. This program must meet standards set by the State Board of Education.

The State Board of Community Colleges and the State Board of Education shall jointly identify the community college courses and the teacher education program courses that are necessary and appropriate for inclusion in the community college program of study for lateral entry teachers. To the extent possible, any courses that must be completed through an approved teacher education program shall be taught on a community college campus or shall be available through distance learning.

In order to participate in the community college program of study for lateral entry teachers, an individual must hold at least a bachelors degree from a regionally accredited institution of higher education.

An individual who successfully completes this program of study and meets all other requirements of certification set by the State Board of Education shall be recommended for a North Carolina teaching certificate.

(c2) It is further the policy of the State of North Carolina to ensure that local boards of education can provide the strongest possible leadership for schools based upon the identified and changing needs of individual schools. To this end, before the 1994-95 school year begins, the State Board of Education shall carefully consider a lateral entry program for school administrators to ensure that local boards of education will have sufficient flexibility to attract able candidates.

#### Session Law 2009-0451 (Relevant Sections)

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

#### REMOVE BARRIERS TO LATERAL ENTRY INTO TEACHING

**SECTION 7.21.(a)** The State Board of Education shall:

- (1) Review the lateral entry program and identify and remove from it barriers to the lateral entry of skilled individuals from the private sector into the teaching profession; Page 36 Session Law 2009-451 SL2009-0451
- (2) Reduce the coursework requirements for lateral entry by consolidating the required competencies into fewer courses and fewer semester hours of coursework; and
- (3) Provide additional opportunities for individuals to complete coursework online and at community colleges.

**SECTION 7.21.(b)** The State Board of Education shall report to the Joint Legislative Education Oversight Committee by January 15, 2010, on its implementation of this section.

NC State Board of Education Policies on Licensure Routes (Relevant Sections)

**Policy ID Number:** TCP-A-001

**Policy Title:** Policies on General Licensure Requirements

**Current Policy Date:** 11/05/2009

. . .

#### 1.70 Lateral Entry License

An individual who has not completed an approved teacher education program may be licensed under the following lateral entry provisions:

(1) Be selected for employment by a North Carolina school system;

- (2) Hold at least a bachelor's degree from a regionally accredited college or university in the subject area in which they are employed to teach or hold at least a bachelor's degree from a regionally accredited college or university and have satisfied Praxis II testing requirements for the license area and meet the requirements to be designated "highly qualified" as prescribed by No Child Left Behind....
- (3) Have a minimum cumulative grade point average (GPA) of 2.5 or have five years of experience considered relevant by the LEA, or have passed the Praxis I exams and have attained one of the following:
  - a) a GPA of at least 3.0 on all work completed in the senior year;
  - b) a GPA of at least 3.0 in the major; or
  - c) a GPA of at least 3.0 in a minimum of 15 semester hours of course work completed after the bachelor's degree was earned and within the last 5 years.

A person who holds a lateral entry license shall complete a program that includes the following components:

(1) completion of an approved teacher education program in the area of licensure at a college or university or completion of a program of study outlined by the Regional Alternative Licensing Centers;

Prescribed academic *content* coursework that is available through community colleges may be used to satisfy licensure requirements. . . .

- (2) attaining passing score on appropriate PRAXIS subject exam(s) during the first three school years of holding the lateral entry license if the exam(s) was/were not the basis of qualifying for the license;
- (3) completion of a staff development program that includes a two-week training course prior to beginning the work assignment;
- (4) completion of a cumulative of six semester hours of course work in the approved program each school year;
- (5) successful completion of at least a three-year initial licensure program in the lateral entry license area;
- (6) completion of all above requirements within 3 years of becoming eligible for a lateral entry license and recommendation of the IHE or RALC for clear licensure.

Individuals who possess five or more years of experience considered relevant by the LEA and satisfy testing requirements (currently Praxis II) for the licensure area within the first year of teaching shall be issued a Standard Professional 1 License upon:

- a. Completion of the NC TEACH modules or the equivalent through an approved teacher education program:
   1) The Teacher, The Learner, and The School;
   2) Diversity;
   3) Content Area Pedagogy. (Note: The NC TEACH modules are offered and administered through NC colleges and universities with approved teacher education programs.
- b. Completion of the NC TEACH module on Instructional Technology or the equivalent through an approved teacher education program, community college, or through professional development offered by the LEA; and
- c. Completion of one year of successful teaching as verified by the employing LEA.

The employing school system shall formally commit to supporting the lateral entry teacher by:

- (1) providing a two-week orientation . . . ;
- (2) providing working conditions that are appropriate for all novice teachers;
- (3) giving regular focused feedback to the teacher for improving instruction; and
- (4) assisting the individual in accessing prescribed course work and professional development opportunities.

Individuals who do not fulfill the requirements of their lateral entry license within the three years they are initially given may be issued another lateral entry license provided:

- 1. they have passed the required Praxis II exam(s) for the specialty area in which the license will be issued and
- 2. at least six years have elapsed since the prior lateral entry license was issued.

#### 1.75 Lateral Entry for Licensed Educators

At the request of an employing school system, an individual who holds a clear (non-restricted) license in a teaching, administrative, supervisory, or student services area may be issued a lateral entry license in a teaching area provided he/she meets the federal requirements to be designated highly qualified in the teaching area. Licensed educators who are issued a lateral entry license shall be subject to the requirements for lateral entry teachers detailed in Section 1.70 of this policy.

#### 1.80 Alternative Entry License

Alternative entry licenses shall be issued to individuals if requested by an employing LEA that has determined there is or anticipates there will be a shortage of qualified teachers available for specified subjects or grade levels. The LEA shall have developed a plan to determine the individual's competence as a teacher, including review of the performance of students taught by the individual. The alternative entry license is a one-year temporary license.

LEAs shall report semi-annually to the SBE the number of individuals employed as teachers under each eligibility criteria. This policy expires September 1, 2006 but remains in effect for any teacher employed by it prior to September 1, 2006.

#### Eligibility Criteria

To qualify for an alternative entry license, the individual must:

- 1) hold at least a bachelor's degree from a regionally accredited college or university;
- 2) be eligible for re-employment by his or her prior employer; and must:

- 3) (a) hold a valid (current) out-of-state certificate with a minimum of one year of classroom teaching experience considered relevant by the local board to the grade of subject to be taught; or
  - (b) have at least one year of full-time classroom teaching experience considered relevant by the local board to the grade or subject to be taught, as a professor, associate professor, assistant professor, instructor, or visiting lecturer at a regionally accredited college or university; or
  - (c) have three years of other experience provided the local board determines that both the individual's experience and postsecondary education are relevant to the grade or subject to be taught.

#### **Program Components**

- 1) During the period of employment with an alternative entry license, the individual shall receive an annual evaluation and multiple observations.
- 2) The individual's competence as a teacher, including review of the performance of students taught by the individual, shall be assessed according to the plan developed by the local board.
- 3) If the individual does not have one year of classroom teaching experience, a mentor teacher shall be provided by the local board.
- 4) If the individual qualifying for the alternative license under eligibility criteria 3a is deemed competent based on the plan adopted by the local board and recommended for reemployment, she/he is then eligible for a Standard Professional 1 or Standard Professional 2 NC teacher license and is not required to take and pass a standard examination. It shall be the responsibility of the local board to submit the required forms to the Licensure Section for the license to be processed. An individual who receives a Standard Professional 1 or Standard Professional 2 NC teacher license under this option shall be subject to the same requirements for continuing licensure and license renewal as other teachers who hold initial or continuing NC teacher licenses.
- 5) If the individual qualifying for this license under eligibility criteria 3b or 3c is deemed competent based on the plan adopted by the local board and recommended for reemployment by the local board and the individual has passed the Praxis examinations applicable for the area of licensure, the individual is then eligible for a Standard Professional 1 or Standard Professional 2 NC teacher license. It shall be the responsibility of the local board to submit the required forms to the Licensure Section for the license to be processed. An individual who receives a Standard Professional 1 or Standard Professional 2 NC teacher license under this option shall be subject to the same requirements for continuing licensure and license renewal as other teachers who hold initial or continuing NC teacher licenses.

If the individual qualifying for this license under eligibility criteria 3b or 3c does not pass the required Praxis examinations within the first year of alternative entry licensure, she/he may be employed under the provisions of lateral entry.

Section D: Appendix 23

#### 1.85 International Faculty License

Individuals on a cultural exchange visa who hold at least a baccalaureate degree earned at the equivalent of a regionally accredited institution, meet their countries' requirements for qualified teachers, and have at least two years of actual classroom teaching experience may be issued an

International Faculty license for a maximum of three years. The International Faculty license is not renewable. To be eligible for this license, the teacher must complete the equivalent of North Carolina's *H*igh *O*bjective *S*tate *S*tandard of *E*valuation administered by an evaluator authorized by the North Carolina Department of Public Instruction. For purposes of PL 107-110 (No Child Left Behind) this constitutes a full license.

Individuals on a cultural exchange visa who hold at least a baccalaureate degree earned at the equivalent of a regionally accredited institution and meet their countries' requirements for qualified teachers, but with less than two years of actual classroom teaching experience, may be issued an International Faculty license to participate in a federally approved pilot program for teachers from other countries provided they otherwise meet the "highly qualified" requirements of No Child Left Behind. The International Faculty license will be issued for a maximum of three years and is not renewable.

Teachers issued the International Faculty license may have their native language added to their license by earning a rating of at least "Intermediate High" proficiency on the ACTFL (American Council on the Teaching of Foreign Languages) Oral Proficiency Test.

#### 1.90 Emergency Permit to Practice

At the request of the employing LEA, the Department shall issue an emergency permit to practice for a teaching assignment at the A-00 pay level to persons who hold at least a baccalaureate degree from a regionally accredited IHE but who do not qualify for a license under any other approach. The emergency permit to practice shall be valid for one year and may not be renewed. When it requests an emergency permit to practice, the LEA must document that no appropriately licensed professionals or persons who are eligible for a lateral entry license are available to accept the position. Effective June 30, 2006, emergency permits can not be used for teaching at the elementary grades level or at the middle and high school levels in license areas required for teaching the core academic subjects.

Individuals who have been employed on an emergency permit (with at least a 2.5 GPA, but inappropriate college major) may be issued a lateral entry license upon:

- successful completion of one year of teaching (6 calendar months or more)
- satisfactory completion of the NC TEACH (or equivalent) Summer Institute
- recommendation of the LEA.

Individuals who were employed on an emergency permit (with at least a 2.5 GPA, but inappropriate college major) during the 2004-05 school year who completed at least 15 semester hours of relevant coursework may be issued an emergency permit for the 2005-06 school year on the recommendation of the employing LEA. The permit shall be at the A-01 pay level.

#### 2.20 Regional Alternative Licensing Centers

NC Race To The Top Application

Regional alternative licensure centers shall be established by the Division of Human Resource Management. The centers are authorized to review transcripts, prescribe plans of study leading to licensure, and directly recommend teachers for licensure. These centers work with state-approved teacher education programs and LEA personnel to provide assistance to lateral entry and provisionally licensed teachers.

#### 2.30 Direct Licensure

In the case of applicants for career-technical education licenses, international faculty licenses, and on a case-by-case basis at the request of the employing LEA for other licenses, the Licensure Section may evaluate individual records for the purpose of establishing eligibility for licensing without the involvement of an IHE or other authorized recommending agency. Direct licensure may be used when there are unique employment qualifications for a license area (e.g., career-technical education, international faculty), a limited number of approved teacher education programs in the license area, and in the case of extenuating circumstances which prohibit a fair and equitable evaluation through other established routes to licensure. Employees earning a license through the direct process must comply with all current provisional, beginning teacher, and testing requirements, as well as any experience requirements for the area of licensure sought.

Individuals who have earned a least a baccalaureate degree from a regionally accredited institution or an equivalent academic credential in another country, but who are not licensed to teach, may be issued a lateral entry license in a world language based on a rating of at least "Intermediate High" proficiency on the ACTFL (American Council on the Teaching of Foreign Languages) Oral Proficiency Test, and, if available, the Writing Proficiency Test. Individuals who have earned a least a baccalaureate degree from a regionally accredited institution or an equivalent academic credential in another country, but who are not licensed to teach, may be issued a lateral entry license in American Sign Language based on holding at least provisional certification from the American Sign Language Teachers Association (ASLTA).

To be issued a lateral entry license, individuals must meet the 2.5 grade point average requirement. Individuals clearing a license through the direct licensure route complete coursework prescribed by the Licensure Section using the lateral entry templates to clear the license.

Individuals who have completed their baccalaureate degree at an institution outside the United States must submit an official credential evaluation completed by a recognized credential evaluation agency (e.g., World Evaluation Services, Inc., Josef Silny and Associates, Inc., International Education Evaluators, Inc.). Credential evaluations are not accepted from individual evaluators or from agencies with which the prospective teacher is or has been affiliated.

<u>Policy Title</u>: 16 NCAC 6C.0305 Policies on licenses for non-teacher education graduates Current Policy Date: 11/03/2005

(a) A person who has not graduated from a teacher education program that has been approved under Rule .0202 of this Subchapter who later desires to teach shall have his/her credentials evaluated by an IHE approved in accordance with these rules or

- regional alternative licensing center ("RALC"). The person shall satisfy the assessment of his/her needs and be recommended by the IHE or RALC for a license.
- (b) Persons who have been selected for employment by a LEA under the lateral entry provisions of G.S. 115C-296(c) may obtain a license as follows:
  - (1) To be eligible for a lateral entry license, a person shall . . . [See TPC-A-001, above]
  - (2) A person who holds a lateral entry license shall complete a program that includes the following components . . . [See TCP-A-001, above]
  - (3) Individuals who possess five or more years of experience considered relevant by the employing LEA and who satisfy testing requirements for the licensure area within the first year of teaching shall be issued an initial license upon . . . [See TCP-A-001, above]
  - (4) The employing LEA shall commit in writing to . . . [See TCP-A-001, above]
- (c) A person who is qualified to hold at least a class "A" teaching license may be issued additional areas of licensure on a provisional basis as needed by LEAs. The person must satisfy deficiencies for full licensure at the rate of six semester hours per year. The person must complete this yearly credit before the beginning of the following school year and the credit must be directly applicable to the provisional area(s). The person must complete all credit requirements by the end of the fifth year of provisional licensure. . . .

**Priority:** Twenty-first Century Professionals

**Category:** Teacher Education **Policy ID Number:** TCP-B-006

**Policy Title:** Policy Defining Innovative/Experimental Programs for School Administrator

Preparation

**Current Policy Date:** 07/01/2007

- (a) An innovative/experimental program for school administrator preparation is an alternative to the regular approved program and involves public schools and the Department of Public Instruction in the planning and implementation of programs.
- (b) A school system or IHE shall receive approval by the SBE before it implements an alternative program. The department shall issue a license to all individuals who complete these approved programs who are recommended by the school system or IHE and who otherwise meet licensure requirements.
- (c) When the department receives a proposal to establish an alternative program, it will review the proposal, including making on-site visits with agencies as required. The State Evaluation Committee on Teacher Education will review the proposal and information from the on-site visit and recommend to the SBE whether or not the proposed program should be approved.
- (d) The SBE may approve programs which meet the following standards:
  - (1) The program is planned, developed, implemented and evaluated by a school system or IHE and has been reviewed by the State Evaluation Committee on Teacher Education. The proposed innovation is sound and has the potential for strengthening the preparation process for school administrators.
  - (2) The program is appropriately organized and administered. There is a structure for the oversight and management of the program which ensures flexibility and

- accountability.
- (3) The program has sufficient and appropriate human, fiscal, and physical resources.
- (4) The program has defined entry requirements and levels of competency expected.
- (5) The program addresses the needs of the students.
- (6) The program includes exit levels of competence, a procedure for recommending licensure, and a follow-up process.
- (7) The program has clearly defined measurable expected outcomes/results.
- (e) The SBE will evaluate approved innovative/experimental programs annually based on a written report submitted by the school system or IHE and/or by an on-site State visitation team to assure that the program is producing prospective school administrators who can function effectively in the public schools of the State. Based on the annual report the SBE may continue or terminate the innovative/experimental program.

**Policy ID Number:** TCP-B-010

**Policy Title:** Policy Defining Innovative/Experimental Programs for Lateral Entry Teacher Licensure

**Current Policy Date:** 08/01/2007

- (a) An innovative/experimental program for lateral entry teacher licensure is an alternative to the regular approved program and involves public schools, the Department of Public Instruction, and the NC Professional Teaching Standards Commission in the planning and implementation of programs.
- (b) A school system, community college, or college/university shall receive approval by the SBE before it implements an alternative program. The Department of Public Instruction shall issue a license to all individuals who complete these approved programs who are recommended by the school system, community college, or college/university and who otherwise meet licensure requirements.
- (c) When the Department of Public Instruction receives a proposal to establish an alternative program, it will review the proposal in consultation with the NC Professional Teaching Standards Commission, including making on-site visits with agencies as required. The State Evaluation Committee on Teacher Education will review the proposal and information from the on-site visit and recommend to the SBE whether or not the proposed program should be approved.
- (d) The SBE may approve programs which meet the following standards:
  - (1). The program is planned, developed, implemented and evaluated by a school system, or by a community college/college/university in conjunction with a school system and has been reviewed by the State Evaluation Committee on Teacher Education. The proposed innovation is sound and has the potential for strengthening the preparation process for lateral entry teachers.
  - (2). The program is appropriately organized and administered. There is a structure for the oversight and management of the program which ensures flexibility and accountability.
  - (3). The program has sufficient and appropriate human, fiscal, and physical resources.
  - (4). The program addresses the needs of the students.
  - (5). The program includes exit levels of competence, a procedure for recommending licensure, and a follow-up process.
  - (6). The program has clearly defined measurable expected outcomes/results.

| (e) | The SBE will evaluate approved innovative/experimental programs annually based on a written report submitted by the school system or IHE and/or by an on-site State visitation team to assure that the program is preparing lateral entry teachers who can function effectively in the public schools of the State. Based on the annual report, the SBE may continue or terminate the innovative/experimental program. |  |  |  |  |  |  |

 $<sup>^{\</sup>rm I}$  In 1993, the SBE formally changed all credentialing references in NC from "certification" to "licensure."

<sup>&</sup>lt;sup>2</sup> Lateral entry limits coursework but does not currently allow testing out of requirements

<sup>&</sup>lt;sup>3</sup> Figure does not reflect sum of program totals because some program totals are from previous years and some program completers do not apply for full licensure.

# Teacher Vacancy Report Fall 2009

Prepared by

Division of School Business Department of Public Instruction Fall 2009

### Teacher Vacancy Report Fall 2009

Since 1999, local education agencies (LEAs) have annually reported the number of vacant teaching positions they have on October 20th (or the last working day prior to this date). The data submitted by the LEAs in October 2009 and the 4 previously reported years are presented in the following pages. The 2008 data was not collected and is therefore not presented. The data has been summarized by year, by license area and by region.

Pages 2 – 5 Vacancies by LEA.

Page 6 - 9 Vacancies by region.

Pages 10 - Vacancies by license area, and license area by region.

As of October 2009, 559.63 vacancies were reported statewide. This represents a 49% (n = 536.67) decrease from the number reported in October 2007.

### Total Teaching Vacancies by LEA 2004 to 2009

#### Teacher Incentive Fund Grantees in North Carolina & NC Collaborative Project

NC Teacher Incentive Fund (TIF) Programs

#### Charlotte-Mecklenburg

Eligible teachers and principals can earn a merit-based salary supplement of up to 10 percent annually for reaching the student academic achievement goals. They can also earn a bonus or stipend for attending professional development or assuming additional leadership responsibilities. The additional financial incentives include a \$10,000 signing bonus for teachers and principals who accept positions in hard-to-staff, high-need schools; signing bonuses of \$8,000 for teachers who agree to teach hard-to-staff subjects (math, science, special needs, high school subjects with end-of-course exams); and incentive stipend pay of \$115/day, including benefits for attending approved professional development or assuming leadership roles and extra duties that are related to improving student achievement. Stipends are based largely on existing state student achievement assessments that are in place for many subject and grade levels. Student achievement data will be collected from the North Carolina End-of-Grade (EOG) tests for grades 3 through 8 and the End-of-Course (EOC) tests for grades 9 through 12. Teachers who teach a class that does not use a state end-of-year/course exam in year 1 will be eligible for the salary supplement based on school-wide performance. Alternate measures of student achievement will be proposed for years 2 through 5.

http://cecr.ed.gov/initiatives/profiles/pdfs/CommunityTrainingandAssistanceCenter.pdf

#### **Cumberland County**

Teachers are eligible to receive incentives totaling a maximum of \$10,000 and principals are eligible to receive a maximum of \$5,000. There are three levels of reward for teachers – Level I payments are based on student performance; Level II payments focus on attainment of advanced credentials; and Level III payments are designated for Model Classroom leaders. There are two levels of reward for principals – Level I payments are based on professional growth and leadership activities, and Level II payments are based on achieving student growth targets.

http://cecr.ed.gov/initiatives/profiles/pdfs/CumberlandCountySchools.pdf

**Guilford County** 

**NC Race To The Top Application** 

Incentives include professional development, recruitment and retention bonuses, and performance incentives. Incentives are available to kindergarten through second-grade teachers; third- through eighth-grade teachers of math, language arts, or reading; high school math and English teachers; curriculum facilitators; and principals. Teachers are eligible to receive a performance incentive based upon their value-added scores. Administrators are eligible to receive a performance incentive based upon the school meeting AYP and standards established by North Carolina's ABCs of Public Education program. Potential retention/recruitment incentives for teachers and principals range from \$2,500-\$10,000. Performance-based incentives for teachers and principals range from \$2,500-\$5,000.

http://cecr.ed.gov/initiatives/profiles/pdfs/Guilford.pdf

#### <u>Forsyth</u>

[*Note*: Winston-Salem/Forsyth's plan is not an official TIF project, but a description of the model is archived by the Center for Educator Compensation Reform, which is supported by the US Department of Education]

Teachers qualifying for a bonus under any of the four components listed above may elect among four payment options. They may elect 1) A cash bonus; 2) A cash bonus that is income tax deferred into the 401(k), a 403(b), or the 457 plan; 3) An allotment at their school for classroom supplies reimbursement; 4) An allotment at their school for license renewal staff development reimbursement. Teachers must make a separate election for each bonus received, on election forms that will be sent out approximately a month and a half before each bonus payment date. Teachers may elect to split a single bonus payment between options 1) and 2), but may not split a single bonus payment if they elect options 3) or 4).

http://cecr.ed.gov/initiatives/maps/pdfs/CECR NC Winston-Salem.pdf

#### NC Collaborative Project

The North Carolina legislature has approved up to \$2,000 for teachers in Caswell, Greene, Mitchell, Warren, and Washington Counties who demonstrate goals-based success with their students. All elementary and middle school teachers are eligible, regardless of subject area.

NC Race To The Top Application

High school teachers also may request a stipend in support of their pursuit of National Board certification. The bonus is provided on a sliding scale based on a teacher's progress in each of four categories (listed below; up to \$500 per category). The four compensation categories, which are evenly weighted, include:

- Professional Development Based on the number of days attended within calendar year (Aug-Aug).
- 2. Student Performance Based on demonstrated growth in test scores over the year at the classroom level, as well as changes in the proportion of proficient students in a classroom.
- 3. Parent and Community Contact Based on the number of hours spent directly with parents or community, which is documented at the school level and requires principal validation.
- 4. Principal Assessment A teacher can earn \$400 for being rated at standard, or \$500 for being rated above standard.

In addition, the program includes extensive professional development offerings, as well as pay incentives (\$150/day, for up to 11 days) for attending such offerings. There is a one-time signing bonus (up to \$5,000) for math and science teachers, with a priority placed on high school STEM teachers (if no high school in the system needs math and science teachers, then an LEA is able to use the money for elementary and middle level recruitment).

#### **Introduction to SAS EVAAS Value-Added Methodology**

#### Overview

SAS EVAAS value added analyses measure the influence of schooling entities on the academic progress of students at three levels (district, building and classroom). Although statistically robust, all SAS EVAAS<sup>1</sup> analyses are built upon the simple concept of following each student over time, thus utilizing all available scores from each student's informational array to lessen the measurement imprecision of a student's a single score. Inclusion in EVAAS modeling requires that assessment scales meet three criteria:

- 1. A high correlation with curricular objectives
- 2. The capacity to effectively measure the academic performance of students across the entire achievement spectrum; that is, the performance of students at lower achievement levels as well as the performance of state's highest achieving students
- 3. Provide reliable measures year to year for a grade and subject

Although conceptually simple, the statistical rigor necessary to provide precise and reliable information requires that several non-trivial analytical problems be addressed when analyzing longitudinal student data:

- How to accommodate fractured student records and missing data. Simpler approaches introduce
  major biases by either eliminating the data for students with missing scores or by using overly
  simplistic imputation procedures.
- How to exploit all of the longitudinal data for each student when all of the historical data are not on the same scale.
- How to provide educational policy makers flexibility in the use of historical data when testing regimes have changed over time.

The section below provides a brief description of the EVAAS value-added modeling. It provides reliable information for policy makers to be used in accountability decisions and offers hugely important diagnostic benefits for practitioners. Additionally, this modeling assures the flexibility required if policymakers consider changes to existing state testing practices or adding new state tests.

#### EVAAS Value-Added Methodology

EVAAS value-added models use multivariate, longitudinal data structures to provide precise and reliable measures of the influence of educational entities on the academic progress of populations of students. Whether used diagnostically or used as an augmentation of accountability, value-added models offer policy makers a reliable metric to assess the effectiveness of districts, schools, and teachers. In value-added modeling, "all kids count and it is important to make appropriate academic progress with students at all achievement levels." The EVAAS statistical methodology is outlined in detail in Chapter 13, "The Tennessee Value-Added Assessment System," in *Grading Teachers, Grading Schools* (1997). EVAAS value-added modeling would provide educators with estimates of the influence of the district, schools and teachers on the academic gain of their students.

Unlike more simplistic value-added attempts, the robustness of EVAAS modeling allows the measurement of educational influences *without adjustments* for student demographic variables. By relying on the rigor of the analyses to level the playing field for educators, policy makers set similar

In *Grading Teachers, Grading Schools*, edited by Jason Millman, 137-162. Thousand Oaks: Corwin Press. Refer to <a href="http://www.sas.com/govedu/edu/sanderssaxtonhorn.pdf">http://www.sas.com/govedu/edu/sanderssaxtonhorn.pdf</a>.

progress expectations for students of similar entering achievement. The inherent benefit for students is that it should not matter which school they attend. Students with similar previous achievement should expect to receive comparable opportunities to make academic progress. In more simplistic analyses, students are often disadvantaged because demographic adjustments are likely to mask disproportionate assignments of beginning teachers, etc. Likewise, there are consequences for highly effective teachers and schools serving disadvantaged populations in simplistic analyses; with adjustments for race and poverty as a part of the analyses, it becomes increasingly impossible for these highly effective educators to profile at their true effectiveness level. Their effectiveness is "adjusted out" of the analyses under the misguided assumption that *few if any* educators in poor or minority schools are truly effective. Thus, the rigor of EVAAS value-added models protects student opportunity while more fairly assessing the effectiveness of educators.

There are numerous advantages to the EVAAS value-added modeling, some of which are listed below:

- It minimizes the influence of measurement error by using up to five years of data for an individual student. Analyzing all subjects simultaneously increases the precision of the estimates.
- By including all students in the analyses, even those with a sporadic testing history, it provides the most realistic estimate of achievement available for a district or school.
- Because the influence of measurement error is minimized, there is no need to adjust the estimates for socio-economic factors.
- It allows educators to benefit from all tests, even when tests are on differing scales.

### **Rubric for Evaluating North Carolina Teachers (Required)**

This form should be used for the teacher self-assessment, classroom observation, and the summary evaluation.

| ıtion       | a. Teachers lead in their classrooms. Teachers demonstrate leadership by taking responsibility for the progress of all students to ensure that they graduate from high school, are globally competitive for work and postsecondary education, and are prepared for life in the 21st century. Teachers communicate this vision to their students. Using a variety of data sources, they organize, plan, and set goals that meet the needs of the individual student and the class. Teachers use various types of assessment data during the school year to evaluate student progress and to make adjustments to the teaching and learning process. They establish a safe, orderly environment, and create a culture that empowers students to collaborate and become lifelong learners. |                                                                                                    |                                                                                       |                                                                                                                   |                                           |  |  |  |  |  |

### **Examples of Artifacts:**

- Student profiles
- Student surveys
- Cooperation with ESL teachers
- Lessons that integrate international content
- Documentation of referral data and use of IEPs
- Communications with parents/ community
- Professional development on cultural attitudes and awareness
- Use of technology to incorporate cultural awareness into lessons

### Standard III: Teachers know the content they teach

a. Teachers align their instruction with the North Carolina Standard Course of Study. In order to enhance the North Carolina Standard Course of Study, teachers investigate the content standards developed by professional organizations in their specialty area. They develop and apply strategies to make the curriculum rigorous and relevant for all students and provide a balanced curriculum that enhances literacy skills. Elementary teachers have explicit and thorough preparation in literacy instruction. Middle and high school Observation teachers incorporate literacy instruction within the content area or discipline. Not Demonstrated **Developing Proficient Accomplished** Distinguished (Comment Required) . . . and . . . and . . . and Demonstrates an ☐ Understands the Develops and ■ Assists colleagues awareness of the North Carolina applies strategies in applying such North Carolina based on the North Standard Course strategies in their Standard Course Carolina Standard of Study, uses it classrooms. of Study and in preparation of Course of Study and references it in the lesson plans, and standards developed preparation of lesson applies strategies to by professional plans organizations to make the curriculum rigorous and relevant. make the curriculum balanced, rigorous and relevant. ☐ *Elementary:* Begins Elementary: Elementary: ☐ *Elementary:* Makes Integrates effective to integrate literacy Evaluates and necessary changes to instruction in literacy instruction reflects upon the instructional practice selected lessons. throughout the effectiveness of to improve student curriculum. literacy instruction. learning. - Display of creative student work
- Use of NC Standard Course of Study
- Lesson plans
- Content standards

### Standard IV: Teachers facilitate learning for their students

a. Teachers know the ways in which learning takes place, and they know the appropriate levels of intellectual, physical, social, and emotional development of their students. Teachers know how students think and learn. Teachers understand the influences that affect individual student learning (development, culture, language proficiency, etc.) and differentiate their instruction accordingly. Teachers keep abreast of evolving research about student learning. They adapt resources to address the strengths and weaknesses of Observation their students. **Not Demonstrated Proficient** Developing Accomplished Distinguished (Comment Required) . . . and . . . and . . . and ■ Understands Understands ■ Identifies appropriate Encourages and developmental guides colleagues to developmental developmental levels of students levels of students levels of students adapt instruction to and recognizes the and appropriately and consistently align with students' need to differentiate differentiates and appropriately developmental levels. instruction. differentiates instruction. instruction Assesses resources Reviews and uses Stays abreast of needed to address current research about alternative resources. strengths and or adapts existing student learning and weakness of resources to take emerging resources and encourages the students. advantage of student strengths or address school to adopt or weaknesses. adapt them for the benefit of all students. b. Teachers plan instruction appropriate for their students. Teachers collaborate with their colleagues and use a variety of data sources for short- and long-range planning based on the North Carolina Standard Course of Study. These plans reflect an understanding of how students learn. Teachers engage students in the learning process. They understand that instructional plans must be consistently monitored and modified to enhance learning. Teachers make the curriculum responsive to cultural differences and individual learning needs. . . . and . . . and . . . and ■ Recognizes data Uses a variety of data ■ Monitors student ■ Monitors student for short- and longperformance and performance and sources important to planning instruction. range planning of responds to individual responds to cultural instruction. ### Standard V: Teachers reflect on their practice

| tion        | a. Teachers analyze student learning. Teachers think systematically and critically about student learning in their classrooms and schools: why learning happens and what can be done to improve achievement. Teachers collect and analyze student performance data to improve school and classroom effectiveness. They adapt their practice based on research and data to best meet the needs of students. |                                                                                                   |                                                                                                                                                          |                                                                                                                                                                                                          |                                           |  |

| Principal/Evaluator Signature (Signature indicates question | Date |
| above regarding comments has been addressed).               |      |

Note: The teacher's signature on this form represents neither acceptance nor approval of the report. It does, however, indicate that the teacher has reviewed the report with the evaluator and may reply in writing. The signature of the principal or evaluator verifies that the report has been reviewed and that the proper process has been followed according to North Carolina State Board of Education Policy for the Teacher Evaluation Process.

# **Scoring the Rubric**

The principal or evaluator should score each element within a standard. For example, Standard I: Teachers demonstrate leadership has five elements: Teachers lead in their classroom; Teachers demonstrate leadership in school; Teachers lead in the teaching profession; Teachers advocate for schools and students; and Teachers demonstrate high ethical standards. The rater will score each of the elements separately, and the combined individual element scores will determine the overall score for the standard.

The rater should begin with the left-hand column and mark each descriptor that describes the performance of the teacher during the period for which he or she is being evaluated. If the rater is not able to mark any of the descriptors for an element, then the Not Demonstrated column is used. In such a case, the rater must write a comment about what was observed and suggestions for improving performance.

The rating for each descriptor is the lowest rating for which all descriptors are marked. As illustrated in the example that follows, the teacher would be rated as Developing on "Teachers lead in their classrooms" even though at least one descriptor for Proficient, Accomplished, and Distinguished was marked. This is because Developing is the lowest rating for which all descriptors were marked. Likewise, the teacher also would be rated as Proficient on "Teachers demonstrate leadership in the school" and on each of the remaining elements. This is likely to result in an overall rating of Proficient for Standard I.

When a teacher is rated as Developing or Not Demonstrated, the principal or evaluator should strongly encourage the teacher to develop a goal to address the area(s) where proficiency has not been reached.

Section D: Appendix 28

# **Example of Marking the Summary Rating Sheet**

|     | Summary Rating Sheet for Teachers                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Developing | Proficient | Accomplished | Distinguished | Not<br>Demonstrated |  |  |  |  |

# **Summary Rating Sheet (Optional)**

This form summarizes ratings from the rubric or observation form and requires the rater to provide a description of areas needing improvement and comments about performance. It should be completed after each observation and as a part of the Summary Evaluation discussion conducted near the end of the year. It should be used to summarize self-assessment and evaluator ratings.

| Title:     |  |
|            |  |

|    | Standard I: Teachers demonstrate leadership    | Developing | Proficient | Accomplished | Distinguished | Not<br>Demonstrated |
|----|------------------------------------------------|------------|------------|--------------|---------------|---------------------|
| A. | Teachers lead in the classroom.                |            |            |              |               |                     |
| B. | Teachers demonstrate leadership in the school. |            |            |              |               |                     |
| C. | Teachers lead the teaching profession.         |            |            |              |               |                     |
| D. | Teachers advocate for schools and students.    |            |            |              |               |                     |
| E. | Teachers demonstrate high ethical standards.   |            |            |              |               |                     |
|    | Overall rating for Standard I                  |            |            |              |               |                     |

|    | Standard II: Teachers establish a respectful environment for a diverse population of students                  | Developing | Proficient | Accomplished | Distinguished | Not<br>Demonstrated |
|----|----------------------------------------------------------------------------------------------------------------|------------|------------|--------------|---------------|---------------------|
| Α. | Teachers provide an environment in which each child has a positive, nurturing relationship with caring adults. |            |            |              |               |                     |
| B. | Teachers embrace diversity in the school community and in the world.                                           |            |            |              |               |                     |
| С. | Teachers treat students as individuals.                                                                        |            |            |              |               |                     |
| D. | Teachers adapt their teaching for the benefit of students with special needs.                                  |            |            |              |               |                     |
| E. | Teachers work collaboratively with the families and significant adults in the lives of their students.         |            |            |              |               |                     |
|    | Overall rating for Standard II                                                                                 |            |            |              |               |                     |

|    | Standard III: Teachers know the content they teach                                 | Developing | Proficient | Accomplished | Distinguished | Not<br>Demonstrated |
|----|------------------------------------------------------------------------------------|------------|------------|--------------|---------------|---------------------|
| Α. | Teachers align their instruction with the North Carolina Standard Course of Study. |            |            |              |               |                     |
| В. | Teachers know the content appropriate to their teaching specialty.                 |            |            |              |               |                     |
| C. | C. Teachers recognize the interconnectedness of content areas/disciplines.         |            |            |              |               |                     |
| D. | Teachers make instruction relevant to students.                                    |            |            |              |               |                     |
|    | Overall rating for Standard III                                                    |            |            |              |               |                     |

|                                                                                 | Standard IV: Teachers facilitate learning for their students                                                                                                                   | Developing | Proficient | Accomplished | Distinguished | Not<br>Demonstrated |
|---------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|------------|--------------|---------------|---------------------|
| Α.                                                                              | Teachers know the ways in which learning takes place, and they know the appropriate levels of intellectual, physical, social, and emotional development of their students.     |            |            |              |               |                     |
| B.                                                                              | Teachers collaborate with their colleagues and use a variety of data sources for short- and long-range planning based on the <i>North Carolina Standards Course of Study</i> . |            |            |              |               |                     |
| C.                                                                              | Teachers use a variety of instructional methods.                                                                                                                               |            |            |              |               |                     |
| D. Teachers integrate and utilize technology in their instruction.              |                                                                                                                                                                                |            |            |              |               |                     |
| E. Teachers help students develop critical-thinking and problem-solving skills. |                                                                                                                                                                                |            |            |              |               |                     |
| F. Teachers help students work in teams and develop leadership qualities.       |                                                                                                                                                                                |            |            |              |               |                     |
| G.                                                                              | Teachers communicate effectively.                                                                                                                                              |            |            |              |               |                     |
| Н.                                                                              | Teachers use a variety of methods to assess what each student has learned.                                                                                                     |            |            |              |               |                     |
|                                                                                 | Overall rating for Standard IV                                                                                                                                                 |            |            |              |               |                     |
|                                                                                 |                                                                                                                                                                                |            |            |              |               |                     |

Note: The teacher's signature on this form represents neither acceptance nor approval of the report. It does, however, indicate that the teacher has reviewed the report with the evaluator and may reply in writing. The signature of the principal or evaluator verifies that the report has been reviewed and that the proper process has been followed according to North Carolina State Board of Education Policy for the Teacher Evaluation Process.

Principal/Evaluator Signature (Signature indicates question

above regarding comments has been addressed).

Note: The teacher's signature on this form represents neither acceptance nor approval of the report. It does, however, indicate that the teacher has reviewed the report with the evaluator and may reply in writing. The signature of the principal or evaluator verifies that the report has been reviewed and that the proper process has been followed according to North Carolina State Board of Education Policy for the Teacher Evaluation Process.

# Rubric for Evaluating North Carolina Principals/Self-Assessment Form (Required)

This form **must** be completed by the principal as a part of the self-assessment process and by the superintendent or designee in preparation for the summary evaluation conference.

### **Standard 1: Strategic Leadership**

Principals will create conditions that result in strategically re-imaging the school's vision, mission, and goals in the 21<sup>st</sup> century. Understanding that schools ideally prepare students for an unseen but not altogether unpredictable future, the leader creates a climate of inquiry that challenges the school community to continually re-purpose itself by building on its core values and beliefs about its preferred future and then developing a pathway to reach it.

a. School Vision, Mission and Strategic Goals: The school's identity, in part, is derived from the vision, mission, values, beliefs and goals of the school, the processes used to establish these attributes, and the ways they are embodied in the life of the school community. **Not Demonstrated Developing Proficient** Accomplished Distinguished (Comment Required) . . . and . . . and . . . and ■ Develops his/her own Leads and Creates with Ensures that the vision of the changing implements a process stakeholders a vision school's identity world in the 21st for developing a for the school that (vision, mission, century that schools shared vision and captures peoples' values, beliefs and are preparing children strategic goals for attention and goals) actually drive to enter decisions and inform student achievement imagination the culture of the that reflect high Designs and expectations for school implements students and staff collaborative ■ Initiates changes Maintains a focus processes to collect to vision and goals on the vision and and analyze data based on data to strategic goals about the school's improve performance, throughout the school progress for the school culture and periodic review school success vear and revision of the school's vision, mission, and strategic b. Leading Change: The principal articulates a vision, and implementation strategies, for improvements and changes which result in improved achievement for all students. . . . and . . . and . . . and Identifies changes Systematically ■ Adapts/varies Is a driving force necessary for the considers new and leadership style behind major initiatives that help improvement of better ways of leading according to the student learning for improved student changing needs students acquire 21st achievement and of the school and century skills engages stakeholders community ■ Systematically in the change process ☐ Is comfortable with challenges the status major changes quo by leading change in implementing with potentially processes and beneficial outcomes accomplishing tasks Routinely and systematically communicates the impacts of change processes to all stakeholders

**c. School Improvement Plan:** The school improvement plan provides the structure for the vision, values, goals and changes necessary for improved achievement for all students.

### Suggested Artifacts for Standard 1:

- School Improvement Plan
- NC Teacher Working Conditions Survey
- Evidence of School Improvement Team
- Student achievement and testing data
- Statement of school vision, mission, values, beliefs and goals
- Evidence of stakeholder involvement in development of vision, mission, value, belief and goal statements
- Evidence of shared decision making and distributed leadership

### **Standard 2: Instructional Leadership**

Principals set high standards for the professional practice of 21st century instruction and assessment that result in a no-nonsense accountable environment. The school executive must be knowledgeable of best instructional and school practices and must use this knowledge to cause the creation of collaborative structures within the school for the design of highly engaging schoolwork for students, the on-going peer review of this work, and the sharing of this work throughout the professional community.

a. Focus on Learning and Teaching, Curriculum, Instruction and Assessment: The principal leads the discussion about standards for curriculum, instruction and assessment based on research and best practices in order to establish and achieve high expectations for students.

### Suggested Artifacts for Standard 2:

- School Improvement Plan
- NC Teacher Working Conditions Survey
- Student achievement and testing data
- Student drop-out data
- Teacher retention data
- Documented use of formative assessment instruments to impact instruction
- Development and communication of goal-oriented personalized education plans for identified students
- Evidence of team development and evaluation of classroom lessons
- Use of research-based practices and strategies in classrooms
- Master school schedule documenting individual and collaborative planning for every teacher

### Standard 3: Cultural Leadership

Principals will understand and act on the understanding of the important role a school's culture plays in contributing to the exemplary performance of the school. Principals must support and value the traditions, artifacts, symbols and positive values and norms of the school and community that result in a sense of identity and pride upon which to build a positive future. A principal must be able to "re-culture" the school if needed to align with school's goals of improving student and adult learning and to infuse the work of the adults and students with passion, meaning and purpose. Cultural leadership implies understanding the school and the people in it each day, how they came to their current state, and how to connect with their traditions in order to move them forward to support the school's efforts to achieve individual and collective goals.

a. Focus on Collaborative Work Environment: The principal understands and acts on the understanding of the positive role that a collaborative work environment can play in the school's culture. **Not Demonstrated Developing Proficient Accomplished** Distinguished (Comment Required) . . . and . . . and . . . and ■ Understands Designs elements ■ Utilizes a collaborative Establishes a characteristics of a of a collaborative work environment collaborative work collaborative work and positive work predicated on siteenvironment which environment within environment within based management promotes cohesion the school the school and decision and cooperation making, a sense among staff Understands the Participates in and of community, and relies upon the importance of data ☐ Facilitates the cooperation within the gained from the School Improvement collaborative (team) school Teacher Working Team and other design, sharing, Conditions Survey stakeholder voices to Monitors the evaluation, and and other data make decisions about implementation and archiving of rigorous, sources from parents, school policies response to school relevant, and students, teachers policies and provides engaging instructional ■ Utilizes data gained and stakeholders feedback to the lessons that ensure from the Teacher that reflect on the School Improvement students acquire Working Conditions teaching and learning Team for their essential knowledge Survey and other environment within consideration and skills sources to understand the school. perceptions of the ■ Initiates changes work environment resulting from data gained from the Teacher Working Conditions Survey and other sources b. - Evidence of shared decision making and distributed leadership
- Recognition criteria and structure utilized

- Documented use of School Improvement Team in decision making
- Student achievement and testing data
- Existence and work of professional learning communities
- Teacher retention data

### **Standard 4: Human Resource Leadership**

Principals will ensure that the school is a professional learning community. Principals will ensure that process and systems are in place which results in recruitment, induction, support, evaluation, development and retention of high performing staff. The principal must engage and empower accomplished teachers in a distributive manner, including support of teachers in day-to-day decisions such as discipline, communication with parents/guardians, and protecting teachers from duties that interfere with teaching, and must practice fair and consistent evaluations of teachers. The principal must engage teachers and other professional staff in conversations to plan their career paths and support district succession planning.

| a. Professional Development/Learning Communities: The principal ensures that the school is a professional learning community.                      |                                                                                                                                                                              |                                                                                                                                                           |                                                                                                                                                                                                                                   |                                        |  |

| Adheres to legal requirements for teacher and staff evaluation | and  Creates processes to provide formal feedback to teachers concerning the effectiveness of their classroom instruction and ways to improve their instructional practice  Implements district and state evaluation policies in a fair and equitable manner | and  Utilizes multiple assessments to evaluate teachers and other staff members  Evaluates teachers and other staff in a fair and equitable manner and utilizes the results of evaluations to improve instructional practice | and  Analyzes the results of teacher and staff evaluations holistically and utilizes the results to direct professional development opportunities in the school |                                        |

### Suggested Artifacts for Standard 4:

- School Improvement Plan
- NC Teacher Working Conditions Survey
- Student achievement and testing data
- Teacher retention data
- National Board Certification
- Teacher professional growth plans
- Master school schedule documenting individual and collaborative planning for every teacher
- Number of National Board Certified Teachers
- Number of teachers pursuing advanced degrees
- Record of professional development provided staff
- Impact of professional development on student learning
- Mentor records and beginning teacher feedback

### Standard 5: Managerial Leadership

Principals will ensure that the school has processes and systems in place for budgeting, staffing, problem solving, communicating expectations and scheduling that result in organizing the work routines in the building. The principal must be responsible for the monitoring of the school budget and the inclusion of all teachers in the budget decision so as to meet the 21st century needs of every classroom. Effectively and efficiently managing the complexity of everyday life is critical for staff to be able to focus its energy on improvement.

a. School Resources and Budget: The principal establishes budget processes and systems which are focused on, and result in, improved student achievement. **Not Demonstrated Developing Proficient Accomplished** Distinguished (Comment Required) . . . and . . . and . . . and ☐ Is knowledgeable ■ Incorporates the Designs transparent ■ Ensures the strategic of school budget input of the School systems to equitably allocation and and accounting manage human and Improvement Team in equitable use of procedures budget and resource financial resources financial resources to meet instructional decisions ■ Utilizes input from

- **b. Conflict Management and Resolution:** The principal effectively and efficiently manages the complexity of human interactions so that the focus of the school can be on improved student achievement.
- ☐ Demonstrates awareness of potential problems and/or areas of conflict within the school

| <ul> <li>Understands the importance of clear expectations, structures, rules and procedures for students and staff</li> <li>Understands district and state policy and law related to student conduct, etc.</li> </ul> | Collaboratively develops clear expectations, structures, rules and procedures for students and staff through the School Improvement Team  Effectively implements district rules and procedures | and  Communicates and enforces clear expectations, structures, and fair rules and procedures for students and staff | ∴ . and     Systematically monitors issues around compliance with expectations, structures, rules and expectations. Utilizes staff and student input to resolve such issues     Regularly reviews the need for changes to expectations, structures, rules and expectations |                                        |

### Suggested Artifacts for Standard 5:

- School Improvement Plan
- NC Teacher Working Conditions Survey
- School financial information
- School safety and behavioral expectations
- Master school schedule documenting individual and collaborative planning for every teacher
- Evidence of formal and informal systems of communication
- Dissemination of clear norms and ground rules
- Evidence of ability to confront ideological conflict and then reach consensus

### **Standard 6: External Development Leadership**

A principal will design structures and processes that result in community engagement, support, and ownership. Acknowledging that schools no longer reflect but, in fact, build community, the leader proactively creates with staff, opportunities for parents/guardians, community and business representatives to participate as "stockholders" in the school such that continued investment of resources and good will are not left to chance.

a. Parent and Community Involvement and Outreach: The principal designs structures and processes which result in parent and community engagement, support and ownership for the school.

| Developing                                                                                                                                                                                                                                                           | Proficient                                                                                                                                                                                               | Accomplished                                                                                                                                                                        | Distinguished                                                                                                                                                                                                                                                                            | Not Demonstrated<br>(Comment Required) |

#### Suggested Artifacts for Standard 6:

- Parent involvement in School Improvement Team
- NC Teacher Working Conditions Survey
- PTSA/Booster club operation and participation
- Parent survey results

- Evidence of business partners and projects involving business partners
- Plan for shaping the school's image throughout the community
- Evidence of community support
- Number and use of school volunteers

### **Standard 7: Micro-political Leadership**

Principals will build systems and relationships that utilize the staff's diversity, encourage constructive ideological conflict in order to leverage staff expertise, power and influence in order to realize the school's vision for success. The principal will also creatively employ an awareness of staff's professional needs, issues, and interests to build cohesion and to facilitate distributed governance and shared decision making.

School Executive Micro-political Leadership: The principal develops systems and relationships to leverage staff expertise and influence in order to influence the school's identity, culture and performance.

| ☐ Maintains high visibility and is easily accessible throughout the school | □ Is aware of the expertise, power and influence of staff members, and demonstrates sensitivity to their personal and professional needs | ■ Builds systems and relationships that utilize the staff's diversity, ideological differences and expertise to realize the school's goals | ☐ Creatively employs an awareness of staff's professional needs, issues and interests to build cohesion and to facilitate distributed governance and shared decisionmaking |                                        |

### Suggested Artifacts for Standard 7:

- NC Teacher Working Conditions Survey
- Teacher retention data

- Evidence of visibility and accessibility
- Evidence of shared decision making and distributed leadership

### **Scoring the Rubric**

The Rubric for Evaluating North Carolina Principals is to be scored for each element within a standard. For example, Standard 1: Strategic Leadership has four elements: a) School Vision, Mission and Strategic Goals; b) Leading Change; c) School Improvement Plan; and d) Distributive Leadership. The rater will score each of the elements separately, and the individual element scores will determine the overall score for the standard.

The rater should begin with the left-hand column and mark each descriptor that describes the performance of the principal during the period for which he or she is being evaluated. If the rater is not able to mark any of the descriptors, then the "Not Demonstrated" column is used. In such a case, the rater must write a comment about why the principal was not able to demonstrate proficiency on the element.

The rating for each element is the lowest rating for which all descriptors are marked. As illustrated in the example that follows, the principal would be rated as "Proficient" on School Vision, Mission and Strategic Goals even though at least one descriptor for "Accomplished" and "Distinguished" was marked. This is because "Proficient" is the lowest rating for which all descriptors were marked. Likewise, the principal would be rated as "Proficient" on Leading Change, "Developing" on School Improvement Plan, and "Developing" on Distributive Leadership. This would result in an overall rating of "Proficient" for Standard 1 because of the number of marked items in the "Accomplished" and "Distinguished" columns.

When a principal is rated as "Developing" or "Not Demonstrated," the superintendent or designee should strongly encourage the principal to develop a goal to address the area(s) where proficiency has not been reached.

### **Principal Summary Evaluation Worksheet (Optional)**

This form may be used to summarize self-assessment and evaluation ratings in preparation for the mid-year and summary evaluation conferences. It may also be used as a record of walkthrough findings.

The Mid-year and Summary Evaluation Conferences are required for every North Carolina Principal. In addition, observations and other relevant sources of performance may be considered in determining the final rating for the principal.

The guiding mission of the North Carolina State Board of Education is that every public school student will graduate from high school, globally competitive for work and postsecondary education and prepared for life in the 21<sup>st</sup> century. Pursuant to North Carolina Board of Education Policy, each LEA shall provide for the evaluation of all professional employees pursuant to G.S. 115C-333.

The following rating scale will be used for evaluating North Carolina school principals:

- Developing: Principal demonstrated adequate growth toward achieving standard(s) during the period of performance, but did not demonstrate competence on standard(s) of performance.
- **Proficient:** Principal demonstrated basic competence on standard(s) of performance.
- Accomplished: Principal exceeded basic competence on standard(s) for performance most of the time.
- **Distinguished:** Principal consistently and significantly exceeded basic competence on standard(s) of performance.
- Not Demonstrated: Principal did not demonstrate competence on or adequate progress toward achieving standard(s) of performance.

Note: If the Not Demonstrated" rating is used, the superintendent must comment about why it was used.

## **Goal Setting Worksheet (Optional)**

Use this form to identify professional growth goals based on data gathered from artifacts and other sources.

## **Targeted Professional Growth Goals:**

| Data<br>Source | Identified Strengths and Growth Areas | Identified Data Patterns or Trends | Corresponding<br>Standard and<br>Element |
|----------------|---------------------------------------|------------------------------------|------------------------------------------|
|                | Strength:                             |                                    |                                          |
|                | Growth Area:                          |                                    |                                          |
|                | Strength:                             |                                    |                                          |

## High-minority and low-minority schools, as defined by the State in its Teacher Equity Plan, North Carolina's Equity Plan for Highly Qualified Teachers (2009)

In the state's 2009 teacher equity plan, schools minority population status is reported by quartile. Quartile 1 is comprised of schools with the highest proportions of minority students, and Quartile 4 is comprised of schools with lowest proportions of minority students.

## North Carolina's Equity Plan For Highly Qualified Teachers

September 29, 2006

#### North Carolina's Equity Plan For Highly Qualified Teachers

North Carolina is committed to ensuring that every public school student will graduate from high school, globally competitive for work and postsecondary education and prepared for life in the 21<sup>st</sup> Century. Because of the critical role of teachers in actualizing this commitment, North Carolina is also committed to ensuring that every child has competent, caring, and qualified teachers. In an effort to recruit and retain quality teachers, North Carolina has implemented many initiatives including scholarships for prospective teachers that are paid back through working in the public schools, revising licensure policies to eliminate barriers and facilitate the licensing of teachers from other states, creating accelerated alternate routes to teaching, providing a three-year induction program for new teachers, providing salary incentives for teachers who earn National Board Certification and/or master's degrees, and assessing teacher working conditions. (A summary of these initiatives can be found in Appendix A.)

The Office of the Governor and the North Carolina General Assembly are acutely aware of the state's need for quality teachers. In addition to a salary increase at the beginning of the 2005-06 school year, teachers received an additional annualized increase during the school year. The 2006-07 budget included an average salary increase of 8% for teachers, 2.5% more than other state employees received. Within the last year, the salary for beginning teachers has increased 10.5%, from \$25,510 to \$28,510.

Even with these efforts, North Carolina, like a number of other states, has a teacher shortage. North Carolina's need for teachers is a result of a growing student population, efforts to reduce class size, and teacher attrition. Each year, for the past decade, we have hired approximately 10,000 new teachers. Our 48 colleges and universities with approved teacher education programs produce approximately 3,300 candidates annually. Of these, approximately two-thirds begin teaching in North Carolina within a year of program completion. The remainder of new hires comes from other states or through alternative route (lateral entry) programs.

#### **Teacher Distribution**

While systems in all geographic areas of the state report difficulty recruiting and retaining teachers, there are differences between and within school systems in the need for teachers. Systems throughout the state consistently report difficulty in finding math, science, and special education teachers. This is in line with the fact that more than half (54%) of all the alternative route (lateral entry) licenses issued in North Carolina are in math, science, and special education. In addition, of the teachers not yet highly qualified, 37% are special education teachers. Analysis of the courses taught by teachers not yet highly qualified (exclusive of special education) reveals that 16% are math and 15% are science. Out-of-field teaching assignments are included in the not HQT percentages. There are systems in the state, however, that even have difficulty finding elementary teachers, and in fact, 7% of the lateral entry licenses issued are for elementary teachers. These latter systems tend to be the rural, low-wealth systems.

Based on extended discussions with personnel administrators across the state, and extensive analysis of the data we have at the state level on a variety of teacher characteristics at the school system and school levels, it is clear that North Carolina does not have a single, isolated

distribution problem. Rather, North Carolina has a multi-faceted problem of teacher shortage and teacher distribution. North Carolina needs special education, math, and science teachers. North Carolina also needs elementary teachers, and arts teachers, and middle school teachers, and English as a Second Language teachers, and second language teachers willing to teach in rural, low-wealth areas, hard-to-staff urban school areas, and high growth areas. Because we have a multi-faceted problem, we have adopted a variety of strategies (described later in this plan) to address the shortage and distribution of teachers in schools across the state.

Information on teacher experience and HQT status based on whether or not schools made AYP, whether or not schools made high growth, school performance composites, school poverty levels, and school minority populations is reflected in the following tables. Because our 2005-06 AYP data will not be available until later this fall, performance data from the 2004-05 school year school year was utilized.

## Comparison of Teacher HQT Status and Experience Based on AYP Status and High Growth Status

## Formal University-School Partnerships

#### **Descriptions of the TRSI Partner Organizations**

Teach for America – Teach For America (TFA) works to eliminate educational inequity by enlisting the nation's future leaders in the effort. They recruit top recent college graduates and select those who demonstrate the potential to be successful teachers and exert broader societal influence. They then place the teachers (corps members) in schools in 29 urban and rural regions across the nation provide the training and ongoing professional development they need to lead their students to significant academic gains. They also can consult on recruitment strategies, initial cohort experience, and induction experience, as well as provide experienced alumni for RTI staffing.

New Teacher Center – The New Teacher Center (NTC) is a national organization dedicated to improving student learning by accelerating the effectiveness of teachers and school leaders. NTC strengthens school communities through proven mentoring and professional development programs, online learning environments, policy advocacy, and essential research. NTC, with input from LEAs related to their specific rural needs, will tailor a program of mentoring and teacher induction for program participants. They will train the teachers who are selected as full-time mentors with summer Mentor Academies and monthly Mentor Forums, building a community of practice that will be sustained after the grant. The NTC's statewide survey of NC teacher working conditions will be used as a basis for leadership development and support for principals in the LEAs.

NC Center for the Advancement of Teaching – The North Carolina Center for the Advancement of Teaching is a professional development center providing dynamic study and advanced learning opportunities for North Carolina teachers. NCCAT's instructional programs increase teacher quality, effectiveness, and innovation in the classroom, while inspiring teachers to provide a world-class education for the students of North Carolina.

NC New Schools Project – The NC New Schools Project (NCNSP), a non-profit organization, was created by the Office of the Governor and the NC Education Cabinet, with support from the Gates Foundation, to develop models for redesigned and new high schools and to support their successful implementation. NCNSP has developed 105 small, innovative high schools in 64 of the state's 115 LEAs, enrolling more than 21,000 students in the 2009-10 school year. These schools are largely located in the state's most economically depressed areas, and they serve high percentages of minority, low-income, and "first generation college" populations. Twenty-one of these schools are located in the 16 districts classified by the state as lowest-achieving.

## **North Carolina Mentoring and Induction Program**

#### North Carolina Mentor Task Force

The Mentor Task Force, after meeting in fall 2008, was charged by the State Board in January 2009 to create recommendations for consideration by the Board in four areas. With the generous support of the Duke Endowment through a grant to the New Teacher Center, the Task Force met on May 27, 2009, and June 24, 2009, to produce the first of four recommendations:

#### 1. Create new program standards for consideration by the Board that:

- Create program standards around identified induction purpose areas and design elements such as mentor selection, training, ongoing support, time, optimal working conditions, professional growth, etc.
- Align mentor program design, expectations and outcomes with the state's Professional Teaching Standards and the Teacher Evaluation System rubric for growth
- Develop a rubric, innovation configuration or other means to articulate clearly the different levels of intensity of support in each program standard area—from a developing program to a distinguished induction program—allowing districts to better place themselves and consider ways to improve programs
- 2. Establish a network of mentor programs. With a set of program standards that is based not only on meeting minimal requirements, but aspiring toward excellence, a way to assist districts in their efforts to provide the highest quality induction must be considered. Induction program directors, with the organizational support of the Department of Public Instruction, are in the best position to provide their colleagues with guidance, support, feedback and improvement strategies. These peer review networks can provide districts with contextualized support and feedback as they improve, and the state a means of ensuring minimal expectations are met.
- 3. Develop and provide training to mentors. The Department of Public Instruction will develop a training program for all North Carolina mentors. The training will include indepth analysis of the North Carolina Professional Teaching Standards and the matching evaluation instrument. It will also include instruction in literacy, language development, strategies for working with diverse student populations, and the needs of English language learners. Mentors will also receive training in coaching and observational skills, giving feedback, equity pedagogy, group facilitation skills, and the development and management of Professional Learning Communities.

4. Review and update the current North Carolina State Board of Education policies on the Beginning Teacher Support Program. In June of 2007, the North Carolina State Board of Education adopted the North Carolina Professional Teaching Standards. These standards are the basis for teacher preparation, teacher evaluation, and professional development and as such form the foundation for mentor support programs. The current State Board of Education policies on Beginning Teacher Support Programs do not currently reflect these new standards. The mentor taskforce proposes to review and update (as necessary) current North Carolina State Board of Education policies to ensure alignment with the new North Carolina Professional Teaching Standards.

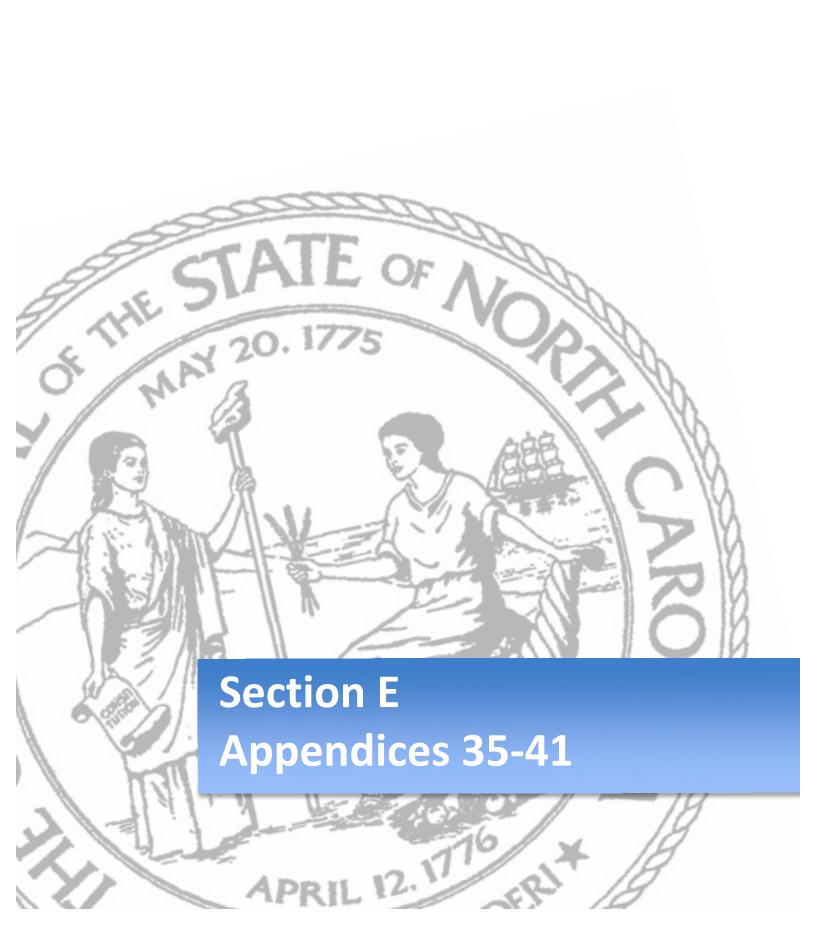

Other recommendations will be worked on by the Task Force in Summer/Fall 2009 for submission to the State Board in January/February 2010.

## **Vision for Mentoring and Induction**

The North Carolina Professional Teaching Standards establish a powerful vision for the roles of teachers in their classrooms and schools in the 21<sup>st</sup> Century. The standards challenge teachers to:

- Pursue leadership opportunities in their school, district and community
- Make the content they teach engaging, relevant and meaningful to students' lives
- Teach existing core content that is revised to foster the abilities of students to think critically, problem solve and use information technology responsibly
- Nurture classroom environments that help students discover how to learn, innovate, collaborate and communicate their ideas
- Incorporate global awareness, civic literacy, financial literacy and health awareness in the core content areas
- Utilize interdisciplinary instructional approaches and relationships with home and community in the learning process
- Reflect on their practice and craft assessments that are authentic and structured and place an emphasis on the demonstration of knowledge
- Develop the value of lifelong learning and the joy of encouraging their students to learn and grow

The attainment of this vision is challenging for all educators and is particularly daunting for the newest teachers in the profession. Close to twenty-five per cent - over 22,000 - of North Carolina's teachers are in their first three years in the profession. Of these beginning teachers, twenty-six percent - approximately 6,000 - are starting their teaching careers prior to earning a Standard Professional I license. If the beginning teachers of North Carolina are going to be able to meet the state's professional teaching standards, impact the learning of all students in distinguished ways, choose to remain in the profession and become future master teachers, teacher leaders and skilled administrators and superintendents, then a quality induction program to support the instructional growth of beginning teachers must be in place in each of the 115 school districts in the state.

AN ACT to establish the innovative education initiatives act.

The General Assembly of North Carolina enacts:

**SECTION 1.** Chapter 116C of the General Statutes is amended by adding the following new section to read:

#### "§ 116C-4. First in America Innovative Education Initiatives Act.

- (a) The General Assembly strongly endorses the Governor's goal of making North Carolina's system of education first in America by 2010. With that as the goal, the Education Cabinet shall set as a priority cooperative efforts between secondary schools and institutions of higher education so as to reduce the high school dropout rate, increase high school and college graduation rates, decrease the need for remediation in institutions of higher education, and raise certificate, associate, and bachelor degree completion rates. The Cabinet shall identify and support efforts that achieve the following purposes:
  - (1) Support cooperative innovative high school programs developed under Part 9 of Article 16 of Chapter 115C of the General Statutes.
  - (2) Improve high school completion rates and reduce high school dropout rates.
  - (3) Close the achievement gap.
  - (4) Create redesigned middle schools or high schools.
  - (5) Provide flexible, customized programs of learning for high school students who would benefit from accelerated, higher level coursework or early graduation.
  - (6) Establish high quality alternative learning programs.
  - (7) Establish a virtual high school.
  - (8) Implement other innovative education initiatives designed to advance the State's system of education.
- (b) The Education Cabinet shall identify federal, State, and local funds that may be used to support these initiatives. In addition, the Cabinet is strongly encouraged to pursue private funds that could be used to support these initiatives.
- (c) The Cabinet shall report by January 15, 2004, and annually thereafter, to the Joint Legislative Education Oversight Committee on its activities under this section. The annual reports may include recommendations for statutory changes needed to support cooperative innovative initiatives, including programs approved under Part 9 of Article 16 of Chapter 115C of the General Statutes."
- **SECTION 2.** Article 16 of Chapter 115C of the General Statutes is amended by adding the following new Part to read:

"Part 9. Cooperative Innovative High School Programs.

## "§ 115C-238.50. Purpose.

- (a) The purpose of this Part is to authorize boards of trustees of community colleges and local boards of education to jointly establish cooperative innovative programs in high schools and community colleges that will expand students' opportunities for educational success through high quality instructional programming. These cooperative innovative high school programs shall target:
  - (1) High school students who are at risk of dropping out of school before attaining a high school diploma; or
  - (2) High school students who would benefit from accelerated academic instruction.

Section E: Appendix 39

(b) All the cooperative innovative high school programs established under this Part shall:

- (1) Prepare students adequately for future learning in the workforce or in an institution of higher education.
- (2) Expand students' educational opportunities within the public school system.
- (3) Be centered on the core academic standards represented by the college preparatory or tech prep program of study as defined by the State Board of Education.
- (4) Encourage the cooperative or shared use of resources, personnel, and facilities between public schools and community colleges.
- (5) Integrate and emphasize both academic and technical skills necessary for students to be successful in a more demanding and changing workplace.
- (6) Emphasize parental involvement and provide consistent counseling, advising, and parent conferencing so that parents and students can make responsible decisions regarding course taking and can track the students' academic progress and success.
- (7) Be held accountable for meeting measurable student achievement results.
- (8) Encourage the use of different and innovative teaching methods.
- (9) Establish joint institutional responsibility and accountability for support of students and their success.
- (10) Effectively utilize existing funding sources for high school, community college, and vocational programs and actively pursue new funding from other sources.
- (11) Develop methods for early identification of potential participating students in the middle grades and through high school.
- Reduce the percentage of students needing remedial courses upon their initial entry from high school into a college or university.
- (c) Programs developed under this Part that target students who are at risk of dropping out of high school before attaining a high school diploma shall:
  - (1) Provide these students with the opportunity to graduate from high school possessing the core academic skills needed for postsecondary education and high-skilled employment.
  - (2) Enable students to complete a technical or academic program in a field that is in high demand and has high wages.
  - (3) Set and achieve goals that significantly reduce dropout rates and raise high school and community college retention, certification, and degree completion rates.
  - (4) Enable students who complete these programs to pass employer exams, if applicable.
- (d) Cooperative innovative high school programs that offer accelerated learning programs shall:
  - (1) Provide a flexible, customized program of instruction for students who would benefit from accelerated, higher level coursework or early graduation from high school.
  - (2) Enable students to obtain a high school diploma in less than four years and begin or complete an associate degree program or to master a certificate or vocational program.
  - (3) Offer a college preparatory academic core and in-depth studies in a career or technical field that will lead to advanced programs or employment opportunities in engineering, health sciences, or

teaching.

- (e) Cooperative innovative high school programs may include the creation of a school within a school, a technical high school, or a high school or technical center located on the campus of a community college.
  - (f) Students are eligible to attend these programs as early as ninth grade.

"§ 115C-238.51. Application process.

(a) A local board of education and a local board of trustees of a community college shall jointly apply to establish a cooperative innovative high school program under this Part.

(b) The application shall contain at least the following information:

- (1) A description of a program that implements the purposes in G.S. 115C-238.50.
- (2) A statement of how the program relates to the Economic Vision Plan adopted for the economic development region in which the program is to be located.
- (3) The facilities to be used by the program and the manner in which administrative services of the program are to be provided.
- (4) A description of student academic and vocational achievement goals and the method of demonstrating that students have attained the skills and knowledge specified for those goals.
- (5) A description of how the program will be operated, including budgeting, curriculum, transportation, and operating procedures.
- (6) The process to be followed by the program to ensure parental involvement.
- (7) The process by which students will be selected for and admitted to the program.
- (8) A description of the funds that will be used and a proposed budget for the program. This description shall identify how the average daily membership (ADM) and full-time equivalent (FTE) students are counted.
- (9) The qualifications required for individuals employed in the program.
- (10) The number of students to be served.
- A description of how the program's effectiveness in meeting the purposes in G.S. 115C-238.50 will be measured.
- (c) The application shall be submitted to the State Board of Education and the State Board of Community Colleges by November 1 of each year. The State Board of Education and the State Board of Community Colleges shall appoint a joint advisory committee to review the applications and to recommend to the State Boards those programs that meet the requirements of this Part and that achieve the purposes set out in G.S. 115C-238.50.
- (d) The State Board of Education and the State Board of Community Colleges shall approve two cooperative innovative high school programs in each of the State's economic development regions. The State Boards may approve programs recommended by the joint advisory committee or may approve other programs that were not recommended. The State Boards shall approve all applications by March 15 of each year. No application shall be approved unless the State Boards find that the application meets the requirements set out in this Part and that granting the application would achieve the purposes set out in G.S. 115C-238.50. Priority shall be given to applications that are most likely to further State education policies, to address the economic development needs of the economic development regions in which they are located, and to strengthen the educational programs offered in the

Section E: Appendix 39

local school administrative units in which they are located.

## "§ 115C-238.52. Participation by other education partners.

- (a) Any or all of the following education partners may participate in the development of a cooperative innovative program under this Part that is targeted to high school students who would benefit from accelerated academic instruction:
  - (1) A constituent institution of The University of North Carolina.
  - (2) A private college or university located in North Carolina.
  - (3) A private business or organization.
  - (4) The county board of commissioners in the county in which the program is located.
- (b) Any or all of the education partners listed in subsection (a) of this section that participate shall:
  - (1) Jointly apply with the local board of education and the local board of trustees of the community college to establish a cooperative innovative program under this Part.
  - (2) Be identified in the application.
  - (3) Sign the written agreement under G.S. 115C-238.53(b).

#### **"§ 115C-238.53. Program operation.**

- (a) A program approved by the State shall be accountable to the local board of education.
- (b) A program approved under this Part shall operate under the terms of a written agreement signed by the local board of education, local board of trustees of the community college, State Board of Education, and State Board of Community Colleges. The agreement shall incorporate the information provided in the application, as modified during the approval process, and any terms and conditions imposed on the program by the State Board of Education and the State Board of Community Colleges. The agreement may be for a term of no longer than five school years.
- (c) A program may be operated in a facility owned or leased by the local board of education, the local board of trustees of the community college, or the education partner, if any.
- (d) A program approved under this Part shall provide instruction each school year for at least 180 days during nine calendar months, shall comply with laws and policies relating to the education of students with disabilities, and shall comply with Article 27 of this Chapter.
- (e) A program approved under this Part may use State, federal, and local funds allocated to the local school administrative unit, to the State Board of Community Colleges, and to the community college to implement the program. If there is an education partner and if it is a public body, the program may use State, federal, and local funds allocated to that body.
- (f) Except as provided in this Part and pursuant to the terms of the agreement, a program is exempt from laws and rules applicable to a local board of education, a local school administrative unit, a community college, or a local board of trustees of a community college.

**"§ 115C-238.54. Funds for programs.** 

(a) The Department of Public Instruction shall assign a school code for each program that is approved under this Part. All positions and other State and federal allotments that are generated for this program shall be assigned to that school code. Notwithstanding G.S. 115C-105.25, once funds are assigned to that school code, the local board of education may use these funds for the program and may transfer these funds between funding allotment categories.

Section E: Appendix 39

- (b) The local board of trustees of a community college may allocate State and federal funds for a program that is approved under this Part.
- (c) An education partner under G.S. 115C-238.52 that is a public body may allocate State, federal, and local funds for a program that is approved under this Part.
- (d) If not an education partner under G.S. 115C-238.52, a county board of commissioners in a county where a program is located may nevertheless appropriate funds to a program approved under this Part.
- (e) The local board of education and the local board of trustees of the community college are strongly encouraged to seek funds from sources other than State, federal, and local appropriations. They are strongly encouraged to seek funds the Education Cabinet identifies or obtains under G.S. 116C-4.

"§ 115C-238.55. Evaluation of programs.

The State Board of Education and the State Board of Community Colleges shall evaluate the success of students in programs approved under this Part. Success shall be measured by high school retention rates, high school completion rates, high school dropout rates, certification and associate degree completion, admission to four-year institutions, postgraduation employment in career or study-related fields, and employer satisfaction of employees who participated in and graduated from the programs. Beginning October 15, 2005, and annually thereafter, the Boards shall jointly report to the Joint Legislative Education Oversight Committee on the evaluation of these programs. If, by October 15, 2006, the Boards determine any or all of these programs have been successful, they shall jointly develop a prototype plan for similar programs that could be expanded across the State. This plan shall be included in their report to the Joint Legislative Education Oversight Committee that is due by October 15, 2007.

"§§ 115C-238.56 through 115C-238.59: Reserved for future codification purposes."

Education shall identify, strengthen, and adopt policies and procedures that encourage students to remain in high school rather than to drop out and that encourage all students to pursue a rigorous academic course of study. As part of this process, the State Board and the local school administrative units are encouraged to eliminate or revise any policies or procedures that discourage some students from completing high school or that discourage any student from pursuing a rigorous academic course of study. No later than March 1, 2004, local school administrative units shall report to the State Board of Education the policies they have identified, strengthened, adopted, and eliminated under this section. No later than April 15, 2004, the State Board shall report to the Joint Legislative Education Oversight Committee on these policies as well as on the policies the Board has identified, strengthened, adopted, and eliminated under this section.

**SECTION 4.** Nothing in this act shall be construed to obligate the General Assembly to make appropriations to implement this act.

**SECTION 5.** This act is effective when it becomes law.

In the General Assembly read three times and ratified this the 18<sup>th</sup> day of June, 2003.

s/ Beverly E. Perdue President of the Senate

# All Students Prepared for College, Careers and Life: An Overview of the North Carolina New Schools Project

North Carolina needs to graduate significantly more students from high school who are substantially more prepared to meet the demands of higher education, work and citizenship. Devised in the last century, the traditionally structured, traditionally run high school has proven incapable of meeting this challenge in communities throughout North Carolina. The purpose of the North Carolina New Schools Project (NCNSP) is to accelerate systemic, sustainable innovation in secondary schools across the state so that, in time, every high school in North Carolina graduates every student ready for college, careers and life in the society and economy of the 21<sup>st</sup> century.

Established in 2003 by the Office of the Governor and the Education Cabinet and with the support of the Bill & Melinda Gates Foundation, NCNSP is an independent not-for-profit corporation governed by a Board of Directors chaired by Burley Mitchell, former chief justice of the North Carolina Supreme Court. A Board of Advisors, which includes leaders from the private sector as well as prominent educational organizations in the state, assists with formalizing partnerships and strengthening collaboration.

NCNSP carries out its mission through an aggressive, three-pronged strategy of:

- o Creating innovative, highly effective high schools across North Carolina
- O Building a statewide consensus for significant change
- o Advancing policies that promote innovation, higher standards and improved performance.

## Creating innovative, highly effective high schools across North Carolina

With state and national partners, NCNSP has launched an unprecedented effort to create more than 100 new and redesigned high schools across North Carolina by 2008. These innovative high schools offer all students an academically rigorous curriculum grounded in the skills needed to

1

<sup>&</sup>lt;sup>1</sup> Annually, the North Carolina New Schools Project reports to the State Board of Education and the Joint Legislative Education Oversight Committee on the progress of innovative high schools from across the state and on the status of its initiatives. Annual independent financial and program audits are provided as well.

succeed in college and the 21<sup>st</sup> century workplace. These high schools focus on particular fields of interest to make learning more relevant to students or are based on a college campus so that students can earn college credit. Many schools have a focus in areas that are vital to the future of the state's economy, including science, technology, engineering and mathematics. In addition, special attention is focused in the 18 northeastern NC school districts to transform schools in one of the state's most challenged regions. These innovative high schools represent a critical mass for change among North Carolina's larger pool of regular high schools and serve as models to the entire state for maximizing student achievement.

The State Board of Education, the state Department of Public Instruction, the University of North Carolina and North Carolina Community College systems, and national organizations such as Jobs for the Future, the New Tech Foundation, Asia Society, the Middle College National Consortium and others are working with NCNSP to create innovative high schools.

NCNSP's clear intent is to spark and support deep instructional change. The conditions that permit this change are created in part by purposefully and dramatically rethinking traditional high schools' organization to allow different teaching and learning. This contrasts with layering a new "program" over existing instructional practice and school organization. NCNSP engages with schools over six years – one year of planning followed by five years of implementation support. This engagement recognizes the complexity and depth of work required to transform instruction in ways that meet the demands of a global, knowledge-based economy. Since 2003, NCNSP has partnered with local school districts and educators to open 102 innovative high schools enrolling more than 15,000 students in the 2008-09 school year.

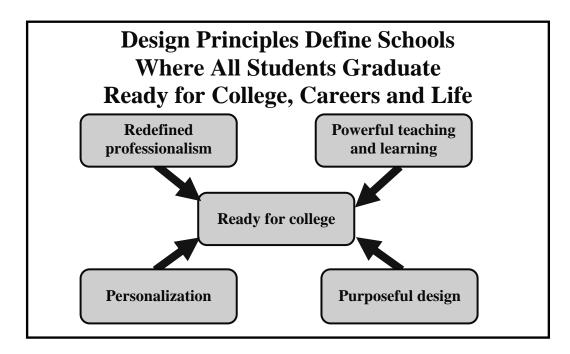

NCNSP's approach to innovation in a school has four elements – NCNSP's Design Principles, support for two types of innovative school models, the incorporation of academic themes by some schools, and an integrated system of implementation supports provided to schools.

NCNSP works with schools to implement a rigorous and far-reaching set of Design Principles that lead to student success judged by all students graduating "ready." The Design Principles are non-negotiable for any school partnering with NCNSP on innovation. NCNSP developed its Design Principles through observation of high school innovation underway in other states, experience in its first three years partnering with schools, and – most importantly – the views of principals and teachers on what is required for meaningful transformation of teaching and learning. Each Design Principle is defined by evidence and specific indicators observable in schools. The Design Principles are:

- Ready for College: Innovative high schools are characterized by the pervasive, transparent, and consistent understanding that the school exists for the purpose of preparing all students for college and work. They maintain a common set of high standards for every student to overcome the harmful consequences of tracking and sorting.
- Require Powerful Teaching and Learning: Innovative high schools are characterized by the
  presence of commonly held standards for high quality instructional practice. Teachers in these
  schools design instruction that ensures the development of critical thinking, application, and
  problem solving skills often neglected in traditional settings.

**Section E: Appendix 40** 

- Personalization: Staff in innovative high schools understand that knowing students well is an
  essential condition of helping them achieve academically. These high schools ensure that adults
  leverage knowledge of students in order to improve student learning.
- Redefine Professionalism: The responsibility to the shared vision of the innovative high school is evident in the collaborative, creative, and leadership roles of all adult staff in the school. The staff of these schools takes responsibility for the success of every student, holds themselves accountable to their colleagues, and is reflective about their roles.
- Purposeful Design: Innovative high schools are designed to create the conditions that ensure the other four design principles: ready for college, powerful teaching and learning, personalization, and redefined professionalism. The organization of time, space, and the allocation of resources ensures that these best practices become common practice.

Types of Schools

NCNSP and its partners are working with local school districts and their higher education partners to create two types of schools: redesigned high schools and Learn and Earn early college high schools. As of the 2008-09 school year, 102 redesigned and Learn and Earn early college high schools are open across the state.

Redesigned High Schools: NCNSP is partnering with school districts to convert conventional high schools into sets of autonomous, focused and academically rigorous innovative schools which operate on an existing campus. These new schools each adopt a curricular focus or common methodology as one strategy to enable teachers in the core courses to work together to make connections between courses and the world of work. The intent of a focus is not preparation for a specific career, but rather preparation for a lifetime of learning and workplace changes. For the 2008-09 school year, 42 redesigned high schools across 23 school districts are open for students. Among these 42 are 10 schools that were identified for "turnaround" work

by the Department of Public Instruction based on poor academic results. In addition, 25 of those 42 represent schools created to completely convert seven traditional comprehensive high schools into multiple autonomous small schools. In new and redesigned high schools, NCNSP emphasizes fields such as pre-engineering, international studies, information technology, and biotechnology which are vital to North Carolina's future.

Learn and Earn Early College High Schools: Located on the campus of two- or four-year community colleges and universities, Learn and Earn early college high schools provide an academically rigorous course of study that ensures all students graduate with a high school diploma and two years of transferable college credit or an associate degree. Sixty Learn and Earn early college high schools across 53 school districts are open for the 2008-09 school year, with another 12 in their planning year. Governor Easley launched the Learn and Earn Early College High School Initiative with the goal of creating 75 such schools by 2008. Learn and Earn is jointly administered by NCNSP and the Department of Public Instruction.

# **Two Kinds of Innovative High Schools**

# Learn & Earn early colleges

 Co-located on a college campus, with students graduating high school with two years of college credit

# Conversions/redesigns

Transformation of conventional secondary schools into focused and academically rigorous smaller schools

**Key differences from** conventional schools

Changed teaching that emphasizes inquiry and entrepreneurial thinking

All students complete college prep curriculum All students graduate with transferable college credit Most schools have a maximum of 100 students per grade

Support for Innovative High Schools

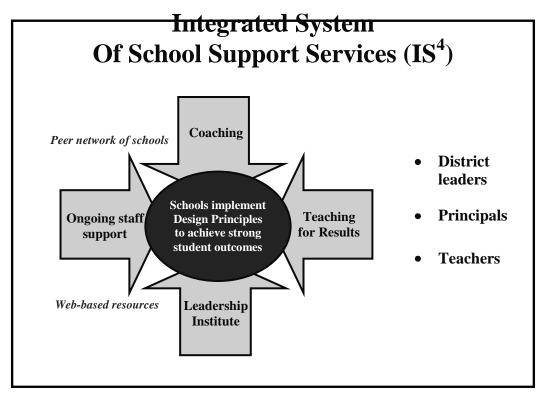

NCNSP and its partners offer assistance to innovative high schools through an Integrated System of School Support Services, or IS<sup>4</sup>. These school support services are aligned specifically with the five Design Principles and utilize an "anchor experience" for principals and lead teachers at a highly effective, innovative exemplar outside of North Carolina. IS<sup>4</sup> includes:

• Teaching for Results: Each year, teachers in innovative schools take part in a series of intensive professional development that sustains their focus on instruction, academic rigor and professional learning communities. The sessions stress differentiating instruction, teaching literacy across the curriculum, facilitating meaningful learning, and providing effective student

support. During the school year, the sessions involve visits to peer schools in which teachers use a medical "rounds" model to improve their practice collaboratively.

- Leadership Institute for High School Redesign: Given the importance of leadership in managing change and the unusual demands placed on school leaders in innovative high schools, NCNSP targets principals for leadership development that is tightly aligned with the content of teacher development activities, allowing school leaders and their faculties to grow together.
- Coaching: Innovative high schools receive ongoing, on-site coaching over the course of their six year partnership with NCNSP. Initially, the coaching focuses on school change. After the first year, the focus of coaching shifts to instructional practice for the remainder of the five years of the partnership.
- ONCNSP Program Staff Support: NCNSP's School Development Team, made up of highly accomplished teachers and administrators, provides ongoing support to innovative high schools. Each School Development Team member has a portfolio of schools to manage, ensuring the delivery of integrated supports and acting as a primary point of contact with NCNSP.

Beginning in the 2007-08 school year, innovative high schools have had access to literacy and math assessments that can be given twice during the school year to determine students' progress. The tests are computer-based and adaptive, with their difficulty increasing based on a student's level of mastery.

#### Early Results Show Promise

Transforming a school in meaningful ways that actually change teaching and learning is hard work. In its partnerships with local school districts, the North Carolina New Schools Project forges five-year agreements in recognition of the difficulty and complexity of this work. Emerging results from the 2005-06, 2006-07 and 2007-08 school years, however, indicate that high school innovation is taking hold in North Carolina.

**More students staying in school** – Dropout data from the Department of Public Instruction for the 2006-07 school year show that more students who are in innovative high schools are staying in school.

- Nearly half (48 percent) of the 82 innovative high schools had **no** dropouts during the 2007-08 school year. The innovative high schools represented 44 percent of all high schools in North Carolina with no dropouts.
- Forty-nine of the 76 innovative high schools that enrolled 9<sup>th</sup> graders lost no freshmen as dropouts in 2007-08.
- Of the 82 innovative high schools, 69 (84 percent) outperformed their comparison high schools, with a slightly higher percentage (86 percent) of the 76 schools with 9<sup>th</sup> graders outperforming comparison schools for freshman dropouts.
- The overall dropout rate in innovative high schools was 3.37 percent, compared to the statewide rate of 4.97 percent. The combined dropout rate for Learn and Earn early college high schools was .78 percent and for redesigned high schools was 5.45 percent.<sup>2</sup>
- Two-thirds of the 30 redesign schools outperformed their comparison school for all dropouts; 16 of 25 redesign schools with 9<sup>th</sup> grade classes outperformed their comparison school for freshmen dropouts.
- Eight of 10 STEM high schools (80 percent) had no dropouts in 2007-08, their first year of operation. Nine of the 10 schools lost no students in the 9<sup>th</sup> grade, which for most of the schools was their only class.

More 9<sup>th</sup> graders are being promoted – Ultimately, to graduate a student must first complete the required courses and be promoted from grade to grade. Research has shown that promotion out of 9<sup>th</sup> grade is an especially strong indicator of a student's likelihood to graduate. Based on data on grade level promotion from the Department of Public Instruction for the 2006-07 school year (the most recent available), more students in innovative high schools are being promoted into 10<sup>th</sup> grade.

<sup>&</sup>lt;sup>2</sup> Redesigned high schools must equip existing faculty with new instructional strategies in contrast to launching a new school with a common instructional approach and selecting a faculty consistent with that approach. Improvements in promotion rates and acceleration of the academic achievement of students who previously would have dropped out lag behind the introduction of these strategies. This lag time is consistent with many school-wide reforms nationally.

- Three-quarters (78 percent) of the 49 innovative high schools that had 9<sup>th</sup> grade classes promoted at least 90 percent of their 9<sup>th</sup> graders, with 20 of those schools (41 percent) promoting **100 percent** of their 9<sup>th</sup> graders.
- Four out of every five innovative high schools with sizable 9<sup>th</sup> grade classes (84 percent) had a 9<sup>th</sup> grade promotion rate that was greater than (at least 1 percentage point) their comparison school or district. More than half (55 percent) of innovative high schools had improved their 9<sup>th</sup> grade promotion rate by at least 10 percent over their comparison school or district.

**It's early, but some schools do better than expected** – Based on results from the state's ABC accountability system, many schools are making or exceeding growth expectations and are outperforming the comparable high schools in their districts.

- More than two thirds of innovative high schools had higher ABCs performance composites than comparison high schools. Eight six percent of early college high schools, 39 percent of redesigned high schools and 90 percent of STEM high schools met this benchmark.
- More than half (52 percent) of innovative high schools had performance composites (percent of proficient scores on all End-of-Course tests) of more than 80 percent, compared to only 13 percent of high schools statewide.

More teachers believe in their schools – Based on data from the 2008 North Carolina Teacher Working Conditions Survey, the percentage of teachers in innovative high schools who "strongly agree" that their school is "a good place to work and learn" is nearly double the percentage in comparison traditional high schools (34 percent compared to 17 percent). In fact, teachers in redesigned and early college high schools are significantly more satisfied in every area measured by the state's Teacher Working Conditions Survey.

## Building a statewide consensus for change

A vital part of NCNSP's work to ensure innovative high schools perform well is to build local community support and to build demand across the state generally for higher expectations and schools that can help students reach them. To broaden and deepen support for innovation across North Carolina, NCNSP works to prompt and support the delivery of compelling messages that build demand, working with like-minded individuals and organizations to spread this call for higher expectations. This work relies heavily on the results of NCNSP's partner schools to tell the story of expectations being met through innovation.

Changing high schools in North Carolina will require changing minds. While many North Carolinians have confronted global economic change first hand, they do not always connect it to high school innovation as a vital response. Others question the need for higher expectations and doubt that schools can educate all students to reach them in any case. Still others believe that schools must be different, but do not know how they can or should be different.

NCNSP sees an unmistakable need for a broad and sophisticated statewide outreach effort to increase demand for higher expectations and for schools that can ensure all students reach them before they graduate. This effort needs to harness every available tactic to compete effectively for the public's attention in a message-glutted world. NCNSP recognizes that many voices are louder than one voice. For this reason, key statewide actors such as the Office of the Governor, the State Board of Education, state business leaders and networks of community organizations must lead the outreach. NCNSP sees its role as prompting this outreach and supporting it through expertise and technical assistance. NCNSP seeks to be the linchpin in an inclusive statewide push that would create unavoidable demand.

To be clear, NCNSP does not view its advocacy agenda as simple marketing of its Design Principles and its services to help schools deliver on them. Rather, NCNSP believes that it must focus more broadly on higher expectations and the limitations of current high schools that prevent some students from reaching those higher marks. NCNSP sees any thoughtful public dialogue about the preconditions within schools that would ensure all students graduate "ready" as leading to the ideas raised in the Design Principles.

## Advancing policies that promote innovation, higher standards and improved performance

NCNSP generates ideas for and actively supports policy changes by the State Board of Education, the Education Cabinet and the General Assembly to ensure that all students are required to master high academic standards and that assessment and accountability systems are aligned with this goal. Through its research, NCNSP seeks to inform policymakers and the public of the need for higher expectations and more innovative delivery systems in high school education.

The policy changes advocated by NCNSP include changes to academic expectations based on the work of the American Diploma Project and the Center for 21<sup>st</sup> Century Skills, each of which involve raising standards based on the demands that high school graduates face in college and in the workplace.

Other specific policy changes advocated by NCNSP include:

- o **Increased Academic Standards:** Enrolling all students in academically rigorous, honors or AP level courses to prepare them for college and work will reduce the need for remediation after high school and enhance the state's workforce.
- o **Enhanced Curriculum and Professional Development:** Updating curriculum and assessments to include the knowledge and skills required in the new economy and enhancing the ability of teachers to teach both rigorous courses *and* skills such as communication and problem solving will prepare all students for college, work and a lifetime of learning.
- o **Enhanced Accountability:** Enacting changes to the state's ABC accountability model will provide an incentive to high schools to graduate all students and to enroll a greater percentage of students in higher level courses.

# **GRAND CHALLENGES FOR ENGINEERING**

MAKE SOLAR ENERGY ECONOMICAL
PROVIDE ENERGY FROM FUSION
DEVELOP CARBON SEQUESTRATION METHODS
MANAGE THE NITROGEN CYCLE
PROVIDE ACCESS TO CLEAN WATER
RESTORE AND IMPROVE URBAN INFRASTRUCTURE

# Session Law Regarding Joint Legislative Commission on Dropout Prevention and High School Graduation

# S.L. 2007-323, sec. 7.32.(f) as amended by S.L. 2008-181, Part XXXV SECTION 7.32.(f)

Joint Legislative Commission on Dropout Prevention and High School Graduation. –

- (1) There is created the Joint Legislative Commission on Dropout Prevention and High School Graduation (Commission) to be composed of 16 members, eight appointed by the President Pro Tempore of the Senate and eight appointed by the Speaker of the House of Representatives. The President Pro Tempore and the Speaker shall each designate a cochair from their appointees. Vacancies shall be filled in the same manner as the original appointments were made.
- (2) The co-chairs shall jointly call the first meeting of the Commission. A quorum of the Commission is a majority of its members.
- (3) The Commission shall:
- a. Evaluate initiatives and programs designed to reduce the dropout rate and increase the number of students who graduate from high school prepared to further their postsecondary education or enter the workforce.
- b. Review the research on factors related to students' success in school.
- c. Evaluate the grants awarded under subsection (d) of this section and recommend whether any of the programs and initiatives that received one of these grants has potential for success and should be expanded or replicated.
- d. Study the emergence of major middle school and high school reform efforts, including Learn and Earn Programs, the New Schools Initiative, and 21<sup>st</sup> Century Schools, and the impact they may have on the dropout rate.
- e. Examine strategies, programs, and support services that should be provided if the compulsory school attendance age is raised to enable students to graduate from high school and time lines for implementing those strategies, programs, and support services.
- f. Following a review of the courses required for graduation and the current system of awarding credit for those courses, determine whether changes should be made that better recognize the different learning rates and other needs of students.
- g. Determine which interventions and other strategies, such as accelerated learning, tutoring, mentoring, or small class sizes, when employed as a substitute to grade retention or as a subsequent measure to grade retention, are the most effective at enabling these students to remain in school and graduate.
- h. Study any other issue that the Commission considers relevant and appropriate.

**NC Race To The Top Application** 

## **General Statute Regarding Personal Education Plans**

# § 115C-105.41. Students who have been placed at risk of academic failure; personal education plans.

Local school administrative units shall identify students who have been placed at risk for academic failure. Identification shall occur as early as can reasonably be done and can be based on grades, observations, State assessments, and other factors that impact student performance that teachers and administrators consider appropriate, without having to await the results of end-of-grade or end-of-course tests. At the beginning of the school year, a personal education plan for academic improvement with focused intervention and performance benchmarks shall be developed for any student not performing at least at grade level, as identified by the State end-of-grade test. Focused intervention and accelerated activities should include research-based best practices that meet the needs of students and may include coaching, mentoring, tutoring, summer school, Saturday school, and extended days. Local school administrative units shall provide these activities free of charge to students. Local school administrative units shall also provide transportation free of charge to all students for whom transportation is necessary for participation in these activities.

Parents should be included in the implementation and ongoing review of personal education plans. (2001-424, s. 28.17(e).)

**Section F: Appendix 46** 

# SBE Policy Concerning National Board of Professional Teaching Standards

Policy ID Number: TCP-F-000

Policy Title: Policy in support of the National Board for Professional Teaching

Standards

1. Release Time to Prepare and Assessment Fee.

The SBE fully supports the work of the NBPTS. The SBE will annually submit a supplemental expansion budget request to:

- provide candidates for national board certification with three days of approved paid release time to prepare for national certification assessment.
- pay the \$2,000 assessment fees for eligible teachers preparing for national certification assessment.

## 2. Core Propositions.

The work of the NBPTS is based on the following "core propositions" about what teachers should know and be able to do:

- a. Teachers are committed to students and their learning.
- b. Teachers know the subjects they teach and how to teach those subjects to students.
- c. Teachers are responsible for managing and monitoring student learning.
- d. Teachers think systematically about their practice and learn from experience.
- e. Teachers are members of learning communities.

The SBE feels that the core propositions are valid, valuable, and straightforward. It is, therefore, the policy of the SBE that the NBPTS core propositions be used, when appropriate, as the basis for subsequent SBE and DPI policies and regulations dealing with the training, evaluating, induction, licensing and staff development of North Carolina teachers.

## 3. Recognition and Acceptance of NBPTS Certificates.

It is the policy of the SBE to accept relevant and current NBPTS certificates as meeting the requirements of North Carolina licenses without restriction or testing requirements, except that the North Carolina Department of Public Instruction's (NCDPI) Division of Human Resource Management will continue to use the National Association of State Directors of Teacher Education and Certification Clearinghouse to determine if licensure applicants have had a license revoked in any state. The division will apply any future criminal screening tests to all license candidates. Applicants will be subject to the standard license application fees.

In determining the compatibility of NBPTS certificates with North Carolina licenses, the NCDPI Division of Human Resource Management will consider the more rigorous requirements of NBPTS certificates so that compatibility will not be defined too narrowly.

In addition to the above policies, the SBE:

requests IHEs to reexamine undergraduate and graduate teacher education

**NC** Race To The Top Application

- programs toward the goal of incorporating NBPTS standards.
- requests the Teacher Academy, Principals' Fellows Program, and the Principals' Executive Program to incorporate NBPTS core propositions into their training process.
- encourages staff development programs and activities to assist teachers seeking NBPTS certification.
- requests LEAs to designate a person to be available to support and provide information to NBPTS certification candidates.

Section F: Appendix 47
